Marxism And New Left Ideology:

Marxism and New Left Ideology Ileana Rodríguez, William L. Rowe, 1977 *Marxism and New Left Ideology* Ileana Rodríguez, William L. Rowe, 1977 **Classical Marxism in an Age of Capitalist Crisis** William Briggs, 2019-03-14 Will capitalism survive forever Capitalism has always lived in and with crisis Wars revolutions economic depression and repeated recessions the threat of nuclear annihilation and ecological disaster have all failed to break the dominance of this economic and political system Challenging the predominance of capitalism in a world fraught with inequalities this book returns to classical Marxism to reaffirm its relevance It explores the contradictions within capitalism as well as explains why Marxism has been unable to mount a sustained challenge to capitalism In order to explore concrete alternatives in a period of increasing capitalist globalisation and crisis it goes on to present perspectives by which theory and practice might be reunited to building independent political and organisational structures A search for something better this volume will be an engaging read for scholars and researchers of politics especially political theory and political economy economics and sociology **Science and Ideology in the Policy Sciences** Paul Diesing, 2017-07-05 The purpose of this book is to examine how ideology operates in the sense of influencing the conduct of inquiry in the policy sciences defined as economics political science and sociology The author seeks to identify the main ideologies and show how each ideology produces a preference for certain problems methods and hypotheses how it sensitizes scientists to certain phenomena and suggests certain interpretations of those phenomena and how it closes off other phenomena and concepts from investigation and testing or at least distorts that investigation In this book Diesing critically examines all the major schools of policy related social thought from 1930 to 1975 He deals with Neoclassical Economics and its various applications the Keynesians the Systems Approach the Schumpeter perspective the Critical Intellectuals the Pluralists the J K Galbraith School New Left Marxism and the Ecological Paradigm of Schumacher and others The world looks different if your perspective is that of a rational small businessman working in a society of hypothetical perfect competition as opposed to that of a proletarian looking up at your oppressors Part One is descriptive and evaluative considering each ideology in turn Part Two considers the policy implications In 1982 Diesing published a remarkable book entitled *Science and Ideology in the Policy Sciences* When I interviewed Diesing in Buffalo in the summer of 1984 he told me that to date the publication had been reviewed in only two professional journals I was astounded *Science Ideology* was the best book I had read in a decade and it related directly to all the policy sciences The lack of professional response may partially reflect Diesing's disinterest in self promotion but beyond this is the community problem Scholars are recognized within disciplines but there is only a tiny community of social science I consider this to be the most brilliant of Diesing's books Like all of Diesing's works it remains highly relevant today from the introduction by Richard Hartwig *Essential Essays, Volume 1* Stuart Hall, 2018-12-06 From his arrival in Britain in the 1950s and involvement in the New Left to founding the field of cultural studies and examining

race and identity in the 1990s and early 2000s Stuart Hall has been central to shaping many of the cultural and political debates of our time *Essential Essays* a landmark two volume set brings together Stuart Hall's most influential and foundational works Spanning the whole of his career these volumes reflect the breadth and depth of his intellectual and political projects while demonstrating their continued vitality and importance Volume 1 *Foundations of Cultural Studies* focuses on the first half of Hall's career when he wrestled with questions of culture class representation and politics This volume's stand out essays include his field defining *Cultural Studies and Its Theoretical Legacies* the prescient *The Great Moving Right Show* which first identified the emergent mode of authoritarian populism in British politics and *Encoding and Decoding in the Television Discourse* one of his most influential pieces of media criticism As a whole Volume 1 provides a panoramic view of Hall's fundamental contributions to cultural studies **New Left Revisited** John Campbell

McMillian, Paul Buhle, 2008 Starting with the premise that it is possible to say something significantly new about the 1960s and the New Left the contributors to this volume trace the social roots the various paths and the legacies of the movement that set out to change America As members of a younger generation of scholars none of them apart from Paul Buhle has first hand knowledge of the era Their perspective as non participants enables them to offer fresh interpretations of the regional and ideological differences that have been obscured in the standard histories and memoirs of the period Reflecting the diversity of goals the clashes of opinions and the tumult of the time these essays will engage seasoned scholars as well as students of the 60s *Philosophical Theology and East-West Dialogue* Hisakazu Inagaki, J. Nelson Jennings, 2021-10-25

Philosophical Theology and East West Dialogue is a unique philosophical and theological analysis of certain key interactions between Eastern and Western thinkers The book on the one hand contrasts general traits of Eastern Buddhist thought and Western Greek thought However in doing so it focuses on influential philosophers and theologians who manifest particular instances of wider issues The result is a careful examination of basic questions that offers both broad implications and concrete specificity in its approach The book itself is an instance of East West dialogue Independently of each other both authors had previously engaged in serious cross cultural studies The Japanese Inagaki had researched Western science and philosophy then written in Japanese comparative studies of Japanese thought The North American Jennings had researched Japanese theology They brought these backgrounds together dialoguing with each other until the present study emerged Several creative Japanese thinkers as well as important Westerners are taken up The study follows the lead of many Eastern impulses but it also critically utilizes Western methods Contemporary thinking on religious plurality is carefully examined This new study is a must for those interested in philosophy and theology in general and East West interaction in particular

Marxism and Education (RLE Edu L) Madan Sarup, 2013-05-13 This book introduces the student to the various phenomenological and humanistic Marxist perspectives as they are being applied to education and provides an account of the strengths and weaknesses of these perspectives drawing on a variety of disciplines in order to explain the controversies

described The opening chapters deal with the phenomenological perspective in the sociology of education discussing its adoption of a phenomenological model of man its use of anthropological studies the importance of classroom studies and its rejection of the liberal philosophy of education The aim is to show the significance of these ideas for education with a discussion of the concept of alienation and schooling developments in Marxism such as the focus on the mode of production and the labour process and the political economy of education

Marx and the End of Orientalism (Routledge Revivals) Bryan Turner, 2014-07-11 First published in 1978 this title analyses a range of problems that arise in the study of North Africa and the Middle East bridging the gap between studies of Sociology Islam and Marxism Both Sociology and the study of Islam draw on an Orientalist tradition founded on an idealist epistemology ethnocentric values and an evolutionary view of historical development Bryan Turner challenges the basic assumptions of Orientalism by considering such issues as the social structure of Islamic society the impact of capitalism in the Middle East the effect of Israel on territories revolutions social classes and nationalism A detailed and fascinating study *Marx and the End of Orientalism* will be of particular interest to students studying the sociology of colonialism and development Marxist sociology and sociological theory

Marxism, Class Analysis and Socialist Pluralism Les Johnston, 2015-04-17 This book first published in 1986 presents a radical challenge to socialist orthodoxy subjecting a key component of that orthodoxy Marxism to sustained criticism Les Johnston argues that Marxism cannot provide the foundations for a rigorous socialist theory or an effective socialist politics A fundamental element of this criticism is the suggestion that the problem of reductionism which has preoccupied Marxists is a red herring Marxism's problem is not its reductionism but its theoretical incoherence Marxism is not deterministic for there is invariably an indeterminate relationship between the materialism it invokes and the forms of politics it adopts However materialism is an obstacle to socialist theory The contradictions and failures of Marxist class analysis suggest that the class concept is inadequate to the demands that socialists continue to place on it It is not merely class which is problematic however but the conception of political interests which is associated with it Even recent Marxist revisionists who dispense with class primacy are unwilling to come to terms with the question of how socialist political interests are constituted Socialist theory has to recognise the varied forces and interests on the left and an effective socialism will have to be a pluralistic one This means there can be no general theory of socialism since a pluralistic socialism has to be able to adjust to varying social conditions
