Marxist Philosophical Research Makesi Zhu Yi Zhe Xue Yan Jiu:

Li Da And Marxist Philosophy In China Nick Knight,2018-02-23 Scholars of Marxism will be in Nick Knight's debt for this pioneering study of one of the most important figures in the development of Marxism in China. Knight makes an important case about the relationship of Chinese Marxist thought to Marxist thought in general with particular attention to Soviet Marxism. The book makes available to readers not just important texts of Chinese Marxism but a whole series of texts of Marxism that were crucial to the political discourse of the thirties. Knight displays impressive erudition and command of these texts. In spite of the strong case he makes for his thesis, he retains throughout an admirable critical self-awareness that enhances the plausibility of his argument. Arif Dirlik, Duke University

Back to Marx Yibing Zhang,2014 Without a doubt Karl Marx's philosophical work had a huge impact on western concepts of society and economics that still reverberates in the philosophical discourse. In the analysis of this ongoing discourse, however, the work of Chinese scholars is underrepresented. This book is a translation of the reference work *Back to Marx* first published in 1999 in the PRC. The book is a serious inquiry into the interrelationships between Marx's political and economic philosophy based on careful and systematic reading of a wide range of textual sources, including in particular the newly published second edition of the Complete Works of Marx and Engels MEGA2, which collects notes, drafts, manuscripts, and excerpts previously unavailable to the scholarly community. The author, Zhang Yibing, teaches philosophy at the University of Nanjing and is one of the foremost scholars of Marxism in the PRC, a Marxist analyst of contemporary philosophical issues. At the same time, he is the Vice Chancellor of the University

China's Legal Awakening Carlos Wing-hung Lo, Yonghong Lu,1995 This book illustrates through the analysis of more than two hundred criminal cases selected from *Minzhu yu fazhi* Democracy and the Legal System in the period 1979-89 that the establishment of a formal criminal justice system and the development of an embryonic socialist theory of law in China reflect a genuine and widespread legal awakening.

Exploring Nationalisms of China C. X. George Wei, Xiaoyuan Liu,2002-12-30 China is a site for the evolution, not only of Chinese nationalism but the nationalism of various non-Han ethnic groups. During the 20th century, these ethnic groups constructed and expressed their own identities and nationalism through interaction with one another and with outside influences. This interdisciplinary anthology contains nine original works that pluralize our understanding of nationalism in China by illustrating the various intellectual strains of China's nationalist discourse, the dichotomy between the political authorities and grass roots experiences, and the nationalizing efforts by various ethnic and political groups along China's inland and maritime frontiers. First contributors explore the controversy surrounding the contested issue of China's national

and international identity from pre modern times to the present Next the authors examine China s nationalist encounters with foreign influences such as U S Marines in Shandong Soviet experts in Manchuria and recent friction between the United States and the PRC Finally essays expand beyond the ethnographic regions of the Han Chinese and the political domain of the PRC to discuss the odyssey of Taiwan s nationalism in both a political and a cultural sense Many selections are based on newly declassified archival materials

Twentieth Century China James H. Cole, 2004 Emphasizing reference works published since 1964 these volumes cover books periodicals and inclusions i e chapters in edited volumes on the 1911 Revolution the Republic of China 1949 post 1911 Taiwan post 1911 Hong Kong and Macao and post 1911 overseas Chinese

The State, Identity, and the National Question in China and Japan Germaine A. Hoston, 1994-09-11 The first decades of the twentieth century witnessed an explosion of nationalist sentiment in East Asia as in Europe This comprehensive work explores how radical Chinese and Japanese thinkers committed to social change in this turbulent era addressed issues concerning national identity social revolution and the role of the national state in achieving socio economic development Focusing on the adaptation of anarchism and then Marxism Leninism to non European contexts Germaine Hoston shows how Chinese and Japanese theorists attempted to reconcile a relatively new appreciation for the nation state with their allegiance to a vision of internationalist socialist revolution culminating in stateless socialism Given the influence of Western experience on Marxism Chinese and Japanese theorists found the Marxian national question to be not merely one of whether the working man has no country but rather the much more fundamental issue of the relative value of Eastern and Western cultures Marxism argues Hoston thus placed native Marxists in tension with their own heritage and national identity The author traces efforts to resolve this tension throughout the first half of the twentieth century and concludes by examining how the tension persists as Chinese and Japanese dissidents seek identity affirming modernity in accordance with the Western democratic model

Millennium William Hurst, 2019-07-29 This collection includes seven essays translated from the leading Chinese language journal Open Times Bringing together a wide range of leading experts across several disciplines this book offers critical insights on some of the most important questions of contemporary urban Chinese politics and society Drawing on extensive research across different localities and issues in China the chapters offer rich data and fresh analyses of the shifting contours of urban governance social mobilization and contention and mechanisms of social control in the new Millennium Taken together this collection represents the most comprehensive look in some years at how urban Chinese political institutions have adapted and responded to challenges and how social actors and groups have mobilized to press for redress of substantial new grievances

Writing to the Rhythm of Labor Benjamin Kindler, 2025-05-20 What does it mean to write in a socialist revolution What defines labor in a communist society In revolutionary China writers were regularly dispatched to the countryside or factories with the expectation that through immersion in the life of workers and peasants they would be

remade as culture workers whose writing could serve the communist project Their cultural labor would not merely reflect or represent the process of building socialism it would actively participate in it by excavating the contradictions and challenges of the ongoing reorganization of social relations Benjamin Kindler examines how writing transformed the Chinese Revolution even as the revolution remade what it meant to write He argues that the revolution sought in unparalleled ways to overcome the basic division between those who write and those who work This book combines close readings of a wide range of texts from the works of established figures to the writings of amateur workers drawn from the factory floor with analysis of Chinese socialist political economy Far from being drab instances of state propaganda these texts and cultural experiments were lively and inventive attempts to determine what a different more equal society might look like Offering new ways to understand cultural production as a material embodied process this book reconsiders the role of art and literature in radical politics
