Nationalism And Beyond:

Nationalism and Beyond Nenad Mišćević, 2001-06 A very readable introduction to the concepts and principles shaping the philosophical debate around nationalism The book provides portraits of two kinds of nationalists the tougher type more common in everyday life and the ultra moderate liberal nationalist encountered in academia The author introduces a debate with a thoughtful nationalist one who defends the view that states should be organized around national culture and that individuals have basic obligations to their nation The author attempts to answer his opponent's standard arguments and presents a fully documented critique of his views A passion born from Miscevic's encounter with nationalism in the former Yugoslavia glows from every line of the argument Questions raised and discussed include Why is radicalism typical of nationalism How successful is the nation state Does nationalism support liberal democratic values Is membership in a nation necessary for human fulfillment and for understanding values Why might nationalism be immoral The book is unique not only because it explains a contemporary moral debate in terms clear to the non philosopher reader but also because it has been written from the perspective of Central and Eastern Europe based on the author's personal experience Nationalism, Religion, and Beyond Aurobindo Ghose, 2005 **Histories of Nationalism beyond Europe** Jan Záhorský, Antonio M. Morone, 2022-07-08 This edited collection explores varying shapes of nationalism in different regional and historical settings in order to analyse the important role that nationalism has played in shaping the contemporary world Taking a global approach the collection includes case studies from the Middle East Africa Asia and North America Unique not only in its wide range of geographically diverse case studies this book is also innovative due to its comparative approach that combines different perspectives on how nations have been understood and how they came into being highlighting the transnational connections between various countries The authors examine what is meant by the concepts of nation and national identity discussing themes such as citizenship ethnicity historical symbols and the role of elites By exploring these entangled categories of nationalism the authors argue that throughout history elites have created artificial versions of nationalism through symbolism and mythology which has led to nationalism being understood through social constructivist or primordialist lenses This diverse collection will appeal to researchers studying nationalism including historians political scientists and anthropologists Beyond the Alamo Raúl A. Ramos, 2009-08-31 This book is divided into two parts Part 1 uses the first three chapters to examine 1821 taking stock of the multiple changes underway at independence The chapters set up three social worlds coexisting in the region and affecting the development of the others Part 2 follows the development of ethnicity and nationalism through Texas secession **Nationalism and Social Theory** Gerard Delanty, Patrick O'Mahony, 2002-04-26 Why has nationalism proved so durable What are the roots of its appeal This sharp and accessible book slices through the myths surrounding nationalism and provides an important new perspective on this perennial subject The book argues that nationalism is persistent not merely because of its specific ideological appeal but because it expresses some

of the major conflicts in modernity nationalism reflects and reinforces four key trends in western social development state formation democratization capitalism and the rationalization of culture the forms of nationalism can be organized into a comprehensive typology which is outlined in the course of this study post nationalism and cosmopolitanism are significant innovations in the debate about nation states and nationalism and that the new radical nationalisms have become powerful new movements in the global age Empire and After Graham MacPhee, Prem Poddar, 2007 Ranging from analyses of contemporary culture postcolonial writing political rhetoric and postimperial memory after 9 11 this collection demonstrates that far from being parochial and self involved the question of Englishness offers an important avenue for thinking about the politics of national identity *Beyond the Alamo (Volume 1 of 2) (EasyRead Super Large 18pt Edition)* , Beyond Patriotism James R. Flynn, 2011-11-10 Beyond Patriotism argues that some millions of Americans have become post national people who put the good of humanity ahead of patriotism or national honour It discusses the decisions that led them from the Vietnamese War to the attempt to put Pol Pot back into power to the sanctions against Iraq Rather than lamenting the hey day of patriotism post national people should congratulate themselves on attaining moral maturity They should clarify their thinking about why nationalism is bankrupt what American should do to pacify the world what they owe to their native land and what they owe to themselves **Beyond Nationalism and the Nation-State** İlker Cörüt, Joost Jongerden, 2021-05-30 This book centers on one fundamental question is it possible to imagine a progressive sense of nation Rooted in historic and contemporary social struggles the chapters in this collection examine what a progressive sense of nation might look like with authors exploring the theory and practice of the nation beyond nationalism The book is written against the background of rising authoritarian nationalist movements globally over the last few decades where many countries have witnessed the dramatic escalation of ethnic nationalist parties impacting and changing mainstream politics and normalizing anti immigration anti democratic and Islamophobic discourse This volume discusses viable alternatives for nationalism which is inherently exclusionary exploring the possibility of a type of nation based politics which does not follow the principles of nationalism With its focus on nationalism politics and social struggles this book will be of great interest to students and scholars of political and social sciences *Beyond the Alamo (EasyRead Comfort Edition)* Raúl A. Ramos, 2008 **The Lure of Economic Nationalism** Kenneth A. Reinert, 2023-08-01 The Lure of Economic Nationalism addresses the continued appeal of economic nationalism It places economic nationalism in both historical and contemporary contexts from mercantilism and the writings of Friedrich List to Brexit in the United Kingdom and the Trump Administration in the United States It also considers the alternative to economic nationalism in the form of a rules based multilateral trading system and the World Trade Organization The book argues that going beyond zero sum outcomes is better suited to address current problems including rising tides of ethnonationalism in many countries and pandemics The book is written in an accessible manner and draws deeply from research in economics and political science It will be of interest to policymakers economists

political scientists and the informed public Transnational Perspectives on Modern Irish History Niall Whelehan, 2014-10-03 This book explores the benefits and challenges of transnational history for the study of modern Ireland In recent years the word transnational has become more and more conspicuous in history writing across the globe with scholars seeking to move beyond national and local frameworks when investigating the past Yet transnational approaches remain rare in Irish historical scholarship This book argues that the broader contexts and scales associated with transnational history are ideally suited to open up new questions on many themes of critical importance to Ireland's past and present They also provide an important means of challenging ideas of Irish exceptionalism The chapters included here open up new perspectives on central debates and events in Irish history They illuminate numerous transnational lives follow flows and ties across Irish borders and trace networks and links with Europe North America the Caribbean Australia and the British Empire This book provides specialists and students with examples of different concepts and ways of doing transnational history Non specialists will be interested in the new perspectives offered here on a rich variety of topics particularly the two major events in modern Irish history the Great Irish Famine and the 1916 Rising Social Theory and Regional Studies in the Global Age Saïd Amir Arjomand, 2014-05-19 In this pioneering volume leading international scholars argue for the development of a new approach to social theory that draws on regional studies for the conduct of comparative analysis in the global age Social Theory and Regional Studies in the Global Age moves beyond facile generalizations based on the historical experience of modernization in the West by highlighting differences rather than similarities and contrasts rather than commonalities and by examining civilizational processes and culturally specific developmental patterns distinctive of different world regions Essays combine comparative and historical sociology with civilizational analysis and the study of multiple and alternative modernities Different patterns of modernization are compared within the framework of global local compressed communication and interaction that results from globalization The introductory chapter puts the present effort in the context of the seminal work of three generations of comparative sociologists and what follows is a penetrating analysis of modernization and globality opening the way for rectifying the erasure of the historical experience of a very sizeable portion of humankind from the foundation of social theory Nation and Nationalism in Japan Sandra Wilson, 2002 This book brings together new work by a range of international leading scholars who consider Japanese nationalism in a wide variety of its aspects **Black Identity** Dexter B. Gordon, 2003 **Statehood Before and Beyond Ethnicity** Linas Eriksonas, Leos Müller, 2005 Today's world is a world of nation states few have survived since the early modern period some have existed for three hundred years most came into being during the second part of the last century Yet the equation between the state and the nation does not go back far in history despite the prevailing tendency to view the state as closely linked to ethnicity To challenge the latter this book attempts to examine statehood separately from the concept of ethnicity it asks what is non ethnic about statehood by looking at statehood before and beyond ethnicity A non

ethnic statehood is analysed in two forms as a historical phenomenon at the time of the emergence of the early modern state Part One and as a historical tradition which had been pursued by the nation builders in the nineteenth and twentieth centuries Part Two Instead of looking at great powers as traditional models of statehood individual chapters focus on minor and less familiar states in Northern and Eastern Europe from the period c 1600 2000 including Belgium Bohemia Greece the Netherlands Romania Poland Lithuania Serbia and Montenegro Sweden Scotland and Transylvania

Understanding Australia's Neighbours Nick Knight, Michael Heazle, Daniel Halvorson, 2011-09-26 A comprehensive introduction to the study of Asia Written thematically it provides comparisons between Asian and Australian societies and encourages readers to think about Australia's neighbours across a wide range of social economic and historical contexts

The Mass Psychology of Ethnonationalism Dusan Kecmanovic, 2013-11-11 Throughout the nineteenth and twentieth centuries ethnonationalism has left its indelible mark on Europe and every other continent The latest events in the Balkans in central and eastern Europe and in the former Soviet Union unequivocally testify to the power and influence of ethnonationalism at the end of the second millennium What forces make people so committed to their ethnonational groups that they are ready to ignore all other concerns first and foremost the rights and interests of people of other ethnicities What is the social psychological and anthropological underpinning of ethnonationalism And finally why and how do people adhere to nationalist attitudes and beliefs These questions are virtually impossible to avoid for anyone who has directly felt the impact of ethnonationalism but they also present themselves to anyone who has indirectly experienced the prejudices unleashed by ethnonationalist forces This book attempts to answer all these questions by focusing on national feeling and the social psychological and anthropological foundations that underlie the sense of belonging that is essential to nationalism No matter how qualitatively different nationalist attitudes and beliefs are from national sentiment the latter has to be considered in any study of nationalism

Making the Fascist State Herbert Wallace Schneider, 1928

Indigenous Nations and Modern States Rudolph C. Ryser, 2012 Indigenous peoples throughout the world tenaciously defend their lands cultures and their lives with resilience and determination They have done so generation after generation These are peoples who make up bedrock nations throughout the world in whose territories the United Nations says 80 percent of the world's life sustaining biodiversity remains Once thought of as remnants of a human past that would soon disappear in the fog of history indigenous peoples as we now refer to them have in the last generation emerged as new political actors in global regional and local debates As countries struggle with economic collapse terrorism and global warming indigenous peoples demand a place at the table to decide policy about energy boundaries traditional knowledge climate change intellectual property land environment clean water education war terrorism health and the role of democracy in society In this volume Rudolph C Ryser describes how indigenous peoples transformed themselves from anthropological curiosities into politically influential voices in domestic and international deliberations affecting everyone on the planet He reveals in documentary detail how since the 1970s indigenous

peoples politically formed governing authorities over peoples territories and resources raising important questions and offering new solutions to profound challenges to human life
