Urban Tourism in the Developing World Gustav Visser,2017-07-28 Over the past decade the field of urban tourism has consolidated with the appearance of several books that concentrate upon the Western European and North American experience Recently the scope and range of urban research has widened considerably including the welcome appearance of studies that examine the tourism phenomenon in cities outside the Euro American heartland Despite this growing international body of debate and scholarship on tourism and cities particularly in the developed North literature that relates to the developing world as a whole and to Africa in particular remains sparse The task of Urban Tourism in the Developing World The South African Experience is to augment the current international scholarship concerning urban tourism in the developing world More especially the contributors draw attention to a range of case studies from South Africa that provide some starting points to address the uneven scholarly coverage of urban tourism the African context has received to date In addition the research material presented here seeks to contribute toward raising the South African and indeed the African profile within growing international scholarship concerning issues of urban tourism and development This collection aims to expand an emerging South African and African tourism research voice concerning the tourism and development nexus as well as to stem critiques that this body of research appears to have developed in a theoretical vacuum divorced from broader international tourism research discourses This collection of essays not only further develops an independent South African tourism perspective but also presents research that is closely tied to international urban tourism research debates In addition this analysis of urban tourism in the South African context enriches the rather Western oriented theories of urban tourism discourse through its emphasis on how urban tourism is evolving in urban Africa

Political Ecology and Tourism Sanjay Nepal,Jarkko Saarinen,2016-02-26 Political ecology explicitly addresses the relations between the social and the natural arguing that social and environmental conditions are deeply and inextricably linked Its emphasis on the material state of nature as the outcome

of political processes as well as the construction and understanding of nature itself as political is greatly relevant to tourism. Very few tourism scholars have used political ecology as a lens to examine tourism centric natural resource management issues. This book brings together experts in the field with a foreword from Piers Blaikie to provide a global exploration of the application of political ecology to tourism. It addresses the underlying issues of power ownership and policies that determine the ways in which tourism development decisions are made and implemented. Furthermore, contributions document the complex array of relationships between tourism stakeholders including indigenous communities and multiple scales of potential conflicts and compromises. This groundbreaking book covers 15 contributions organized around four cross-cutting themes of communities and livelihoods, class representation and power dispossession and displacement and environmental justice and community empowerment. This book will be of great interest to students and scholars in tourism geography, anthropology, sociology, environmental studies and natural resources management.

Urban Tourism in China Mimi Li, Wu Bihu, 2013-09-13 China has witnessed a dramatic development of tourism in urban context in the past thirty years, especially with its success in hosting the Beijing Olympic Games in 2008 and the Shanghai World Exposition in 2010. Urban areas as tourism destinations are receiving increasingly more popularity than traditional destinations such as national parks, natural reserves and historical relics. Deriving largely from a special issue on Urban Tourism Development and City Destination Marketing, *Journal of China Tourism Research* presents the readers with a collection of nine independent research reports examining issues such as consumer behaviour in urban destinations, the social impact of tourism, destination image, leisure, regional collaboration and heritage tourism in ancient towns. The investigations covered urban areas of different scales and diversified nature from major metropolises such as Beijing and Guangzhou to ancient towns like Lijiang and Pingyao. Readers who have interests of tourism research, business development and in-depth understanding of urban life in China may find the book informative and interesting. This book was published as a special issue of the *Journal of China Tourism Research*.

National Parks, Native Sovereignty Christina Gish Hill, Matthew J. Hill, Brooke Neely, 2024-03-12 The history of national parks in the United States mirrors the fraught relations between the Department of the Interior and the nation's Indigenous peoples. But amidst the challenges are examples of success. *National Parks, Native Sovereignty* proposes a reorientation of relationships between tribal nations and national parks, placing Indigenous peoples as co-stewards through strategic collaboration. More than simple consultation, strategic collaboration as the authors define it involves the complex process by which participants come together to find ways to engage with one another across sometimes conflicting interests. In case studies and interviews focusing on a wide range of National Park Service sites, the authors and editors of this volume, scholars as well as National Park Service staff and tribal historic preservation officers, explore pathways for collaboration that uphold tribal sovereignty. These efforts serve to better educate the general public about Native peoples, consider new ways of understanding and interpreting the peoples' Native and non-

Native connected to national park lands and recognize alternative ways of knowing and using park lands based on Native peoples expertise National Parks Native Sovereignty emphasizes emotional commitment mutual respect and patience rather than focusing on land back solutions in the cocreation of a socially sensible public lands policy Ultimately it succeeds in promoting the theme of strategic collaboration highlighting how Indigenous peoples assert agency and sovereignty in reconnecting with significant landscapes and how non Native scholars and park staff can incrementally assist Native partners in this process
