Here at last is a comprehensive book on the often ignored but vitally important subject of care for the chemically dependent adolescent. combinations currently in vogue in the drug world and the short and long term effects they have on the body and discusses ways to recognize and pinpoint the telltale signs of a user. He explores the question of why adolescents abuse drugs as well as special issues affecting young female addicts. This powerful book also examines the fatal relationship between drugs and AIDS and includes a brief history of AIDS and lifesaving advice on AIDS prevention. Dr. Milhorn skillfully assesses the various inpatient and outpatient treatment choices. He realistically portrays the intense physical and emotional stages the user will pass through before becoming drug free as well as the stresses placed upon families during the recovery process. As this valuable book relates, both parents and teachers have clearly defined roles and each can use his or her own brand of influence to aid the adolescent on the journey back to a healthy mind and body. Finally, Dr. Milhorn presents a list of successful options available if a first treatment attempt should fail. We live in a society where 12 year olds are budding alcoholics and children are bombarded in school hallways with solicitations to experiment with illicit drugs. With the practical wisdom of this authoritative and accessible guide, we can learn the techniques that will save our next generation from ruining their lives through hopeless addiction.

Addictions Barbara S. McCrady, Elizabeth E. Epstein, 1999-04-15. Today, alcohol and other drug abuse scientists have access to a broad array of clinical resources that integrate a commonsensical approach to addiction treatment with science. *Addictions: A Comprehensive Guidebook* is a superb example of one such resource. Here, in one volume, is both practical and scholarly information for alcohol and drug abuse specialists, primary care providers, clinicians, policy makers, and others involved in programs that are geared to help those who abuse or are dependent on alcohol and other drugs. Its scope is a testament to how far drug abuse scientists and practitioners have come in defining what they do and to how they are able to do it effectively through a growing body of scientific behavioral research. *Addictions* is organized into seven parts that range from the prevalence of certain addictions to their identification and treatment to the social effects of these addictions. In fact, this volume contains nearly all of the basic information a professional or graduate student needs to learn about or treat substance abuse.

1965 70 **Diagnostic Interviewing** Michel Hersen, Samuel M. Turner, 2013-03-09 Perhaps the most difficult milestone in a young clinician's career is the completion of the first interview. For the typical trainee the endeavor is fraught with apprehension and with some degree of dread. If the interview goes well there is considerable rejoicing; if it goes badly much consternation results. Irrespective of the amount of preparation that has taken place before the interview the neophyte will justifiably remain nervous about this endeavor. Thus the first edition of *Diagnostic Interviewing* was devoted to providing a clear outline for the student in tackling a large variety of patients in the interview setting. In consideration of the positive response to the first edition of *Diagnostic Interviewing* published in 1985 we and our editor at Plenum Press, Eliot Werner, decided that it was time to update the material. However the basic premise that a book of this nature needs to encompass theoretical rationale, clinical description, and the pragmatics of how to once again has been followed. And as in the case of the first edition this second edition does not represent the cat's being skinned in yet another way. Quite to the contrary we still believe that our students truly need to read the material covered herein with considerable care and once again the book is dedicated to them. We are particularly concerned that in the clinical education of our graduate students interviewing has been given short shrift.
