Radiation Effects On Solid Surfaces Advances In Chemistry Series Volume 158:

Chemical Physics of Solids and Their Surfaces M W Roberts, John M Thomas, 2007-10-31 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 80 years the Royal Society of Chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued *Applied Surface Analysis* Terry L. Barr, 1980 *Chemical Physics of Solids and Their Surfaces*, 1978 **Chemical Physics of Solids and Their Surfaces Volume 7** M. W. Roberts, 1978 Fundamental Aspects of Inert Gases in Solids S.E. Donnelly, J.H. Evans, 2013-12-20 The NATO Advanced Research Workshop on Fundamental Aspects of Inert Gases in Solids held at Bonas France from 16-22 September 1990 was the fifth in a series of meetings that have been held in this topic area since 1979 The Consultants Meeting in that year at Harwell on Rare Gas Behaviour in Metals and Ionic Solids was followed in 1982 by the Jilich International Symposium on Fundamental Aspects of Helium in Metals Two smaller meetings have followed a CECAM organised workshop on Helium Bubbles in Metals was held at Orsay France in 1986 while in February 1989 a Topical Symposium on Noble Gases in Metals was held in Las Vegas as part of the large TMS AIME Spring Meeting As is well known the dominating feature of inert gas atoms in most solids is their high heat of solution leading in most situations to an essentially zero solubility and gas atom precipitation In organising the workshop one particular aim was to target the researchers in the field of inert gas solid interactions from three different areas namely metals intermetallics and nuclear fuels in order to encourage and foster the cross fertilisation of approaches and ideas In these three material classes the behaviour of inert gases in metals has probably been most studied partly from technological considerations the effects of helium production via nuclear reactions during neutron irradiation are of importance particularly in a fusion reactor environment and partly from a more fundamental viewpoint *Positron Solid-state Physics* Werner Brandt, Società italiana di fisica, 1983 **Backscattering Spectrometry** Wei-Kan Chu, 2012-12-02 Backscattering Spectrometry reviews developments in backscattering spectrometry and covers topics ranging from instrumentation and experimental techniques to beam parameters and energy loss measurements Backscattering spectrometry of thin films is also considered and examples of

backscattering analysis are given This book is comprised of 10 chapters and begins with an introduction to backscattering spectrometry what it can and what it cannot accomplish and some rules of thumb for interpreting or reading spectra The relative strengths and weaknesses of backscattering spectrometry in the framework of materials analysis are outlined The following chapters focus on kinematics scattering cross sections energy loss and energy straggling backscattering analysis of thin films of various degrees of complications the influence of beam parameters and mass and depth resolutions and their relationships to the mass and energy of projectiles Many examples of backscattering analysis are also presented to illustrate the capability and limitation of backscattering Backscattering applications when combined with channeling effects are considered as well The final chapter provides a list of references on the applications of backscattering spectrometry This monograph will be a useful resource for physicists

Ion Beam Analysis H. H. Andersen, J. Böttiger, H.

Knudsen, 2017-01-31 Nuclear Instruments and Methods Volume 168 Ion Beam Analysis presents the proceedings of the Fourth International Conference on Ion Beam Analysis held in Aarhus Denmark on June 25-29 1979 This book provides information pertinent to the methods and applications ion beam analysis Organized into eight parts encompassing 95 chapters this volume begins with an overview of the straggling of energy loss for protons and alpha particles This text then examines the method for the calculation of the stopping of energetic ions in matter Other chapters consider the method for measuring relative stopping powers for light energetic ions in highly reactive materials This book discusses as well the stopping power and straggling of lithium ions with velocities around the Bohr velocity The final chapter deals with the adsorption behavior of different gases on monocrystalline platinum surfaces This book is a valuable resource for scientists technologists students and research workers
