prevention and therapies that can be patented and marketed all reflect a largely hidden history shaped by the Cold War Even the language we use to describe the disease such as the guiding metaphor for treatment fight fire with fire can be traced back to the middle of the twentieth century Writing in a lucid style Leopold documents the military governmental industrial and medical views of radiation and atomic energy to examine the postwar response to cancer through the prism of the Cold War She explores the role of radiation in cancer therapies today using case studies and mammogram screening in particular to highlight the surprising parallels Taking into account a wide array of disciplines this book challenges our understanding of cancer and how we approach its treatment Examines the postwar response to cancer through the prism of the Cold War Goes beyond medical science to look at the influence of Cold War policies on the way we think about cancer today Links the experience of postwar cancer patients with the broader evolution of what have become cancer industries Traces the history of human made radiation as a state sponsored environmental toxin
