Blake Scott, 2012-01-29 After World War II an unprecedented age of global development began The formation of the

World Bank and the International Monetary Fund allowed war torn and poverty stricken nations to become willing debtors in their desire to entice Western investment and trade New capital it was foretold would pave the way to political and economic stability and the benefits would trickle down to even the poorest citizens The hyperbole of this neocolonialism however has left many of these countries with nothing but compounded debt and unfulfilled promises The Megarhetorics of Global Development examines rhetorical strategies used by multinational corporations NGOs governments banks and others to further their own economic political or technological agendas These wide ranging case studies employ rhetorical theory globalization scholarship and analysis of cultural and historical dynamics to offer in depth critiques of development practices and their material effects By deconstructing megarhetorics at both the local and global level and following their paths of mobilization and diffusion the concepts of progress and growth can be reevaluated with the end goal of encouraging self sustaining and ethical outcomes

Marxism and Communication Studies Lee Artz, Steve Macek, Dana L. Cloud, 2006 There is a timely and urgent need for a reasoned dialogue reassessing how Marxism can advance the study of human communication and transform the social world in which it is embedded Indeed ongoing world historical events including the vigorously organized market globalization the corresponding insurgent global anticorporate movement and the conflicts engendered by the U S invasion of Iraq have underscored the importance of a thorough critique of global capitalism and its telecommunication technologies and practices This important new collection featuring essays by leading scholars and practitioners provides a much needed overview and assessment of Marxism's significance to contemporary thinking in communication and media studies Contributors demonstrate how a Marxist perspective can be usefully applied to specific case studies in communication providing valuable insights and understandings that are not obtainable using other approaches **The Battle Hymn of the Republic** John Stauffer, Benjamin Soskis, 2013-06-13 And yet the memory of the song's original role in bloody and divisive Civil War scuttled an attempt to make it the national anthem The Daughters of the Confederacy held a contest for new lyrics but admitted that none of the entries measured up to the power of the original The Battle Hymn has long helped to express what we mean when we talk about sacrifice about the importance of fighting in battles both real and allegorical for the values America represents It conjures up and confirms some of our most profound conceptions of national identity and purpose And yet as Stauffer and Soskis note the popularity of the song has not relieved it of the tensions present at its birth **Fractured**

A Responsive Rhetorical Art Elenore Long, 2018-10-24 A Responsive Rhetorical Art explores the risk ridden realm of wise if always also fallible rhetorical action the productive knowledge building required to compose and to leverage texts broadly construed for the purposes of public life marked by shrinking public resources cultural conflict and deferred hope Here composition and literacy learning hold an important and distinctive cultural promise the capacity to invent with other people new ways forward in light of their own interests and values and in the face of obstacles that could not have otherwise been predicted Distributed across publicly situated strangers including citizen educators this work engages a persistent challenge of early rhetorical uptake in public life that what might become public and shared is often tacit and contested The book s approach combines attention to local cases with a transnational student organization the Nipmuck Chaubunagungamaug and the South Sudanese diaspora in Phoenix with a revisable guide for taking up wise action and methods for uncovering elusive institutional logics

Longing for Justice Jennifer S. Simpson, 2014-11-05 A timely and persuasive argument for Higher Education s obligations to our democratic society Longing for Justice combines personal narrative with critical analysis to make the case for educational practices that connect to questions of democracy justice and the common good Jennifer S Simpson begins with three questions First what is the nature of the social contract that universities have with public life Second how might this social contract shape undergraduate education And third how do specific approaches to knowledge and undergraduate education inform how students understand society In a bold challenge to conventional wisdom about Higher Education Simpson argues that today s neoliberal educational norms foreground abstract concepts and leave the complications of real life especially the intricacies of power unexamined Analysing modern teaching techniques including service learning and civic engagement Simpson concludes that for Higher Education to serve democracy it must strengthen students abilities to critically analyse social issues recognize and challenge social inequities and pursue justice

Opposing Jim Crow Meredith L. Roman, 2019-12 Before the Nazis came to power in Germany Soviet officials labeled the United States the most racist country in the world Photographs children s stories films newspaper articles political education campaigns and court proceedings exposed the hypocrisy of America s racial democracy In contrast the Soviets represented the USSR itself as a superior society where racism was absent and identified African Americans as valued allies in resisting an imminent imperialist war against the first workers state Meredith L Roman s Opposing Jim Crow examines the period between 1928 and 1937 when the promotion of antiracism by party and trade union officials in Moscow became a priority policy Soviet leaders stood to gain considerable propagandistic value at home and abroad by drawing attention to U S racism their actions simultaneously directed attention to the routine violation of human rights that African Americans suffered as citizens of the United States Soviet policy also challenged the prevailing white

supremacist notion that blacks were biologically inferior and thus unworthy of equality with whites African Americans of various political and socioeconomic backgrounds became indispensable contributors to Soviet antiracism and helped officials in Moscow challenge the United States claim to be the world's beacon of democracy and freedom Rage + Hope Peter McLaren, 2006 Textbook

Rhetoric in American Anthropology Carine Risa Applegarth, 2014-05-30 In the early twentieth century the field of anthropology transformed itself from the welcoming science uniquely open to women people of color and amateurs into a professional science of culture The new field grew in rigor and prestige but excluded practitioners and methods that no longer fit a narrow standard of scientific legitimacy In *Rhetoric in American Anthropology* Risa Applegarth traces the rhetorical archeology of this transformation in the writings of early women anthropologists Applegarth examines the crucial role of ethnographic genres in determining scientific status and recovers the work of marginalized anthropologists who developed alternative forms of scientific writing Applegarth analyzes scores of ethnographic monographs to demonstrate how early anthropologists intensified the constraints of genre to define their community and limit the aims and methods of their science But in the 1920s and 1930s professional researchers sidelined by the academy persisted in challenging the field's boundaries developing unique rhetorical practices and experimenting with alternative genres that in turn greatly expanded the epistemology of the field Applegarth demonstrates how these writers folklore collections ethnographic novels and autobiographies of fieldwork experiences reopened debates over how scientific knowledge was made through what human relationships by what bodies and for what ends Linking early anthropologists ethnographic strategies to contemporary theories of rhetoric and composition *Rhetoric in American Anthropology* provides a fascinating account of the emergence of a new discipline and reveals powerful intersections among gender genre and science
