## **Radost Gordost I Grust:**

**Components of emotional meaning** Johnny J. R. Fontaine, Klaus R. Scherer, Cristina Soriano, 2013-08-01 Publications on emotion and the affective sciences in general have exploded in the last decade. Numerous research teams and individual scholars from many different disciplines have published research papers or books about many different aspects of emotions and their role in behaviour and society. However, one aspect of emotional research that has been somewhat neglected is the way in which emotional terms translate into other languages. When using terms like anger, sadness, fear, disgust, and joy for so-called basic emotions, as well as terms like shame, guilt, pride, regret, and contempt for more complex emotions, it is naturally assumed that the emotion terms used for research in the native language of the researchers and translated into English are completely equivalent in meaning. However, this is not generally the case. In many cases, there is no direct one-to-one relationship between an English term and a term in an alternative language. In fact, there can be significant differences in the way that these seemingly similar emotional terms can be applied across various languages with important implications for how we review and appraise this work. This book presents an extensive cross-cultural and cross-linguistic review of the meaning of emotion words, adopting a novel methodological approach. Based on the Component Process Model, the authors developed a new instrument to assess the meaning of emotion terms. This instrument, the GRID questionnaire, consists of a grid of 24 emotion terms spanning the emotion domain and 142 emotion features that operationalize five emotion components: Appraisals, Bodily reactions, Expressions, Action tendencies, and Feelings. For the operationalization of these five emotion components, very different emotion models from the Western and the cultural comparative emotion literature were taken into account. Components of Emotional Meaning includes contributions from psychological, cultural, comparative, and linguistic perspectives, demonstrating how this new instrument can be used to empirically study very different research questions on the meaning of emotion terms. The implications of the results for major theoretical debates on emotion are also discussed. For all researchers in the affective sciences, this book is an important new reference work. *Internet and Modern Society. Human-Computer Communication* Maxim Bakaev, Radomir Bolgov, Anna Chizhik, Andrei Chugunov, Yury Kabanov, Roberto Pereira, Elakkiya R, Wei Zhang, 2025-09-30 This book constitutes the proceedings of the 27th International Conference on Internet and Modern Society (IMS 2024) held in St. Petersburg, Russia, in June 24-26, 2024. The 29 full papers presented in this book were carefully reviewed and selected from 75 submissions. They are categorized into the following topical sections: Computational Linguistics, CompLing, Interactive Systems, Information Society Technologies, InterSys.

Trends in Soviet Theoretical Linguistics F. Kiefer, 2012-12-06. Theoretical linguistics is a term not very often used in Soviet Linguistics. The terms structural linguistics, mathematical linguistics, applied linguistics, which incidentally has another meaning here than in other parts of the world, all may cover theoretical work in linguistics. In older days, serious theoretical work was done under the heading machine translation. Very often the need for a special term for theoretically oriented

studies in linguistics does not even arise Does this mean that there is no real theoretical linguistics in the Soviet Union This would be of course a completely false conclusion Some linguists tend to identify theoretical linguistics with generative grammar Though it might be true and I am myself very much inclined to subscribe to this view that generative grammar has been the most fruitful linguistic theory up to now this does not justify however the above identification Incidentally as we shall see later on generative grammar has not been left unnoticed in the Soviet Union either There are different trends within theoretical linguistics one of which is generative grammar While generative grammar though one can worry about the content of this notion for many internal and external reasons seems to be the main theoretical trend in the United States and in Western Europe it represents only one of the main trends in Soviet linguistics      **Lexical Semantics** Юрий
