A Nation of Neighborhoods Benjamin Looker,2015-10-22

Despite the pundits who have written its epitaph and the latter day refugees who have fled its confines for the half acre suburban estate the city neighborhood has endured as an idea central to American culture In A Nation of Neighborhoods Benjamin Looker presents us with the city neighborhood as both an endless problem and a possibility Looker investigates the cultural social and political complexities of the idea of neighborhood in postwar America and how Americans grappled with vast changes in their urban spaces from World War II to the Reagan era In the face of urban decline competing visions of the city neighborhood s significance and purpose became proxies for broader debates over the meaning and limits of American democracy By studying the way these contests unfolded across a startling variety of genres Broadway shows radio plays urban ethnographies real estate documents and even children s programming Looker shows that the neighborhood ideal has functioned as a central symbolic site for advancing and debating theories about American national identity and democratic practice

Depression Ethan Blue,2014-11-22 As banks crashed belts tightened and cupboards emptied across the country American prisons grew fat Doing Time in the Depression tells the story of the 1930s as seen from the cell blocks and cotton fields of Texas and California prisons state institutions that held growing numbers of working people from around the country and the world overwhelmingly poor disproportionately non white and displaced by economic crisis Ethan Blue paints a vivid portrait of everyday life inside Texas and California s penal systems Each element of prison life from numbing boredom to hard labor from meager pleasure in popular culture to crushing pain from illness or violence demonstrated a contest between keepers and the kept From the moment they arrived to the day they would leave inmates struggled over the meanings of race and manhood power and poverty and of the state itself In this richly layered account Blue compellingly argues that punishment in California and Texas played a critical role in producing a distinctive set of class race and gender identities in the 1930s some of which reinforced the social hierarchies and ideologies of New Deal America and others of which undercut and troubled the established social order He reveals the underside of the modern state in two very different prison systems and the making of grim institutions whose power would only grow across the century **Who Hears Here?** Guthrie P.
