Hutton, Rebecca M. Brown, 2016-10-04 Place plays a fundamental role in the structuring of the discipline of Art History And yet place also limits the questions art historians can ask and impairs analysis of objects and locations in the interstices of established ossified categories The chapters in this interdisciplinary volume investigate place in all of its dynamism and complexity several call into question traditional constructions regarding place in Art History while others explore the fundamental role that place plays in lived experience The particular nexus for this collection lies at the intersection and overlap of two major subfields in the history of art South Asia and the Islamic world both of which are seemingly geographically determined yet at the same time uncategorizable as place with their ever shifting and contested borders The eleven chapters brought together here move from the early modern through to the contemporary and span particular monuments and locations ranging from Asia and Europe to Africa and the Americas The chapters take on the question of place as it operates in more obvious settings such as architectural monuments and exhibitionary contexts while also probing the way place operates when objects move or when the very place they exist in transforms dramatically This volume engages place through the movement of objects the evocation of senses desires and memories and the on going project of articulating the parameters of place and location **Africa's Geography** Benjamin Ofori-Amoah, 2019-04-30 Africa's Geography presents a comprehensive exploration of the world's second largest and most culturally diverse continent Author Benjamin Ofori Amoah challenges common misconceptions and misrepresentations of Africa from a geographical perspective

Patricia 'Iolana, Samuel Tongue, 2011-01-18 As individuals we have the ability although not always the opportunity to create our own paradigmatic image of the Divine moreover as a society we can alter transform or even replace those paradigms Progressive movements exist in nearly every faith tradition moving towards the future of our world and our belief systems these movements include both radical and reformist thinkers and they are challenging the lenses that we employ to image worship connect with and understand the Divine With so many possible interpretations and paradigms competing for social acceptance and support the choice must be made carefully and wisely bearing in mind the inevitability of change whilst remaining open to pluralities of thought and practice This is especially important when it comes to the future of theology and religious studies in particular to the relations between the various global faith traditions In Testing the Boundaries ten scholars explore the praxis of faith including our image of Self in relation to the Divine our relation to the religious Other our struggle for religious identity in new locales the limits of language and translations in sacred texts our responsibility to nature our nomadic and transitory tendencies traditions in the academy and our interreligious relationships They test the boundaries of traditional theology and their interdisciplinary fields dancing in the liminal space where possibilities gather

White Terror Jamie Bisher,2006-01-16 This is the gripping story of a forgotten Russia in turmoil when the line between government and organized crime blurred into a chaotic continuum of kleptocracy vengeance and sadism It tells the tale of how in the last days of 1917 a fugitive Cossack captain bravely led seven cohorts into a mutinous garrison at Manchuli a squalid bordertown on Russia s frontier with Manchuria The garrison had gone Red revolted against its officers and become a dangerous ill disciplined mob Nevertheless Cossack Captain Grigori Semionov cleverly harangued the garrison into laying down its arms and boarding a train that carried it back into the Bolsheviks tenuous territory Through such bold action Semionov and a handful of young Cossack brethren established themselves as the warlords of Eastern Siberia and Russia s Pacific maritime provinces during the next bloody year Like inland pirates they menaced the Trans Siberian Railroad with fleets of armoured trains Cossack cavalry mercenaries and pressgang cannon fodder They undermined Admiral Kolchak s White armies ruthlessly liquidated all Reds terrorized the population sold out to the Japanese and antagonized the American Expeditionary Force and Czech Legion in a frenzied orchestration of the Russian Empire s gotterdammerung Historians have long recognized that Ataman Semionov and Company were a nasty lot This book details precisely how nasty they were The Outcasts of Melbourne Graeme Davison,2020-07-29 Behind the glittering image of Marvellous Melbourne there existed in the popular imagination another very different picture of the colonial metropolis This was the city of low life of crowded slums poverty disease and vice The

nine essays in *The Outcasts of Melbourne* attempt to reveal the social realities behind this picture. They include new accounts of the forces which created the city's physical environment. They show how perceptions of a city can be shaped by campaigning journalists, artists and writers. They present collective portraits of the poor and the criminal classes and of those who set out to save them. They describe how the city's guardians, the police, public health authorities and charity workers responded to the challenge of the slums. By imaginative use of the rich deposits in the public records, these explorations in social history present new ways of documenting the lives of people whose daily activities were seldom reported in the popular press. In doing so, they also map the chains of causation which link the actions of individuals appearing before a committee of a benevolent society, getting arrested, evangelising at a Salvation Army rally, to the social forces which have shaped the cities in which we live. An Historical Geography of Peiping Renzhi Hou, 2014-07-07 This book is about the city of Peiping in China, also known as Beijing and Peking, and a city of great historical significance. Divided into three parts, this work explores Peiping first as a frontier city at a time when the Great Wall was established from the Chou dynasty ca 1122-220 B.C. until the Tang Dynasties up to the Khitan Occupation A.D. 590-937. The second part explores Peiping as it becomes a national centre through the Liao Dynasty and the Chin Dynasty until 1234, and the third part explores how it became the capital of the Chinese empire until 1911. This work is a historical geography and the introduction details topographical features and geographical relations of the city, describing the way in which the mountains rise from the plain, creating concave arms to enclose Peiping, leading to the name, the Bay of Peiping. We learn that the mountains frequently reach over 3000ft and have practically no foot hills, whilst the bay itself is filled with sediments of gravel, sand, loam and loess which have been deposited in horizontal strata to a great depth. Numerous illustrations and figures are included, and readers will see how the city sits between two rivers, the Hun or Muddy River and the Pai or White River. These chapters reveal how each river has made its contribution to the material development of the city and its environs, including through irrigation, and as the Hun River shifted its course. Owing to the geography of the region, almost all roads leading from the northern lands of Mongolia and Manchuria to the great plain of North China in the south are bound to converge at Peiping. The historical consequences of this, as well as local climate conditions and other aspects of geography, are explored in this book, which traces the historical rise to eminence of Peiping.
