The Hardest Lot of Men Joseph C. Fitzharris, 2019-09-05 Outstanding in appearance discipline and precision at drill the Third Minnesota Volunteer Infantry was often mistaken for a regular army unit Rebel Colonel Ponder described the regiment as the hardest lot of men he d ever run against Betrayed by its higher commanders the Third Minnesota was surrendered to Nathan Bedford Forrest on July 13 1862 in Murfreesboro Tennessee Through letters personal accounts of the men and other sources author Joseph C Fitzharris recounts how the Minnesotans prisoners of war broken in spirit and morale went home and found redemption and renewed purpose fighting the Dakota Indians They were then sent south to fight guerrillas along the Tennessee River In the process the regiment was forged anew as a superbly drilled and disciplined unit that participated in the siege of Vicksburg and in the Arkansas Expedition that took Little Rock At Pine Bluff Arkansas sickness so reduced its numbers that the Third was twice unable to muster enough men to bury its own dead but the men never wavered in battle In both Tennessee and Arkansas the Minnesotans actively supported the U S Colored Troops USCT and provided many officers for USCT units *The Hardest Lot of Men* follows the Third through occupation to war s end when the returning men deeming the citizens of St Paul insufficiently appreciative spurned a celebration in their honor In this first full account of the regiment Fitzharris brings to light the true story long obscured by the official histories illustrating aspects of a nineteenth century soldier s life enlisted and commissioned alike from recruitment and training to the rigors of active duty *The Hardest Lot of Men* gives us an authentic picture of the Third Minnesota at once both singular and representative of its historical moment

Riverine Dreams George Frazier, 2025-10-03 The inspirational story of grassland rivers and the people who paddle and protect them The North American grasslands that once covered vast areas of the central United States are now our most endangered ecosystems But not far from any spot in the grasslands is a river Grassland rivers are as central to the story of prairies as bison and bluestem Defined as rivers that drain prairie watersheds these waterways are crucial to plains ecosystems and no less endangered than the grasslands surrounding them They are also enigmatic some are restricted by local access laws and others have simply been forgotten In any given year fewer than a dozen people might lay eyes on tens of thousands of miles of America s grassland rivers But as environmental writer George Frazier shows following their twists and turns is one of the best ways to experience the wild essence of the prairies *Riverine Dreams* invites us on a trip along eight grassland rivers including the Missouri the Niobrara and Purgatoire traversing their environmental and cultural histories and introducing us to the people who study paddle and conserve them This journey takes Frazier across the North American interior from Montana and Colorado to Nebraska and Missouri where he uncovers a remarkable movement to celebrate and preserve these natural treasures nothing less than a grassland river revival The first accessible introduction to these waters *Riverine Dreams* is a personal exploration of the rivers that are so vital to the health of the prairies *Natural History Transactions of Northumberland, Durham, and Newcastle-upon-Tyne* Natural History Society of Northumberland,

They are also among the most threatened ecosystems on the continent and have been dramatically altered as a result of human activities and climate change. Vegetation of Australian Riverine Landscapes brings together for the first time the results of the substantial amount of research that has been conducted over the last few decades into the biology, ecology and management of these important plant communities in Australia. The book is divided into four sections. The first section provides context with respect to the spatial and temporal dimensions of riverine landscapes in Australia. The second section examines key groups of riverine plants while the third section provides an overview of riverine vegetation in five major regions of Australia including patterns, significant threats and management. The final section explores critical issues associated with the conservation and management of riverine plants and vegetation including water management, salinity, fire and restoration. Vegetation of Australian Riverine Landscapes highlights the incredible diversity and dynamic nature of riverine vegetation across Australia and will be an excellent reference for researchers, academics and environmental consultants Natural History Transactions of Northumberland and Durham Natural History Society of Northumberland, Durham, and Newcastle-upon-Tyne, 1880 **Where There Are Mountains** Donald Edward Davis, 2011-03-15 A timely study of change in a complex environment. Where There Are Mountains explores the relationship between human inhabitants of the southern Appalachians and their environment. Incorporating a wide variety of disciplines in the natural and social sciences, the study draws information from several viewpoints and spans more than four hundred years of geological, ecological, anthropological and historical development in the Appalachian region. The book begins with a description of the indigenous Mississippian culture in 1500 and ends with the destructive effects of industrial logging and dam building during the first three decades of the twentieth century. Donald Edward Davis discusses the degradation of the southern Appalachians on a number of levels from the general effects of settlement and industry to the extinction of the American chestnut due to blight and logging in the early 1900s. This portrait of environmental destruction is echoed by the human struggle to survive in one of our nation's poorest areas. The farming, livestock raising, dam building and pearl and logging industries that have gradually destroyed this region have also been the livelihood of the Appalachian people. The author explores the sometimes conflicting needs of humans and nature in the mountains while presenting impressive and comprehensive research on the increasingly threatened environment of the southern Appalachians **Proceedings of the Dorset Natural History and Antiquarian Field Club** Dorset Natural History and Archaeological Society, 1898 List of members in each volume *Bulletin of the*

A Sailor's History of the U.S. Navy Thomas J Cutler, 2005-01-15 Today's sailors have too little appreciation of their heritage To counter this problem Thomas J Cutler has compiled a history of our naval heritage in the form of A Sailor's History of the U S Navy The work is unique in two important ways First it is written thematically rather than chronologically This allows recent history to be blended with more distant but important events in ways that will reinforce the timelessness as well as the timeliness of the U S Navy thereby having a greater appeal to today's sailor There are a number of themes being used the most obvious are manifested in chapters with the themes of honor courage and commitment but others serve as useful vehicles as well for example there is a chapter called What's in a Name that briefly discusses how ships have been named and then uses the many ships that have carried the name Enterprise as the theme for presenting significant portions of the Navy's history The other unique characteristic of this history is that it

focuses wherever possible on the roles of ALL sailors rather than just the officers That is not to say that Jones and Decatur are not there but that the emphasis is along the lines of the crew of the Bon Homme Richard fought on into the night rather than Jones fought Also there are plenty of individual sailor heroes who can stand alongside the Perrys and the Farraguts Boatswain s Mate First Class Williams who won the Medal of Honor in Vietnam Dorie Miller of Pearl Harbor fame Gunner s Mate Third Class Paul Henry Carr at the battle off Samar etc Some emphasis upon what it was like to be a sailor working and living conditions at different times is included as well **Humans as Geologic Agents** Judy Ehlen,William C.
