Paus, 2005-10-13 This book engages the question hotly debated among theorists and policymakers alike of how a developing country's pursuit of foreign direct investment FDI affects its development prospects in a globalized world Can small latecomers to economic development use high tech FDI to rapidly expand indigenous capabilities thus shortcutting stages of the industrialization process What conditions economic and non economic must be met for this strategy to succeed Using the cases of Ireland and Costa Rica the author shows how the dynamics of the FDI development nexus have changed over time rendering problematic Costa Rica's attempt and those of other latecomers to replicate the Celtic Tiger's success story
