Road User Charges In Central America:

Road User Charges in Central America Anthony A. Churchill, 1972 The application of the principles of pricing of road user services to Central America is described If the maximum net benefit from the highway network is to be achieved the correct price to be charged users is a price equal to the cost of the resources used up when the journey is made An attempt is made to estimate the variable maintenance costs generated by vehicles using uncongested highways Current charges are in considerable excess of the economic costs of using uncongested highways A high degree of congestion exists in all major Central American cities Failure to reflect this congestion in the costs of using urban streets is rapidly leading to an intolerable situation A general recommendation is made that road user charges be reduced in rural areas and increased in urban areas Gasoline taxes import duties and general license fees could be lowered at the same time as urban congestion charges and diesel taxes are raised Excessive border crossing procedures should be eliminated Data that should be collected in order to facilitate transport decision making should include traffic counts velocity studies freight rates maintenance costs for select road sections and post investment studies *Optimal User Charges and Cost Recovery for Roads in Developing Countries* Ian Graeme Heggie, Vincy Fon, 1991 What impact do road user charges have on cost recovery And when they fail to cover total costs how should the resulting deficit be financed **Central America Integrat** Royce Q. Shaw, 2019-04-09 This study challenges several widely held assumptions about Central American economic integration arguing that the key to understanding the failure of the integration program lies in neither advanced economic nor regional integration theory but in the domestic politics of the states involved Thus the author contends that the Common Market was not the cause of the balance of payments and balanced growth crises in Central America rather domestic political forces were the major factor in the collapse of the market and the subsequent attempts at restructuring Professor Shaw disputes the standard interpretations of the role of the technocrats in the integration process and demonstrates that the domestic political elites played an important role throughout He also challenges the assumption that economic integration is always a force for conciliation pointing out that the Common Market aggravated some of the conflicts that led to war between El Salvador and Honduras in 1969 Nor are integration programs among less developed countries necessarily instruments of political and social change according to this analysis on the contrary political elites used the Common Market to bypass the internal economic reforms necessary for national development This study incorporates new material interview data and other primary source material on events of the past eight years *Are Ghana's Roads Paying Their Way?* Reuben Gronau, 1991 The study of road use costs in Ghana showed first that such studies are in fact feasible in LDCs notwithstanding gaps in the data and second that they can reveal important inefficiencies in the tax system **Road User Charges in Central America** Anthony Churchill, World Bank, 1972 *Commercial Management and Financing of Roads* Ian Graeme Heggie, Piers Vickers, 1998-01-01 Printed on Demand Limited stock is held for this title If you would like to order 30 copies or more please
