Wells** David C. Smith,2021-04-07 This collection of H G Wells s correspondence draws on over 50 archives and libraries worldwide including the papers of Wells s daughter by Amber Reeves The book contains over 2 000 letters and while a few are business to publishers agents and secretaries the majority are much more personal Wells s private correspondence extends from letters to President Franklin Roosevelt and Prime Ministers Winston Churchill and A J Balfour to persons such as Mark Benney who wrote novels based on his life in the slums and his time in prison There is correspondence too with his many female friends and lovers among them Rebecca West Eileen Power Gertrude Stein Marie Stopes Lilah MacCarthy and Dorothy Richardson For example a letter from Moura Budberg with whom Wells had a long standing affair which announces that she is pregnant by him and about to have an abortion reveals how an advocate of birth control is himself caught out Wells also enjoyed correspondence with the press particularly during the two World Wars and with various BBC officials and people who worked on his films Some of his letters on the controversies of free love socialism birth control the Fabian Society and the nature of the curriculum of the new London University in the 1890s are included Interspersed chronologically with Wells s letters is a small selection of about 40 letters to Wells where letters from him are not extant Among these are letters from Ray Lankester Joseph Conrad C G Jung Trotsky Hedy Gattarnigg the woman who attempted suicide in Wells s flat and J C Smuts The letters are arranged in these periods Volume 1 1878 1900 Volume 2 1901 1912 Volume 3 1913 1930 and Volume 4 1930 1946 H G Wells s works include The Time Machine 1895 The Invisible Man 1897 The War of the Worlds 1898 The History of Mr Polly 1910 and A Short History of the World 1922 European Integration Since the 1920s Mark Hewitson,2024-10-14 Brexit populism and Euroscepticism seem to have challenged old assumptions about European integration and raised the prospect of disintegration This book re examines why the European Union and its forerunners were created and investigates how and why they have changed It links contemporary events to historical explanation arguing that there were long term sets of conditions dating back to the 1920s which pushed European governments to cooperate economically and to try to resolve their diplomatic differences The failure of the French and German governments to create what Aristide Briand had called a European federal union demonstrated both the precariousness of the enterprise and its connection to the domestic politics of European states After 1945 the unexpected advent of a Cold War and the military diplomatic and economic presence of the United States in Europe facilitated the gradual development of habits of cooperation and institutional integration but they also placed limits on European governments activities as did disagreements between political parties and the expectations of

citizens As a consequence supranational bodies such as the European Commission have been accompanied and often overshadowed by intergovernmental institutions such as the European Council with the EU as a whole functioning in important respects as a type of confederation The volume addresses a series of large scale historical questions which are integral to an understanding of the European Union It asks how and why citizens of member states have identified with the EU how matters of security affected the development of the European Community during and after the Cold War whether economic and social convergence have taken place and with what consequences and why European institutions have come to function as they have The study is thematic focusing on the most important aspects of European integration and explaining why member states have decided to carry out or have consented to the unique experiment of the European Union

**Formation of Periodical Authorship in 1920s Korea** Jae-Yon Lee, 2023-06-06 Formation of Periodical Authorship in 1920s Korea argues that Korean authors who entered the literary scene during modern literature s formative years were the subject mediated by periodicals However it has been difficult to substantiate this statement because periodicals including magazines were open to different groups of writers various social literary religious and cultural discourses and dissimilar genres The multi level interactions between terms knowledge and writing styles in circulation unfolded at a larger scale at some times and at other times in such an ordinary manner that one can hardly identify and synthesize them to make any sense Employing not only conventional close reading but also modes of distant reading developing out of cultural analytics Lee investigates the specific ways in which patterns of social semantic and stylistic interactions in Korea s major magazines configured three kinds of authorship namely the narcissistic author the prophetic critic and the everyday reviewer He rereads artist stories leftist social discourses religious cosmology and joint reviews through quantitative analyses and offers an engaging account on the importance of repetitions in creating literary originality This book extends periodical studies through cultural analytics and opens up a new horizon for the next generation of literary scholars seeking innovative experiments in a digital age

Popular Perceptions of Soviet Politics in the 1920s O. Velikanova,2013-01-28 This is the first study of popular opinions in Soviet society in the 1920s These voices which made the Russian revolution characterize reactions to mobilization politics patriotic militarizing campaigns the tenth anniversary of the revolution and state attempts to unite the nation around a new Soviet identity *The Making of the New Deal Democrats* Gerald H. Gamm,1989-08-30 Why is The Making of New Deal Democrats so significant One of the major controversies in the study of American elections has to do with the nature of electoral realignments One school argues that a realignment involves a major shift of voters from one party to another while another school argues that the process consists largely of mobilization of previously inactive voters The debate is crucial for understanding the nature of the New Deal realignment Almost all previous work on the subject has dealt with large scale national patterns which make it difficult to pin down the precise processes by which the alignment took place Gamm s work is most remarkable in that it is a close analysis of shifting voter alignments on the precinct and block level in the city of

Boston His extremely detailed and painstaking work of isolating homogeneous ethnic units over a twenty year period allows one to trace the voting behavior of the particular ethnic groups that ultimately formed the core of the New Deal realignment
