Amazing Machines: Tough Trucks Tony Mitton / Ant Parker, *Breaking the Chains of Gravity* Amy Shira Teitel, 2015-10-22. The incredible story of spaceflight before the establishment of NASA. NASA's history is a familiar story, one that typically peaks with Neil Armstrong taking his small step on the Moon in 1969. But America's space agency wasn't created in a vacuum. It was assembled from pre-existing parts, drawing together some of the best minds the non-Soviet world had to offer. In the 1930s, rockets were all the rage in Germany, the focus both of scientists hoping to fly into space and of the German armed forces looking to circumvent the restrictions of the Treaty of Versailles. One of the key figures in this period was Wernher von Braun, an engineer who designed the rockets that became the devastating V-2. As the war came to its chaotic conclusion, von Braun escaped from the ruins of Nazi Germany and was taken to America, where he began developing missiles for the US Army. Meanwhile, the US Air Force was looking ahead to a time when men would fly in space, and test pilots like Neil Armstrong were flying cutting-edge rocket-powered aircraft in the thin upper atmosphere. *Breaking the Chains of Gravity* tells the story of America's nascent space program, its scientific advances, its personalities, and the rivalries it caused between the various arms of the US military. At this point, getting a man in space became a national imperative, leading to the creation of the National Aeronautics and Space Administration, otherwise known as NASA.

The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. *Beyond the Windswept Dunes* Elizabeth B. Sherman, 2003. The first book to document the maritime history of the port city of Muskegon, combining historical detail and good storytelling. *Beyond the Windswept Dunes* takes the reader into a world of maritime adventure as it was experienced by the sailors, passengers, rescue workers, shipping magnates, industrialists, and many other people whose livelihoods revolved around Michigan's port city of Muskegon. At one time, the leading edge of westward expansion, Muskegon was a place where lumbering and lakers merged, and where rails met decks, a place situated midway along the coast of a great and sometimes stormy inland sea. Here, Elizabeth Sherman offers both a shipping history and a portrait of the city. The events covered range from the visit by the British sloop H.M.S. *Felicity* in 1779 through Muskegon's boom years as Lumber Queen of the World, from the city's revitalization with the opening of the St. Lawrence Seaway to its recent establishment of a floating museum complex for historic naval vessels. The book's focus is on the ships themselves, such as the Lyman M. Davis Salvor Highway 16

and Milwaukee Clipper vessels that were noteworthy for being the first of their kind or for their popularity unusual and distinctive careers or tragic losses A number of ships were lost in Lake Michigan near Muskegon Harbor and the stories of some of the most notable wrecks and rescue missions appear in this book including the psychic intervention that led the William Nelson to the exciting rescue of the crew aboard the sinking Our Son The book offers many first hand statements of shipwreck survivors and other witnesses lending an authentic voice to the accounts The Chronicles of a Gay Gordon
