Creating a successful sculpture requires an imaginative concept and a sound design that utilize the potential and avoid the limitations of the material and the process used in making it Prior to a few decades ago most sculptors were restricted to carving stone and wood or casting plaster ceramics and bronze for their creations Contemporary sculptors however are no longer bound by the limitations of these traditional materials and processes and can now create works in sizes forms and textures that could not have been achieved previously Many modern sculptures are now made from materials ranging from steel and aluminum to plastics and composites using processes ranging from welding and adhesive bonding to molding and 3D printing To fully utilize the full potential of such new materials the sculptor needs to understand their points of strength their limitations and the most effective way of shaping them to achieve a given design Although this book is written by a materials engineer the subject matter is presented from the point of view of the sculptor with emphasis on the strengths and weaknesses of different materials their resistance to weather conditions natural color and possible surface textures possible methods of shaping and joining tools and equipment needed and safety measures to take Whenever possible case studies are used to illustrate the sequence of processes and the cost elements involved in shaping a given material to create an actual work of sculpture      **Metal Sculptures** Everett Sinclair,2025-03-21

**Sculpture in Gotham** Michele H. Bogart, 2018-04-15 Public sculpture is a major

draw in today's cities and nowhere is this more the case than in New York. In the Big Apple urban art has become synonymous with the municipal brand highlighting the metropolis as vibrant, creative, tolerant, orderly and above all safe. Sculpture in Gotham tells the story of how the City of New York came to be committed to public art patronage beginning in the mid 1960s. In that era of political turbulence, cultural activists and city officials for a time shifted away from traditional monuments, joining forces to sponsor ambitious sculptural projects as an instrument for urban revitalization. Focusing on specific people, agencies and organizations and both temporary and permanent projects from the 1960s forward, Michele H. Bogart reveals the changing forms and meanings of municipal public art. Sculpture in Gotham illustrates how such shifts came about at a time when art theories and styles were morphing markedly and when municipalities were reeling from racial unrest, economic decline and countercultural challenges to culture as well as the state. While sculptural installations on New York City property took time and were not without controversy, Gotham's processes and policies produced notable results providing precedents and lessons for cities the world over. *Sculpture* Cleo Kuhtz, 2016-07-15. Looking at a work of art like listening to music becomes a rewarding experience only if the senses are alert to the qualities of the work and to the artist's purpose that brought them into being. The language of sculpture must be learned. In this in-depth study, readers examine the materials, tools, methods, styles and practices that are involved in sculpting and many of the techniques that have been used by accomplished artists who have contributed to sculpture as a fine art from the marble gods of Phidias to the mobiles by Alexander Calder. With over 150 monuments, Richmond ranks among the nation's best cities in devotion to its past, its leaders and its famous citizens. But the storied history of Virginia's capital extends far beyond its most famous figures. Whether memorializing the captivating stories of famous Richmonders Nina Abady and Sam Woods celebrating the life of Bill Bojangles Robinson or honoring the achievements of prominent medical leaders, public art in Richmond is a testament to the perseverance and ingenuity of the city and its people. Journey into times past with author Robert Layton as he uncovers the enthralling history of Richmond through its often overlooked monuments. **Constructions of Media Authorship** Christiane Heibach, Angela Krewani, Irene Schütze, 2020-11-23. The author is dead, long live the author. This paradox has shaped discussions on authorship since at least the 1960s when the dominant notion of the individual author-genius was first critically questioned. The ongoing discussion has mainly focused on literature and the arts but has ignored nearly any artistic practice beyond these two fields. *Constructions of Media Authorship* aims to fill this gap; the volume's interdisciplinary contributions reflect historical and current artistic practices within various media and attempt to grasp them from different

perspectives The first part sheds a new light on different artistic and design practices and questions the still dominant view on the individual identifiable author The second part discusses creative practices in literature emphasizing the interrelation of aesthetic discourses and media practices The third part investigates authoring in audiovisual media especially film and TV while the final part turns to electronic and digital media and their collective creativity and hybrid mediality The volume is also an attempt to develop new methodological approaches focusing on the interplay between various human and non human actors in different media constellations
