Studies on the Derveni Papyrus, volume II Glenn W. Most,2022-09-01 Studies on the Derveni Papyrus volume II brings

together two new editions of the first fragmentarily extant columns of the Derveni Papyrus and seven scholarly articles devoted to their interpretation. The Derveni Papyrus is by far the most important textual discovery of the 20th century regarding early Greek philosophy, religion, exegetical theory and practice, linguistic ideas and a host of other areas and issues. But the editorial and interpretative history of this extraordinary document has been very checkered. While the interpretation of the better preserved later columns is still highly controversial in many regards, at least the text of those columns has by and large found a scholarly consensus, but the editorial and interpretative situation with the worse preserved first columns is quite different. This volume offers not one but two editions of the first columns by Richard Janko and by Valeria Piano, given that it is not currently possible to agree upon a single edition and it explains clearly and in detail the papyrological problems and doubts that lead to these two editions, making it possible for readers, even non papyrologists, to form their own informed judgment about the most likely readings to be adopted. Furthermore, it contains a number of articles by leading scholars on the Derveni Papyrus, above all offering original solutions to the question of the relation between the earlier and the later columns, but also providing analysis and interpretation of other related problems.

Architecture of the Sacred Bonna D. Wescoat, Robert G. Ousterhout, 2014-10-13. In this book, a distinguished team of authors explores the way space, place, architecture and ritual interact to construct sacred experience in the historical cultures of the eastern Mediterranean. Essays address fundamental issues and features that enable buildings to perform as spiritually transformative spaces in ancient Greek, Roman, Jewish, early Christian and Byzantine civilizations. Collectively, they demonstrate the multiple ways in which works of architecture and their settings were active agents in the ritual process. Architecture did not merely host events; rather, it magnified and elevated them, interacting with rituals, facilitating the construction of ceremony. This book examines comparatively the ways in which ideas and

situations generated by the interaction of place built environment ritual action and memory contributed to the cultural formulation of the sacred experience in different religious faiths
