Reading the Reverse Face of Reims Cathedral Donna L. Sadler, 2017-07-05 Though long recognized as one of the most beautiful works from the second half of the thirteenth century, the magnificent sculptural program of the reverse face at Reims Cathedral has received little in the way of scholarly attention. Interpreting the iconography in the light of Latin texts associated with the building, its history, and its ceremonial use, Donna Sadler assesses the significance of the reverse face in light of other thirteenth-century visual programs associated with the court of Louis IX. The book's chapters deal with the history of the cathedral and its architectural antecedents, the iconographic message of the visual program, the meaning of the reverse face, and how it intersects with the overall iconography, the function of the verso, and how it is enhanced by the marriage of form and content, and a consideration of contemporary works linked to the court of Saint Louis, concluding with a brief look at the new roles sculpture assumes as it migrates inside cathedrals. Ultimately, this book reveals how the imagery on the reverse face not only conforms to a system of memory and mode of medieval narratology but also articulates a dominant ideological position regarding the interdependence of ecclesiastical and royal powers.

*"Agency, Visuality and Society at the Chartreuse de Champmol"* Sherry C. M. Lindquist, 2017-07-05 Grounded in archival sources, this interdisciplinary study explores the profound historical significance of the mausoleum of the Valois Dukes of Burgundy, the Chartreuse de Champmol. Although the monument is well known as the site of pivotal works of art by Claus Sluter, Melchior Broederlam, Jean de Beaumetz, and others, until now art historians have not considered how these works functioned at the center of a complex social matrix. Sherry Lindquist here considers the sacred subjects of the various sculptures and paintings not merely as devotional tools or theological statements but as profoundly influential social instruments that negotiated complex interactions of power. Lindquist's sophisticated discussion coordinates analysis of primary sources with the most up-to-date scholarship in the field of art history, not only with respect to late medieval Burgundian art but also to more theoretical questions pertaining to reception.
