Star Gods of the Maya Susan Milbrath, 2010-01-01 A prodigious work of unmatched interdisciplinary scholarship on Maya astronomy and religion. Journal of Interdisciplinary History. Observations of the sun, moon, planets, and stars played a central role in ancient Maya lifeways as they do today among contemporary Maya who maintain the traditional ways. This pathfinding book reconstructs ancient Maya astronomy and cosmology through the astronomical information encoded in Pre-Columbian Maya art and confirmed by the current practices of living Maya peoples. Susan Milbrath opens the book with a discussion of modern Maya beliefs about astronomy along with essential information on naked-eye observation. She devotes subsequent chapters to Pre-Columbian astronomical imagery which she traces back through time starting from the Colonial and Postclassic eras. She delves into many aspects of the Maya astronomical images including the major astronomical gods and their associated glyphs, astronomical almanacs in the Maya codices, and changes in the imagery of the heavens over time. This investigation yields new data and a new synthesis of information about the specific astronomical events and cycles recorded in Maya art and architecture. Indeed, it constitutes the first major study of the relationship between art and astronomy in ancient Maya culture. Milbrath has given us a comprehensive reference work that facilitates access to a very broad and varied body of literature spanning several disciplines. *Isis*. Destined to become a standard reference work on Maya archaeoastronomy. Utterly comprehensive. Andrea Stone, Professor of Art History, University of Wisconsin-Milwaukee.

Death and the Classic Maya Kings James L. Fitzsimmons, 2009-01-01 Like their regal counterparts in societies around the globe, ancient Maya rulers departed this world with elaborate burial ceremonies and lavish grave goods which often included ceramics, red pigments, earflares, stingray spines, jades, pearls, obsidian blades, and mosaics. Archaeological investigation of these burials, as well as the decipherment of inscriptions that record Maya rulers' funerary rites, have opened a fascinating window on how the ancient Maya envisaged the ruler's passage from the world of the living to the realm of the ancestors. Focusing on the Classic Period (AD 250-900), James Fitzsimmons examines and compares textual and archaeological evidence for rites of death and burial in the Maya lowlands from which he creates models of royal Maya funerary behavior. Exploring ancient Maya attitudes toward death expressed at well-known sites such as Tikal, Guatemala, and Copan, Honduras, as well as less explored archaeological locations, Fitzsimmons reconstructs royal mortuary rites and expands our understanding of key Maya concepts including the afterlife and ancestor veneration.

The Memory of Bones Stephen D. Houston, Stuart David, Karl Taube, 2013-05-01 An analysis of the intellectual and emotional life of ancient Mesoamerican people through studies of figural works and inscriptions. All of human experience flows from bodies that feel, express emotion, and think about what such experiences mean. But is it possible for us, embodied as we are in a particular time and place, to know how people of long ago thought about the body and its experiences? In this groundbreaking book, three leading experts on the Classic Maya (ca. AD 250 to 850) marshal a vast array of evidence from Maya iconography and hieroglyphic writing as well as

archaeological findings to argue that the Classic Maya developed an approach to the human body that we can recover and understand today Starting with a cartography of the Maya body as depicted in imagery and texts the authors explore how the body was replicated in portraiture how it experienced the world through ingestion the senses and the emotions how the body experienced war and sacrifice and the pain and sexuality how words often heaven sent could be embodied and how bodies could be blurred through spirit possession From these investigations the authors convincingly demonstrate that the Maya conceptualized the body in varying roles as a metaphor of time as a gendered sexualized being in distinct stages of life as an instrument of honor and dishonor as a vehicle for communication and consumption as an exemplification of beauty and ugliness and as a dancer and song maker Their findings open a new avenue for empathetically understanding the ancient Maya as living human beings who experienced the world as we do through the body

Maya Imagery, Architecture, and Activity Kaylee R. Spencer, Maline D. Werness-Rude, 2015-05-01 Maya Imagery Architecture and Activity privileges art historical perspectives in addressing the ways the ancient Maya organized manipulated created interacted with and conceived of the world around them The Maya provide a particularly strong example of the ways in which the built and imaged environment are intentionally oriented relative to political religious economic and other spatial constructs In examining space the contributors of this volume demonstrate the core interrelationships inherent in a wide variety of places and spaces both concrete and abstract They explore the links between spatial order and cosmic order and the possibility that such connections have sociopolitical consequences This book will prove useful not just to Mayanists but to art historians in other fields and scholars from a variety of disciplines including anthropology archaeology geography and landscape architecture

Yaxchilan Carolyn E. Tate, 2013-08-28 As archaeologists peel away the jungle covering that has both obscured and preserved the ancient Maya cities of Mexico and Central America other scholars have only a limited time to study and understand the sites before the jungle weather and human encroachment efface them again perhaps forever This urgency underlies Yaxchilan The Design of a Maya Ceremonial City Carolyn Tate s comprehensive catalog and analysis of all the city s extant buildings and sculptures During a year of field work Tate fully documented the appearance of the site as of 1987 For each sculpture and building she records its discovery present location condition measurements and astronomical orientation and reconstructs its Long Counts and Julian dates from Calendar Rounds Line drawings and photographs provide a visual document of the art and architecture of Yaxchilan More than mere documentation however the book explores the phenomenon of art within Maya society Tate establishes a general framework of cultural practices spiritual beliefs and knowledge likely to have been shared by eighth century Maya people The process of making public art is considered in relation to other modes of aesthetic expression such as oral tradition and ritual This kind of analysis is new in Maya studies and offers fresh insight into the function of these magnificent cities and the powerful role public art and architecture play in establishing cultural norms in education in a semiliterate society and in developing the personal and community identities of

individuals Several chapters cover the specifics of art and iconography at Yaxchilan as a basis for examining the creation of the city in the Late Classic period Individual sculptures are attributed to the hands of single artists and workshops thus aiding in dating several of the monuments The significance of headdresses backracks and other costume elements seen on monuments is tied to specific rituals and fashions and influence from other sites is traced These analyses lead to a history of the design of the city under the reigns of Shield Jaguar A D 681 741 and Bird Jaguar IV A D 752 772 In Tate s view Yaxchilan and other Maya cities were designed as both a theater for ritual activities and a nexus of public art and social structures that were crucial in defining the self within Maya society The Ancient Maya Sylvanus Griswold Morley,Robert J. Living with the Ancestors Patricia A. McAnany, 2013 The first edition of this book proved to be extremely useful to students of archaeology because it provided a highly readable explanation for why people might bury valued family members under house and plaza floors in Preclassic and Classic Maya societies of the first millennium BCE and CE By casting this ancestralizing practice within the larger framework of land inheritance identity and genealogies of place the author demonstrates the cultural logic of a practice that initially appears alien to Western eyes This new edition contains an entirely new introduction that synthesizes new scholarship as well as an updated bibliography
