Frahm, 2022-07-19 The first comprehensive history in English of film at the Bauhaus exploring practices that experimented with film as an adaptable elastic polymedium With *Design in Motion* Laura Frahm proposes an alternate history of the Bauhaus one in which visual media and film in

particular are crucial to the Bauhaus's visionary pursuit of integrating art and technology. In the first comprehensive examination in English of film at the Bauhaus, Frahm shows that experimentation with film spanned a range of Bauhaus practices from textiles and typography to stage and exhibition design. Indeed, Bauhausler deployed film as an adaptable, elastic polymedium, malleable in shape and form, unfolding and refracting into multiple material, aesthetic, and philosophical directions. Frahm shows how the encounter with film imbued the Bauhaus of the 1920s and early 1930s with a flexible notion of design, infusing painting with temporal concepts, sculptures with moving forms, photographs with sequential aesthetics, architectural designs with a choreography of movement. Frahm considers among other things student works that explored light and the transparent features of celluloid and cellophane, weaving practices that incorporate cellophane, experimental films, social documentaries, and critical reportage by Bauhaus women, and the proliferation of film strips in posters, book covers, and other typographic work. Viewing the Bauhaus's engagement with film through a media theoretic lens, Frahm shows how film became a medium for design in motion. Movement and process rather than stability and fixity become the defining characteristics of Bauhaus educational, aesthetic, and philosophical ethos.

Material Inspirations Jonah Siegel, 2020-10-14. This book is a study of the complex relationship between matter and idea that shaped the nineteenth-century culture of art and that in turn determined the course of still-current accounts of art's nature and value. Fundamental questions about the effects of material conditions on the creation and reception of art arose as early as the nineteenth century and put important pressures on later eras. The place of class distinctions in the making and reception of art, the relationship between copy and original, the effects of display on art appreciation, even the role of pleasure itself: this book treats these and related issues as productive conceptual challenges with an unresolved relationship to matter at their core. Drawing on recent scholarship on the history of art and its institutions, *Material Inspirations* places cultural developments such as the emergence of new sites for exhibition and the astonishing proliferation of printed reproductions alongside a wide range of texts including novels, poems, travel guidebooks, compendia of antiquities, and especially the great line of critical writing that emerged in the period. The study vivifies a dynamic era which is still too often seen as static and unchanging by emphasizing the transformations taking place throughout the period in precisely those areas that have appeared to promise little more than repetition or continuity: collection, exhibition, and reproduction. The book culminates with the two great critics of the period, John Ruskin and Walter Pater, but it also includes close analysis of other prose writers as well as poets and novelists ranging from William Blake to Robert Browning, George Eliot to Henry James. Significant developments addressed include the vogue for the representation of Old Masters in the first half of the century, ongoing

innovations in the creation and diffusion of reproductions and the emergence of the field of art history itself At the heart of each of these the book identifies a material pressure shaping concepts texts and works of art
