The Oxford History of Western Art Martin Kemp, 2000 The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an

innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the redefinition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students

[The Vienna School of Art History](#) Matthew Rampley, 2015-06-26 Matthew Rampley's *The Vienna School of Art History* is the first book in over seventy five years to study in depth and in context the

practices of art history from 1847 the year the first teaching position in the discipline was created to 1918 the collapse of Austria Hungary It traces the emergence of art history as a discipline the establishment of norms of scholarly inquiry and the involvement of art historians in wider debates about the cultural and political identity of the monarchy The so called Vienna School plays the central role in the study but Rampley also examines the formation of art history elsewhere in Austria Hungary Located in the Habsburg imperial capital Vienna art historians frequently became entangled in debates that were of importance to art historians elsewhere in the Empire and Rampley pays particular attention to these areas of overlapping interest He also analyzes the methodological innovations for which the Vienna School was well known Rampley focuses most fully however on the larger political and ideological context of the practice of art history particularly the way in which art historical debates served as proxies for wider arguments over the political social and cultural life of the Habsburg Empire

Collecting Asian Art Markéta Hánová,Yuka Kadoi,Simone Wille,2024-02-29 Rather than centering on the well known collections in Western European and North American museums Collecting Asian Art turns to museum collections of Asian art in Central Europe which emerged from the late 19th century onwards Highlighting the dimensions of Central European connectedness this volume explores how these collections evolved and changed under changing cultural and political conditions from the pre World War I to the post World War II periods With a primary focus on collections of East Asian South Asian and West Asian art in Vienna Prague Berlin Warsaw Krak w Budapest and Ljubljana it outlines the transregional connections and networks that gradually developed Collecting Asian Art locates Asian art across the twentieth century in Central Europe via discourse and ideology and discusses key collections and the way individual collectors built their networks It thus explores transregional connections that developed through collecting activities and strategies in the prewar interwar and postwar eras Contributors also examine the personal connections between a group of Indologists from postwar Prague and modernist Indian artists from the early 1950s to the 1980s and also discuss the systematic archiving of East Asian art collections in Slovenia A concluding conversation looks at colonisation and decolonisation from a broader perspective by approaching it through recent art historical discussions on the global dimensions of modernism By defining the region through its external relationships and its entanglements with regions across Asia rather than as a self contained unit the contributions in this volume outline how these transregional connections and networks evolved and changed over time thus highlighting their singularity in comparison to developments in Western Europe Based on recent research

Collecting Asian Art reveals neglected sources while reinterpreting well known ones **Art and the Higher Life** Kathleen Pyne,2010-07-22 Late in the nineteenth century many Americans were troubled by the theories of Charles Darwin which contradicted both traditional Christian teachings and the idea of human supremacy over nature and by an influx of foreign immigrants who challenged the supremacy of the old Anglo Saxon elite In response many people drew comfort from the theories of philosopher Herbert Spencer who held that human society inevitably develops towards higher and more spiritual

forms In this illuminating study Kathleen Pyne explores how Spencer s theories influenced a generation of American artists She shows how the painters of the 1880s and 1890s particularly John La Farge James McNeill Whistler Thomas Dewing and the Boston school and the impressionist painters of the Ten developed an art dedicated to social refinement and spiritual ideals and to defending the Anglo Saxon elite of which they were members This linking of visual culture to the problematic conditions of American life radically reinterprets the most important trends in late nineteenth century American painting
