Special Reference Briefs ,1983 *Ballistic Missile Defense In The Post-cold War Era* David B H Denoon,2021-11-28

With the end of the Cold War and the visibility of U S Patriot missile defenses during the 1991 Gulf War the cost and benefits of ballistic missile defense systems BMD need to be re evaluated In this detailed and balanced study David Denoon assesses new types of short range and intercontinental missile defenses In the post Cold War era two fundamental changes have made missile defense for the United States and its military forces more compelling The United States and Russia no longer see each other as direct threats and there has been a dramatic proliferation of ballistic missile capability in the Third World Consequently U S forces deployed overseas are more likely to be at risk and eventually the United States itself could become vulnerable to missile threats With these changes in mind David Denoon analyzes the current BMD dilemma arguing that active defenses against missiles should be seen as a form of insurance against catastrophe He assesses the likelihood of missile attacks and the appropriate level of investment for the United States to defend against such attacks The book provides an assessment of deterrence and the performance of the Patriot missiles during the 1991 Gulf War critiques the Strategic Defense Initiative and analyzes the prospects for new types of short range and intercontinental missile defenses

of the modern technocratic state as part of a global technocratic culture and civilization The author argues that technocratic cultural and institutional forms were and are part of a collective script for Western culture The American script combined the scientific commercial and technological aspects of the Enlightenment with the radical 17th century Protestant belief in America as a new Zion In the twentieth century the synthesis of mission along with global technocratic knowledge and institutions created the Wilsonian liberal technocratic order As the principal agent and protector of the modern capitalist international system America the self defined Redeemer Nation has moved through the controlled anarchy of international relations from one war and crisis to the next confirmed in its self defined role and mission **Arms Control Today** ,1987

The European Union and National Industrial Policy Hussein Kassim, Anand Menon, 2002-09-11 Although the implications of EU membership have been the subject of intense political debate and academic enquiry throughout the member states the actual impact of EU action on those states remains under researched The lack of empirical investigation has meant that it has not been possible to arrive at any informed judgement about how the EU has affected traditional policy making in the member states or to evaluate competing claims The European Union and National Industrial Policy investigates the extent to which action at the EU level in a range of industrial financial and service sectors has affected the substance of national policy and the behaviour of and relationships between national actors It looks at the policies pursued by the four larger member states in these areas discussing the initiatives launched by the EU and assessing the Union's impact on national policy compared with other internal and external factors The European Union and National Industrial Policy offers a unique investigation of the relationship between the Union and member states that is empirically based and theoretically reflective In an attempt to overcome the boundaries that have traditionally separated international relations political science public policy and other social sciences it uses insights from a number of perspectives to assess the impact of the EU on the ability of member states to choose and implement their goals Star Wars and European Defence Hans Gunter Brauch, 1987-06-18 **U.S.-Japan Relations** Richard B.
