Sea Charts Of The Early Explorers:

Sea Charts of the Early Explorers Michel Mollat, Monique de La Roncière, 1984-01-01 **Sea Charts of the Early Explorers**, 1984 From Sea Charts to Satellite Images David Buisseret, 1990-06-22 The authors write authoritatively and crisply How to use maps in teaching is spelled out carefully but the authors also manage to sketch in the background of American mapping so the book is both a manual and a history Commentaries are sprinkled with stimulating new ideas for instance on how to use bird s eye views and country atlases in the classroom and there are didactic discussions on maps showing the walking city and the impact of the street car An extraordinarily wide range of maps is depicted which makes for good browsing pondering and close study This is a very good highly attractive and worthwhile book it will have great impact on the use of old and new maps in teaching As well this is a tantalizing survey of mapping the United States and will whet the appetites of students and encourage them to learn more about maps and their origins John Warketin Cartographica

Princes and Princely Culture 1450-1650, Volume 1, 2003-10-15 This book contains thirteen essays on European princes and princely culture between 1450 and 1650 Many products of medieval and renaissance culture literature music political ideology social and governmental structures the fine arts and even forms of devotional practice found their best expression in the context of the courts of greater and lesser princes This volume the first of two concentrating on the late Middle Ages and the Early Modern Era has essays on selected courts north of the Alps and the Pyrenees the court of Burgundy under the Valois dukes that of France under Catherine de Medici and of Henry IV that of Scotland under James III IV V VI and of Mary Queen of Scots that of Margaret of Austria at Mechelen of Scandinavia of Heidelberg under Frederick the Victorious and Philip the Upright and that of Maximilian I Contributors include Gayle K Brunelle Dagmar Eichberger Annette Finley Crosswhite Martin Gosman Margriet Hoogvliet Michael Lynch Alasdair A MacDonald Olaf Mørke Jan Dirk Müller Rita Schlusemann Alan Swanson Arjo Vanderjagt and Janet Hadley Williams *Shakespeare's Ocean* Daniel Brayton, 2012 Study of the sea both in terms of human interaction with it and its literary representation has been largely ignored by ecocritics In Shakespeare's Ocean Dan Brayton foregrounds the maritime dimension of a writer whose plays and poems have had an enormous impact on literary notions of nature and in so doing plots a new course for ecocritical scholarship Shakespeare lived during a time of great expansion of geographical knowledge The world in which he imagined his plays was newly understood to be a sphere covered with water In vital readings of works ranging from The Comedy of Errors to the valedictory The Tempest Brayton demonstrates Shakespeare's remarkable conceptual mastery of the early modern maritime world and reveals a powerful benthic imagination at work *The World Map, 1300-1492* Evelyn Edson, 2007-07-15 A history of the development of world maps during the later medieval period in the centuries leading up to Columbus's journey In the two centuries before Columbus mapmaking was transformed The World Map 1300 1492 investigates this important transitional period of mapmaking Beginning with a 1436 atlas of ten maps produced by Venetian Andrea Bianco Evelyn

Edson uses maps of the fourteenth and fifteenth centuries to examine how the discoveries of missionaries and merchants affected the content and configuration of world maps. She finds that both the makers and users of maps struggled with changes brought about by technological innovation: the compass quadrant and astrolabe, rediscovery of classical mapmaking approaches, and increased travel. To reconcile the tensions between the conservative and progressive worldviews, mapmakers used a careful blend of the old and the new to depict a world that was changing and growing before their eyes. This engaging and informative study reveals how the ingenuity, creativity, and adaptability of these craftsmen helped pave the way for an age of discovery. A comprehensive and complex picture of the changing face of medieval geography. With the mastery of a formidable palette of historiographic knowledge and well-reasoned discussions of the sources, *The World Map 1300-1492* will certainly remain an important work to consult for both medieval and early modern scholars for many years to come. Ian J. Aebel. *Terrae Incognitae*. **Terra Antarctica**. William L. Fox, 2011-04-15. How does the human mind transform space into place or land into landscape? For more than three decades, William L. Fox has looked at empty landscapes and the role of the arts to investigate the way humans make sense of space. In *Terra Antarctica*, Fox continues this line of inquiry as he travels to the Antarctic, the largest and most extreme desert on earth. This contemporary travel narrative interweaves artistic cartographic and scientific images with anecdotes from the author's three-month journey in the Antarctic to create an absorbing and readable narrative of the remote continent. Through its images, history, and firsthand experiences, snowmobile trips through whiteouts, and his icy solo hikes past the edge of the mapped world, Fox brings to life a place that few have seen and offers us a look into both the nature of landscape and ourselves. **Mapping an Atlantic World, circa 1500**. Alida C. Metcalf, 2020-10-13. How did intricately detailed sixteenth-century maps reveal the start of the Atlantic World? Beginning around 1500, in the decades following Columbus's voyages, the Atlantic Ocean moved from the periphery to the center on European world maps. This brief but highly significant moment in early modern European history marks not only a paradigm shift in how the world was mapped but also the opening of what historians call the Atlantic World. But how did sixteenth-century chartmakers and mapmakers begin to conceptualize and present to the public an interconnected Atlantic World that was open and navigable in comparison to the mysterious ocean that had blocked off the Western hemisphere before Columbus's exploration? In *Mapping an Atlantic World, circa 1500*, Alida C. Metcalf argues that the earliest surviving maps from this era, which depict trade, colonization, evangelism, and the movement of peoples, reveal powerful and persuasive arguments about the possibility of an interconnected Atlantic World. Blending scholarship from two fields, historical cartography and Atlantic history, Metcalf explains why Renaissance cosmographers first incorporated sailing charts into their maps and began to reject classical models for mapping the world. Combined with the new placement of the Atlantic, the visual imagery on Atlantic maps, which featured decorative compass roses, animals, landscapes, and native peoples, communicated the accessibility of distant places with valuable commodities. Even though individual maps became outdated quickly, Metcalf

reveals new mapmakers copied their imagery which then repeated on map after map Individual maps might fall out of date be lost discarded or forgotten but their geographic and visual design promoted a new way of seeing the world with an interconnected Atlantic World at its center Describing the negotiation that took place between a small cadre of explorers and a wider class of cartographers chartmakers cosmographers and artists Metcalf shows how exploration informed mapmaking and vice versa Recognizing early modern cartographers as significant agents in the intellectual history of the Atlantic Mapping an Atlantic World circa 1500 includes around 50 beautiful and illuminating historical maps

Maps, Myths, and Men Kirsten A. Seaver, 2004 The Vinland Map first surfaced on the antiquarian market in 1957 and the map's authenticity has been hotly debated ever since in controversies ranging from the anomalous composition of the ink and the map's lack of provenance to a plethora of historical and cartographical riddles Maps Myths and Men is the first work to address the full range of this debate Focusing closely on what the map in fact shows the book contains a critique of the 1965 work The Vinland Map and the Tartar Relation scrutinizes the marketing strategies used in 1957 and covers many aspects of the map that demonstrate it is a modern fake such as literary evidence and several scientific ink analyses performed between 1967 and 2002 The author explains a number of the riddles and provides evidence for both the identity of the mapmaker and the source of the parchment used and she applies current knowledge of medieval Norse culture and exploration to counter widespread misinformation about Norse voyages to North America and about the Norse world picture

The Mapmakers' Quest David Buisseret, 2003-05-22 In 1400 Europe was behind large parts of the world in its understanding of the use of maps For instance the people of China and of Japan were considerably more advanced in this respect And yet by 1600 the Europeans had come to use maps for a huge variety of tasks and were far ahead of the rest of the world in their appreciation of the power and use of cartography The Mapmakers Quest seeks to understand this development not only to tease out the strands of thought and practice which led to the use of maps but also to assess the ways in which such use affected European societies and economies Taking as a starting point the question of why there were so few maps in Europe in 1400 and so many by 1650 the book explores the reasons for this and its implications for European history It examines inter al how mapping and military technology advanced in tandem how modern states territories were mapped and borders drawn up the role of maps in shaping the urban environment and cartography's links to the new sciences

Lynch,2013-10-15 This compilation of new essays and essays published over the past fifty years explores Chaucer s experiences with the cultural other especially Chaucer s relationship to Far Eastern Islamic and African sources While studies of Chaucer s orientalism have heretofore focused on the Squire s Tale Chaucer s Cultural Geography considers many different Chaucerian works in the context of sexual geographies and colonizing and postcolonizing discourses It comes at a time when critical methodology is being debated and a variety of approaches to Chaucer studies using modes of analyses normally reserved for later periods including Said s orientalism theories Dollimore s transgressive proximity and new French feminism Moreover the book fits well into the new emphasis in the Chaucer curriculum on globalism and multiculturalism **Medieval Italy** Christopher Kleinhenz,2004-08-02 This Encyclopedia gathers together the most recent scholarship on Medieval Italy while offering a sweeping view of all aspects of life in Italy during the Middle Ages This two volume illustrated A Z reference is a cross disciplinary resource for information on literature history the arts science philosophy and religion in Italy between A D 450 and 1375 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Medieval Italy An Encyclopedia website The SAGE Handbook of Historical Geography Mona Domosh,Michael Heffernan,Charles W. J. Withers,2020-11-25 Historical geography is an active theoretically informed and vibrant field of scholarly work within modern geography with strong and constantly evolving connections with disciplines across the humanities and social sciences Across two volumes The SAGE Handbook of Historical Geography provides you with an an international and cross disciplinary overview of the field presenting chapters that examine the history present condition and future potential of the discipline in relation to recent developments and research **Masons, Tricksters and Cartographers** David Turnbull,2003-09-02 In an eclectic and highly original study Turnbull brings together traditions as

diverse as cathedral building Micronesian navigation cartography and turbulence research He argues that all our differing ways of producing knowledge including science are messy spatial and local Every culture has its own ways of assembling local knowledge thereby creating space through the linking of people practices and places The spaces we inhabit and assemblages we work with are not as homogenous and coherent as our modernist perspectives have led us to believe rather they are complex and heterogeneous motleys

Princes and Princely Culture Martin Gosman,A. Alasdair A. MacDonald,Alasdair James Macdonald,Arie Johan Vanderjagt,2003-10-01 The essays in this volume discuss princely courts north of the Alps and Pyrenees between 1450 1650 as focal points for products of medieval and renaissance culture such as literature music political ideology social and governmental structures the fine arts and devotional practice Fundamentals of Cartography (Second Revised and Enlarged Edition) R.P. Misra,2014-01-01 The first edition of Fundamentals of Cartography was published in 1969 by Prasaraunga University of Mysore It was reprinted by the Concept Publishing Company New Delhi in While the book remained in currency the cartographic processes changed drastically when information technology brought a sea of change in the sources of information drafting of maps and printing processes Drawing maps by hand became obsolete surveying whether ground or aerial was no longer the only major source of information In view of these changes it became necessary to bring out a new edition Realising that unless one knows directions scales projections coordinates ground and air surveys one would fail to understand the proper use of modern information technology in the drawing the maps Thus the contents of 1969 edition are retained and new chapters have been added to update the book In Part II of the book a chapter on Remote Sensing and Satellite Imageries has been added and Part V contains chapters on Computer Aided Cartography Geographic Information System GIS Land Information System LIS and Global Positioning System GPS The Island of Seven Cities Paul Chiasson,2013-09-10 The Island of Seven Cities unveils the first tangible proof that the Chinese settled in the New World before Columbus In the summer of 2003 architect Paul Chiasson decided to climb a mountain he had never explored on Cape Breton Island where eight generations of his Acadian family had lived One of the oldest points of exploration and settlement in the Americas with a written history dating back to the first days of European discovery Cape Breton is littered with remnants of old settlements But that day Chiasson found a road that was unique Well made and consistently wide and at one time clearly bordered with stone walls the road had been a major undertaking But he could find no record of it In the two years of detective work that followed Chiasson systematically surveyed the history of Europeans in North America and came to a stunning conclusion the ruins he had stumbled upon an entire townsit on a mountaintop did not belong to the Portuguese the French the English or the Scots And they predated John Cabot s 1497 discovery of the island Using aerial and site photographs maps and drawings and his own expertise as an architect Chiasson re creates how he pieced together the clues to one of the world s great mysteries a large Chinese colony existed and thrived on Canadian shores well before the European Age of Discovery He addresses how the ruins had been

previously overlooked or misunderstood and how the colony was abandoned and forgotten in China and in the New World. And he discovers the traces the colony left in the storytelling and culture of the Mi kmaq whose written language, clothing, technical knowledge, religious beliefs, and legends he argues expose deep cultural ties to China. A gripping account of an earth-shaking discovery, *The Island of Seven Cities* will change the way we think about our world.
