Sea Fare The Official American Fisheries Society Cookbook:

Sea Fare Cookbook Gary Carmichael, Melissa Ring, Joseph P. McCraren, 1992 *On the East End* Clarence Hickey, 2015-07-11 In 1970 as a young marine biologist Clarence Hickey won a position on the staff of the New York State Ocean Sciences Laboratory Montauk NY For the next five years he was involved in landmark studies of Long Island s then thriving fisheries He developed deep bonds with the Baymen and ocean fishers who called the East End of Long Island home and worked closely with them as he and the Ocean Sciences Lab studied the habits and prospects of more than one hundred species of fish and shellfish that call Long Island home or visit our waters on a regular basis This is his loving anguished memoir of those years replete with vivid portraits of the traditional fishers and scientists he worked with their habits and discoveries and their history suffused community Like their brethren to the north and south on the East Coast Long Island s Bonacker fishing community represents a long and colorful tradition celebrated most famously in Peter Mattheissen s classic *Men s Lives* Hickey s memoir is an elegiac complement to that book Perhaps more important Hickey calls for our deep attention to the destruction in less than a generation of a crucial natural resource The contrast between Clarence s years on the East End and today is stark and disturbing Over the last forty years he has revisited his beloved East End regularly and watched with alarm as our ecosystem and it s community has declined On the East End is Clarence Hickey s clarion call for us to preserve and revive the natural community he fell in love with when he was young A publication of the Long Island Nature Organization **Technical Publications of the U.S. Fish and Wildlife Service Fish Technology Centers, 1966-2001** Lola T. Dees, 2001 **SFI Bulletin** ,1993 *Women in Natural Resources* ,1991 **The Cookbook Review** ,1992 *Bibliography of Agriculture* ,1995 *Subject Guide to Books in Print* ,1997 *Aquaculture in the 21st Century* Anita Marie Kelly, Jeffrey T. Silverstein, 2005 **The President's Salmon** Catherine Schmitt, 2015-07-30 Every spring for thousands of years the rivers that empty into the North Atlantic Ocean turn silver with migrating fish Among the crowded schools once swam the King of Fish the Atlantic salmon From New York to Labrador from Russia to Portugal sea bright salmon defied current tide and gravity driven inland by instinct and memory to the very streams where they themselves emerged from gravel nests years before The salmon pools and rivers of Maine achieved legendary status among anglers and since 1912 it was tradition that the first salmon caught in the Penobscot River each spring was presented as a token to the President of the United States The last salmon presented was in 1992 to George W Bush That year the Penobscot counted more than 70 percent of the salmon returns on the entire Eastern seaboard yet that was only 2 percent of the river s historic populations Due to commercial over harvesting damming and environmental degradation of the fish s home waters Atlantic salmon populations had been decimated The salmon is said to be as old as time and to know all the past and future Twenty two thousand years ago someone carved a life sized image of Atlantic salmon in the floor of a cave in southern France Salmon were painted on rocks in Norway and Sweden The salmon s effortless leaping and ability to survive in both river and

sea led the Celts to mythologize the salmon as holder of all mysterious knowledge gained by consuming the nine hazelnuts of wisdom that fell into the Well of Segais The President s Salmon presents a rich cultural and biological history of the Atlantic salmon and the salmon fishery primarily revolving around the Penobscot River the last bastion for the salmon in America and a key battleground site for the preservation of the species

Kitchen Literacy Ann Vileisis,2008-02 Ask children where food comes from and they ll probably answer the supermarket Ask most adults and their replies may not be much different Where our foods are raised and what happens to them between farm and supermarket shelf have become mysteries How did we become so disconnected from the sources of our breads beef cheeses cereal apples and countless other foods that nourish us every day Ann Vileisis s answer is a sensory rich journey through the history of making dinner Kitchen Literacy takes us from an eighteenth century garden to today s sleek supermarket aisles and eventually to farmer s markets that are now enjoying a resurgence Vileisis chronicles profound changes in how American cooks have considered their foods over two centuries and delivers a powerful statement what we don t know could hurt us As the distance between farm and table grew we went from knowing particular places and specific stories behind our foods origins to instead relying on advertisers claims The woman who raised plucked and cooked her own chicken knew its entire life history while today most of us have no idea whether hormones were fed to our poultry Industrialized eating is undeniably convenient but it has also created health and environmental problems including food borne pathogens toxic pesticides and pollution from factory farms Though the hidden costs of modern meals can be high Vileisis shows that greater understanding can lead consumers to healthier and more sustainable choices Revealing how knowledge of our food has been lost and how it might now be regained Kitchen Literacy promises to make us think differently about what we eat
