Sea Full of Whales Richard Armour, 1974-01-01 A rhymed introduction to the characteristics of the various members of the whale family **Sea Full of Whales** Richard Armour, Paul Galdone, 1974 **The World of Whales** Darcy Dobell, 2020 Did you know that the biggest animal on Earth the blue whale only eats some of the smallest creatures in the ocean That humpback whales sing underwater songs with lots of verses Or that orcas can live with their families for their whole lives and bowhead whales can live for more than 200 years The World of Whales explores the special characteristics and reveals mind blowing facts about these fantastic animals Join our sub aquatic expedition through the vast oceans of our planet **Poems of the American Empire** Jen Hedler Phillis, 2019-11-01 Poems of the American Empire argues that careful attention to a particular strain of twentieth century lyric poetry yields a counter history of American global power The period that Phillis covers from Ezra Pound s A Draft of XXX Cantos in 1930 to Cathy Park Hong s Engine Empire in 2012 roughly matches what some consider the ascent and decline of the American empire The diverse poems that appear in this book are united by their use of epic forms in the lyric poem a combination that violates a fundamental framework of both genres relationship to time This book makes a groundbreaking intervention by insisting that lyric time is key to understanding the genre These poems demonstrate the lyric form s ability to represent the totality of history making American imperial power visible in its fullness Neither strictly an empty celebration of American exceptionalism nor a catalog of atrocities Poems of the American Empire allows us to see both *Learning about Spring with Children's Literature* Margaret A. The Whale in the Living Room John Ruthven, 2021-06-17 The Whale in the Living Room follows the thrilling adventures of film maker John Ruthven as he travels the globe dives into our oceans and passionately recounts his life affirming experiences What creatures could remain undiscovered in the 95 per cent of the seas that have not been thoroughly explored How vast really are our oceans The surface of Mars and Venus are better known to us than Earth s seabed Yet to map the world s ocean to even 100 metre blocks of accuracy something that environmentalists say is essential for its protection could take another 300 years Even creatures that are known to us like the giant squid have proved too difficult to accurately capture on film Quite literally immersed in his subject John can help readers understand the magnitude of our planet s oceans and why it is so important for us to protect our seas and the creatures that inhabit them He is the only producer to have worked full time on both series of Blue Planet as well as nearly fifty other films about the sea Through his first hand experience John shows us the loneliness of whale calves in the deep blue the fear of seals as they dodge great white sharks near the coast or the curiosity of octopus staring back at us through the camera His book takes us through the blue rings of

South Pacific coral atolls on submarine rides into the abyss with ancient life forms and up close and personal encounters with singing humpback whales that make you feel the water around you The Whale in the Living Room like the proverbial elephant in the room is also about how until recently we have been largely blind to our polluting of the seas John for example explores how plastic went wild in the ocean tries to understand how we got into this mess and see if we can ever untangle the oceans from its grip
