Sea in Soviet Strategy Bryan Ranft, Geoffrey Till, 1983-06-18      **The Sea in Soviet Strategy** Bryan Ranft, Geoffrey Till, 1989 Two of Great Britain's leading maritime specialists take a comprehensive analytical look at the development purposes and importance of the Soviet Navy      Soviet Strategy in the Red Sea Basin William Augustine Nurthen, 1980 The Red Sea basin lies within a region syllogized variously as the arc of instability the crescent of crises and the crumbling triangle Regardless of the metaphor utilized this volatile cul de sac pulses with instability The pattern of Soviet strategy that emerges for the Red Sea basin indicates not a grand design but rather an attempt to manage regional instability in accordance with Russian national interests Destabilizing events provide Moscow with targets of opportunity which are selectively exploited to achieve foreign policy goals These goals are strategic political and economic in nature Naval diplomacy implemented by the maturing Soviet Navy comprises an essential and at times decisive element of the overall strategy for the Red Sea basin Frequently the Soviet military assistance program assiduously cultivated in the region provides the exploitive vehicle with which to capitalize on targets of opportunity generated by the persistent patterns of instability Moscow's strategy for the Red Sea basin is supported by the major components of the Soviet bureaucracy defense and heavy industries armed forces fishing and maritime fleets and ideological agencies It is unlikely to change in the aftermath of the Brezhnev succession Author      *The Rise and Fall of the Soviet Navy in the Baltic 1921-1941* Gunnar Åselius, 2005-01-10 This book based on extensive work in Russian archives investigates how strategy organisational rivalry and cultural factors came to shape naval developments in the Soviet Union up to the invasion of 1941 Focussing on the Baltic Fleet the author shows how the perceived balance of power in northern Europe came to have a major influence on Soviet naval policy during the 1920s and 1930s The operational environment of a narrow inland sea like the Baltic would have required a joint approach to military planning but the Soviet navy's weak position among the armed services made such an approach hard to attain The Soviet regime also struggled against the cultural heritage of the tsarist navy and the book describes how this was overcome In a special Appendix dedicated to the purges of 1937-38 surviving party records from the Baltic Fleet Intelligence Section are used to illustrate the mechanisms of the Great Terror at local level      **Soviet Russia: Strategic Survey** United States. Department of the Army, 1963      *Security at Sea* Stockholm International Peace Research Institute, 1990 Since the Second World War five navies are known to have acquired nuclear weapons and naval forces and activities around the world have become increasingly important and dangerous However there has been no serious consideration of naval arms control for more than forty years SIPRI gathered together a group of experts from eight nations to consider the problems of naval forces and the possibilities for arms control This book is a product of that conference and it presents for the first time a broad and detailed assessment of the dangers of the naval arms race problems with arms control possible approaches confidence building measures and verification technologies      The Soviet Strategy to Counter Western

Upshaw,1965      **The New Battle for the Atlantic** Magnus F Nordenman,2019-06-15 In this book Magnus Nordenman explores the emerging competition between the United States and its NATO allies and the resurgent Russian navy in the North Atlantic This maritime region played a key role in the two world wars and the Cold War serving as the strategic link between the United States and Europe that enabled the flow of reinforcements and supplies to the European Allies Nordenman shows that while a conflict in Europe has never been won in the North Atlantic it surely could have been lost there With Vladimir Putin s Russia threatening the peace in Europe following the annexation of Crimea in 2014 the North Atlantic and other maritime domains around Europe are once again vitally important But this battle will in many ways be different Nordenman demonstrates due to an overstretched U S Navy the rise of disruptive technologies a beleaguered NATO that woke up to the Russian challenge unprepared for high end warfighting in the maritime domain and a Russia commanding a smaller but more sophisticated navy equipped with long range cruise missiles Nordenman also provides a set of recommendations for what the United States and NATO must do now in order to secure the North Atlantic in this new age of great power competition      In the Shadow of Giants: The Major Powers and the Security of Southeast Asia Anthony James Gregor,1989      *Strategy and Tactics of World Communism* United States.
