Penn Center Orville Vernon Burton,Wilbur Cross,2014-10-15 The Gullah people of St Helena Island still relate that their people wanted to catch the learning after northern abolitionists founded Penn School in 1862 less than six months after the Union army captured the South Carolina sea islands In this broad history Orville Vernon Burton and Wilbur Cross range across the past 150 years to reacquaint us with the far reaching impact of a place where many daring and innovative social justice endeavors had their beginnings Penn Center s earliest incarnation was as a refuge where escaped and liberated enslaved people could obtain formal liberal arts schooling even as the Civil War raged on sometimes just miles away Penn Center then earned a place in the history of education by providing agricultural and industrial arts training for African Americans after Reconstruction and through the Jim Crow era the Great Depression and two world wars Later during the civil rights movement Penn Center made history as a safe meeting place for organizations like Martin Luther King Jr s

**Harvesting Freedom** Akiko Ochiai,2004-03-30 From early in the Civil War the Sea Islands of South Carolina set the stage for an exciting experiment in freedpeople s independence Lowcountry South Carolina is particularly significant not only for its aristocratic planters and its high profile in the secession but for the degree of autonomy that the slaves acquired during seasons of absentee proprietorship No place ever came closer to realizing the dream of Forty Acres and a Mule than this region and consequently no place saw more vigorous struggles over land possession Proving to the world their abilities to purchase lands to organize cooperatives and to participate in political parties the African Americans of the lowcountry forged and fought for their own agrarian dreams A highlight of Sea Island history was the Port Royal Experiment when northern volunteer missionaries provided education to freedpeople and General Rufus Saxton actively initiated Sherman s Field Orders commandeering the coast for African American homesteaders When freedom gave them the chance this group embraced education and democratic self rule with abilities that even their supporters underestimated This is the true story of their triumphs and failures in the struggle to claim the lands on which their forefathers toiled and died

**The Shell Builders** Colin Brooker,2020-08-25 Beaufort South Carolina is well known for its historical architecture but perhaps none is quite as remarkable as those edifices formed by tabby sometimes called coastal concrete comprising a mixture of lime sand water and oyster shells Tabby itself has a storied history stretching back to Iberian Caribbean Spanish American and even African roots brought to the United States by adventurers merchants military

engineers planters and the enslaved Tabby has been preserved most abundantly in the Beaufort area and its outlying islands and along the Sea Islands all the way to Florida as well with Fort Frederick in 1734 having the earliest example of a diverse group of structures which included town houses seawalls planters homes barns agricultural buildings and slave quarters Tabby's insulating properties are excellent protection from long hot humid and sometimes deadly summers and on the islands particularly wealthy plantation owners built grand houses for themselves and improved dwellings for enslaved workers that after two hundred plus years still stand today An extraordinarily hardy material tabby has a history akin to some of the world's oldest building techniques and is referred to as rammed earth as well as tapia in Spanish pis de terre in French and hangtu in Chinese The form that tabby construction took along the Sea Islands however was born of necessity Here stone and brick were rare and expensive but the oyster shells that were used as the source for the tabby's lime base were plentiful Today these bits of shell often visible in the walls and forms constructed long ago give tabby its unique and iconic appearance Colin Brooker architect and expert on historic restoration has not only made an exhaustive foray into local tabby architecture and heritage he also has made a multinational tour as well in search of tabby origins evolution and diffusion from the Bahamas to Morocco to Andalusia which can be traced back as far as the tenth century Brooker has spent more than thirty years investigating the origins of tabby its chemistry its engineering and its limitations The Shell Builders lays out a sweeping in depth and fascinating investigative journey at once archaeological sociological and historical into the ways prior inhabitants used and shaped their environment in order to house and protect themselves leaving behind an architectural legacy that is both mysterious and beautiful Lawrence S Rowland a distinguished professor emeritus of history at the University of South Carolina Beaufort and past president of the South Carolina Historical Society provides a foreword
