Sea Craft Of Prehistory:

The Sea-craft of Prehistory Paul Johnstone,1988 A detailed account of man s use of inland and ocean going craft from the earliest times until the dawn of history using new archaeological research All forms of evidence are assessed from the vessels of ancient Egypt to the Chinese junk The nautical dimension of prehistory has not so far received the attention it deserves It is also too often assumed that early man was land bound yet this is demonstrably not the case Recent research has shown that man travelled and tracked over greater distances and at a much earlier date than has previously been thought possible Some of these facts can be explained only by man s mastery of water transport from earliest times This book by an acknowledged expert on prehistoric sea craft examines these problems looking at the new archaeological information in the light of the author s nautical knowledge The result is a detailed account of man s use of inland and ocean going craft from earliest times until the dawn of recorded history All forms of evidence are critically assessed from the vessels of Ancient Egypt to the Chinese junk to present of comprehensive picture of the vessels men have built through the ages and of the variety of ways in which they have been used *Space, Time and Man* Grahame Clark,1994-03-25 A remarkable account of man s understanding of his place in space and time from prehistory to the present **The Blood-Drenched Sea** Alfred S. Bradford,2019-08-15 This book is an indispensable resource for readers who want to know the whole comprehensive story of ancient naval warfare The Blood Drenched Sea describes all the naval battles and wars fought in the ancient Mediterranean In one volume are the ships crews and leaders who determined the course of ancient history along with the wars and battles told through artifacts extant literary and visual sources and modern reconstructions the Egyptian mortuary temple the Minoan domain the legendary sack of Troy the expansion of Greeks throughout the Mediterranean the Athenian victory over the Persians at Salamis and the Athenian empire ruined by one moment of superstition Then the Romans learned how to build ships man them row in tiers and command fleets and the volume recounts their contributions to history as well They fought three wars with Carthage that cost them hundreds of thousands of casualties and expenditures of vast wealth and they conquered the whole of the Mediterranean Meanwhile Julius Caesar expanded the empire with the conquest of Gaul and the invasion of Britain and his adoptive son Octavian settled the question of who would rule the new empire by winning the naval battle at Actium Transnationalism in Ancient and Medieval Societies Michael C. Howard,2014-01-10 While scholars have long documented the migration of people in ancient and medieval times they have paid less attention to those who traveled across borders with some regularity This study of early transnational relations explores the routine interaction of people across the boundaries of empires tribal confederacies kingdoms and city states paying particular attention to the role of long distance trade along the Silk Road and maritime trade routes It examines the obstacles voyagers faced including limited travel and communication capabilities relatively poor geographical knowledge and the dangers of a fragmented and shifting political landscape and offers profiles of better known transnational elites such as the Hellenic scholar Herodotus

and the Venetian merchant Marco Polo as well lesser known servants merchants and sailors By revealing the important political economic and cultural role cross border trade and travel played in ancient society this work demonstrates that transnationalism is not unique to modern times Instructors considering this book for use in a course may request an examination copy here [Human Dispersal and Species Movement](#) Nicole Boivin,Rémy Crassard,Michael Petraglia,2017-05-27 A unique interdisciplinary and up to date treatment exploring human migration and its role in creating novel ecosystems over the long term [Archaeology and the Social History of Ships](#) Richard A. Gould,2000-04-13 Maritime archaeology deals with shipwrecks and is carried out by divers rather than diggers But this is by no means a marginal branch of archaeology It embraces maritime history analysing changes in ship building navigation reconstructing the infrastructure of waterborne commerce and offers fresh perspectives on the cultures and societies that produced the ships and sailors Drawing on detailed and recent case studies Richard Gould provides an up to date review of the field and a clear exposition of new developments in undersea technologies He also argues for the careful management of underwater cultural resources

The Archaeology of Seafaring in Ancient South Asia Himanshu Prabha Ray,2003-08-14 Prior to European expansion communities of the Indian subcontinent had a strong maritime orientation In this new archaeological study Himanshu Prabha Ray explores seafaring activity religious travel and political economy in this ancient period By using archaeological data from the Red Sea to the Indonesian archipelago she reveals how the early history of peninsular South Asia is interconnected with that of its Asian and Mediterranean partners in the Indian Ocean Region The book departs from traditional studies focusing on the communities maritime history rather than agrarian expansion and the emergence of the state Rather than being a prime mover in social economic and religious change the state is viewed as just one participant in a complex interplay of social actors including merchants guilds boat builders sailors pilgrims religious clergy and craft producers A study that will be welcomed by students of Archaeology and Ancient History particularly those interested in South Asian Studies

[Archaeology and Language III](#) Roger Blench,Matthew Spriggs,2012-10-12 Archaeology and Language III interprets results from archaeological data in terms of language distribution and change providing the tools for a radical rewriting of the conventional discourse of prehistory Individual chapters present case studies of artefacts and fragmentary textual materials concerned with the reconstruction of houses maritime technology pottery and grave goods **Exploring Ancient Textiles** Alistair Dickey,Margarita Gleba,Sarah Hitchens,Gabriella Longhitano,2022-07-20 Over the past 30 years research on archaeological textiles has developed into an important field of scientific study It has greatly benefited from interdisciplinary approaches which combine the application of advanced technological knowledge to ethnographic textual and experimental investigations In exploring textiles and textile processing such as production and exchange in ancient societies archaeologists with different types and quality of data have shared their knowledge thus contributing to well established methodology In this book the papers highlight how researchers have been challenged to adapt or modify these

traditional and more recently developed analytical methods to enable extraction of comparable data from often recalcitrant assemblages Furthermore they have applied new perspectives and approaches to extend the focus on less investigated aspects and artefacts The chapters embrace a broad geographical and chronological area ranging from South America and Europe to Africa and from the 11th millennium BC to the 1st millennium AD Methodological considerations are explored through the medium of three different themes focusing on tools textiles and fibres and culture and identity This volume constitutes a reflection on the status of current methodology and its applicability within the wider textile field Moreover it drives forward the methodological debates around textile research to generate new and stimulating conversations about the future of textile archaeology

Schiffer, 2001 These fourteen original essays accept a dual premise technology pervades and is embedded in all human activities By taking that approach studies of technology address two questions central in anthropological and archaeological research today accounting for variability and change These diverse yet interrelated chapters show that to understand human lives researchers must deal with the material world that all peoples create and inhabit Therefore an anthropology of technology is not a separate discrete inquiry instead it is a way to connect how people make and use things to any activity studied ranging from religion to enculturation to communication to art Each contributor discusses theories and methods and also offers a substantial case study These detailed inquiries span human societies from the Paleolithic to the computer age By moving beyond the usual approach of examining ancient technologies particularly chipped stone and low fired ceramics this volume probes for the construction of meaning in the material world across

millennia The authors of these essays find technology to be an inclusive and flexible topic that merges with studies of everything else in human activity A provocative and powerful discussion of the role of technology in human cultures At a time when archaeology has become less focused on theory and archaeology and social anthropology seem to fracture farther and farther apart the book is a breath of fresh air Professor John Douglas University of Montana *Pirate Hunting* Benerson Little,2010-09-30 For thousands of years pirates privateers and seafaring raiders have terrorized the ocean voyager and coastal inhabitant plundering ship and shore with impunity From the victim s point of view these attackers were not the rebellious romantic rulers of Neptune s realm but savage beasts to be eradicated and those who went to sea to stop them were heroes Engaging and meticulously detailed *Pirate Hunting* chronicles the fight against these plunderers from ancient times to the present and illustrates the array of tactics and strategies that individuals and governments have employed to secure the seas Benerson Little lends further dimension to this unending battle by including the history of piracy and privateering ranging from the Mycenaean rovers to the modern pirates of Somalia He also introduces associated naval warfare maritime commerce and transportation the development of speed under oar sail and steam and the evolution of weaponry More than just a vivid account of the war that seafarers and pirates have waged *Pirate Hunting* is invaluable reading in a world where acts of piracy are once more a significant threat to maritime commerce and voyagers It will appeal to readers interested in the history of piracy anti piracy operations and maritime naval and military history worldwide

Oceans, Seas, Shorelines and Warfare Richard Harding,Ross Anderson,Mick de Ruyter,2024-09-23 For as long as humanity has ventured on the seas naval warfare has been an integral part of their activities and the focal point for many histories and ideas of heritage This book presents a rarely explored aspect the long term impact of those battles on shorelines seas and oceans Dramatic and altering the physical scars of battles remain with us today in the form of cultural landscapes and archaeological sites while the geopolitical consequences of warfare have been world changing The migrations of peoples across the seas accompanied by violence have done more to shape the demographic and cultural map of the modern world than almost anything else Both seaborne opportunities and threats have influenced the way of life of coastal communities Today technology has seen these threats extend far into the deepest ocean and reach across continents This book shows how despite being virtually invisible to an increasing percentage of the world s population the ocean is more significant now than it has ever been Ranging from the world of antiquity to the present day with a global perspective the volume is intended to appeal to those interested in history archaeology social sciences and the environment **System And Process In Southeast Asia** Donald G Mccloud,2019-06-26 Southeast Asia although not garnering the headlines of ten to twenty years ago is important in global politics Vietnam s domination of Indochina for example has polarized the region given the Soviet Union new regional access and magnified the military threat to Thailand Insurgency movements supported by the radical Left or Right continue to plague governments The Strait of Malacca the major sea lane through Southeast Asia

provides primary access for the U S Pacific fleet to the Indian Ocean and the Middle East and is Japan s oil lifeline U S commercial and military interests remain strong in the Philippines and are expanding in Indonesia the world s fifth largest country with a population approaching 170 million people whereas Thailand Malaysia and Singapore are sources for investment raw materials and potential markets Thailand once closely allied with the United States has again renewed those ties in the face of Vietnam s expansion This comprehensive up to date textbook analyzes Southeast Asia in the context of regional and global political systems both traditional and contemporary After looking at the traditional patterns of interstate relations in the region Professor McCloud shows that Southeast Asia has been and continues to be dependent on the global system However he also identifies a neotraditional current in contemporary Southeast Asian politics as elements of traditional beliefs and values reassert themselves in policy and practice redefine the patterns of interstate behavior in the region and set the limits to dependence on the global system The book is intended as a primary text for courses on the history or politics of Asia or Southeast Asia regional development and integration and the role of Southeast Asia in world politics It will also be useful in survey courses in Asian studies comparative politics and Third World development
