The Series includes the proceedings of the following conferences: the International Maritime Association of the Mediterranean (IMAM) conferences, the Marine Structures (MARSTRUCT) conferences, the Renewable Energies Offshore (RENEW) conferences and the Maritime Technology (MARTECH) conferences. The Marine Technology and Ocean Engineering series is also open to new conferences that cover topics on the sustainable exploration and exploitation of marine resources in various fields such as maritime transport and ports, usage of the ocean including coastal areas, nautical activities, the exploration and exploitation of mineral resources, the protection of the marine environment and its resources and risk analysis, safety and reliability. The aim of the series is to stimulate advanced education and training through the wide dissemination of the results of scientific research.

**Ship Dynamics for Performance Based Design and Risk Averse Operations** Spyros Hirdaris, Tommi Kristian Mikkola, 2021-04-07. More than a century and half ago William Froude and his son Robert 1<sup>st</sup> 2<sup>nd</sup> conducted the first scientifically designed towing tank experiments using scaled ship models traveling in calm water or waves. Since then advances in mathematics and technology have led to the development of various methods for the assessment of the dynamic behavior of ships. Yet as we enter the 2nd decade of the 21st century the advent of goal-based regulations and the emergence of safe and sustainable shipping standards still confront our ability to understand the fundamentals and assure absolute ship safety in design and operations. To instigate renewed interest in the well-rehearsed subject of ship dynamics this Special Issue presents a collection of 12 high quality research contributions with a focus on the prediction and analysis of the dynamic behavior of ships in a stochastic environment. The papers presented are co-authored by leading subject matter experts from Europe, the Far East and the USA. These papers will be of interest to academics, practitioners and regulators involved in the progression of ship science, technical services and safety standards. *Trends in Maritime Technology and Engineering* C. Guedes Soares, T.A. Santos, 2022-06-07. Trends in Maritime Technology and Engineering comprises the papers presented at

the 6th International Conference on Maritime Technology and Engineering MARTECH 2022 that was held in Lisbon Portugal from 24-26 May 2022. The Conference has evolved from the series of biennial national conferences in Portugal which have become an international event and which reflect the internationalization of the maritime sector and its activities. MARTECH 2022 is the sixth of this new series of biennial conferences. The book covers all aspects of maritime activity including in Volume 1 Structures Hydrodynamics Machinery Control and Design. In Volume 2 Maritime Transportation and Ports Maritime Traffic Safety Environmental Conditions Renewable Energy Oil Gas and Fisheries and Aquaculture Trends in Maritime Technology and Engineering aims at academics and professionals in the above mentioned fields.

**Developments in Offshore Engineering: Wave Phenomena and Offshore Topics** John B. Herbich, 1998-12-18. Drawing from experts and top researchers from around the world, this book presents current developments in a variety of areas that impact offshore and ocean engineering.

Wave Forces on Offshore Structures Turgut 'Sarp' Sarpkaya, 2010-02-26. A thorough understanding of the interaction of waves and currents with offshore structures has now become a vital factor in the safe and economical design of various offshore technologies. There has been a significant increase in the research efforts to meet this need. Although considerable progress has been made in the offshore industry and in the understanding of the interaction of waves, currents, and wind with ocean structures, most of the available books concentrate only on practical applications without a grounding in the physics. This text integrates an understanding of the physics of ocean structure interactions with numerous applications. This more complete understanding will allow the engineer and designer to solve problems heretofore not encountered and to design new and innovative structures. The intent of this book is to serve the needs of future generations of engineers designing more sophisticated structures at ever increasing depths.
