## **Sea Monsters Prehistoric Predators Of The Deep:**

**Sea Monsters** Nigel Marven, Jasper James, 2003 In prehistoric times there existed creatures bigger and often fiercer than dinosaurs whose exploits have inspired more terrifying legends than any other group of animals Their watery home has kept them hidden from view until now Monsters once again recreates the prehistoric world giving us an insight into the underwater environment of that time and the strange and fascinating creatures that dwelt there The leading wildlife television presenter Nigel Marven explores their world through a series of encounters where he dives deep into the past and swims with these extraordinary reptiles and mammals From the fearsome hunter Liopleurodon one of the biggest predators that ever existed to Megalograptus the most vicious of the spiny sea scorpions the deadly prehistoric seas are vividly brought to life as we see these creatures through Nigel s eyes Some of the ancestors of these predators exist today but even the great white shark and blue whale cannot come close in threat and size to these prehistoric species reconstruction of these creatures with details of the modern sites from New York to Egypt where water once covered the land Chased by Sea Monsters Nigel Marven, Jasper James, 2004 Color artwork and detailed captions journey underwater to capture the prehistoric world of an array of extinct animals in the companion volume to the Discovery Channel special , **Sea Monsters** Michael J. Trout, 2011-11-15 In this illuminating and evocative exploration of the origin and function of storytelling the author goes beyond the work of mythologist Joseph Campbell arguing that mythmaking evolved as a cultural survival strategy for coping with the constant fear of being killed and eaten by predators Beginning nearly two million years ago in the Pleistocene era the first stories Trout argues functioned as alarm calls warning fellow group members about the carnivores lurking in the surroundings At the earliest period before the development of language these rudimentary stories would have been acted out When language appeared with the evolution of the ancestral human brain stories were recited memorized and much later written down as the often bone chilling myths that have survived to this day This book takes the reader through the landscape of world mythology to show how our more recent ancestors created myths that portrayed animal predators in four basic ways as monsters as gods as benefactors and as role models Each incarnation is a variation of the fear management technique that enabled early humans not only to survive but to overcome their potentially incapacitating fear of predators In the final chapter Trout explores the ways in which our visceral fear of predators is played out in the movies where both animal and human predators serve to probe and revitalize our capacity to detect and survive danger Anyone with

an interest in mythology archaeology folk tales and the origins of contemporary storytelling will find this book an exciting and provocative exploration into the natural and psychological forces that shaped human culture and gave rise to storytelling and mythmaking
