distance doesn't matter at all. The COVID 19 pandemic has resulted in a tough time worldwide with global lockdown, locked homes, empty streets, stores without consumers, and offices with no or fewer staff. Thanks to the modern digital networks, the culture of work from home (WFH) or working remotely with the network Internet connection has come to the fore, with even school and university classes going online. Although WFH is not new, the COVID 19 pandemic has given it a new look, and industries are now willfully exploring WFH to extend it in the future. The aim of this book is to present the timeline of networking to show the developments made and the milestones that were achieved due to these developments.

The Oxford Handbook of Sound and Imagination Mark Grimshaw, Mark Grimshaw-Aagaard, Mads Hansen, Martin Knakkegaard, 2019. In this two-volume Handbook, contributors address the tendency to discuss musical imagination through terms like compositional creativity or performance technique, correcting the current bias towards visual imagination to instead highlight the many forms of sonic and musical imagination.

[The Oxford Handbook of Sound and Imagination, Volume 2](#) Mark Grimshaw-Aagaard, Mads Walther-Hansen, Martin Knakkegaard, 2019-07-26. Whether social, cultural, or individual, the act of imagination always derives from a pre-existing context. For example, we can conjure an alien's scream from previously heard wildlife recordings or mentally rehearse a piece of music while waiting for a train. This process is no less true for the role of imagination in sonic events and artifacts. Many existing works on sonic imagination tend to discuss musical imagination through terms like compositional creativity or performance technique. In this two-volume Handbook, contributors shift the focus of imagination away from the visual by addressing the topic of sonic imagination and expanding the field beyond musical compositional creativity and performance technique into other aural arenas where the imagination holds similar power. Topics covered include auditory imagery and the neurology of sonic imagination, aural hallucination and illusion, use of metaphor in the recording studio, the projection of acoustic imagination in architectural design, and the design of sound artifacts for cinema and computer games.
