700th anniversary of his death In this book we have also a short story dedicated to Yunus Emre The teachers and students collaborating to make real a mutual dream discovered the wordless language stronger than any borders We have a mutual dream with the young authors from seven different countries to create a multilingual book We published our first book last year on 23rd April 2020 Printed books were delivered to the young authors studying in partner schools In the second year of our project we created short stories with children from Ireland Portugal Spain Croatia Poland Romania and Türkiye Our students wrote many short stories and 65 of them were selected to be published in this book We created an audiobook library with that stories All the stories were narrated in their mother tongues and we add English audio for selected stories Also stories are illustrated by the students from different countries We also have a collaborative story this year each part of the story was written by eTwinners studying in different schools It consists of 13 parts Nihal the main character needs to find an extinct plant but it's harder for her to find someone to rely on We travelled with her in different countries and times to learn more about her adventure It took seven months to complete that collaborative story We used English as a common language during the meetings but we created opportunities for our students to use their mother tongues too We experienced multilingualism with our students and parents they become familiar with different languages and cultures Through our language friendly project we want to encourage students to develop an interest in different languages and cultures by welcoming and valuing all languages spoken By creating a story a child can channel their emotions and decide on how to behave in challenging situations they might encounter While creating a story the author shows empathy with the characters expresses different emotions experienced by characters or overcomes a difficult situation that a character encountered This may help a child to express how they feel and understand how others feel Storytelling is a way of self discovery and self expression their feelings can be demonstrated throughout the child's words Creating a story can also develop language skills The mother tongue education is a *raison d'être* for the schools Because when learners develop their mother tongue they are simultaneously fostering a whole host of other essential skills such as critical thinking and literacy skills Children with a strong mother tongue can easily pick up a second language and can transfer these skills to a second language These children often display a deeper understanding of themselves and their environment That affects every aspect of their lives including their academic achievement It has become a requirement to have language skills in addition to being a specialist within a particular field I'd like to thank the teachers of Ali Tekinsoy Secondary School and my distinguished colleagues from partner schools for encouraging and inspiring their students to contribute to our second multilingual book named Stories of Lights in the Sky 2 More than a hundred students built this book with their words lines and voices They were brave enough to represent their schools by sending their stories to a book that has been read in more than fifty countries We wish the best for them and hear their names again even years after Ahmet ARSLAN Editor nsız Dilsizler haberini kulaksız dinleyesi Dilsiz kulaksız sızın can gerek anlayas Yetmi iki dil satıraya sınırdı Bu dizeler 13 yzylda yaayan bir Türk dñr ne aittir UNESCO

Dinosaurs in Fantastic Fiction Allen A. Debus,2006 This literary survey examines how paleoliterature originated developed and matured from its inception to the present day It follows trends on the crafting of classic dinosaurs

investigating the figurative and metaphoric meaning of fictional dinosaurs and related prehistoria An appendix provides brief summaries of dinosaur texts organized alphabetically by author Provided by publisher *That Reminds Me of a Story* James E. Collins, 2023-11-14 I probably watch too much news read too many newspapers magazines and blogs and have too many conversations with people about politics Often in my mind I consider myself better than politicians I may be better than some but not all of them What I notice is that I make similar mistakes to those in charge Because of this I m willing to say I m not perfect And I have the experiences to prove it Join me in a journey to tell people why I should not run for public office nor should I receive any write in votes in the next election If you do opt for writing my name in on your ballot and are uncertain how ask for assistance from the helpful people at your voting location and write in my full name James E Collins You may not change an election but maybe it will change your outlook knowing that you can vote for whom you want to not someone you are being told to vote for As an afterthought please don t tell me about ending a sentence with a preposition I tend to do that Understanding and Developing Science Teachers' Pedagogical Content Knowledge John Loughran, Amanda Berry, Pamela Mulhall, 2012-07-31 There has been a growing interest in the notion of a scholarship of teaching Such scholarship is displayed through a teacher s grasp of and response to the relationships between knowledge of content teaching and learning in ways that attest to practice as being complex and interwoven Yet attempting to capture teachers professional knowledge is difficult because the critical links between practice and knowledge for many teachers is tacit Pedagogical Content Knowledge PCK offers one way of capturing articulating and portraying an aspect of the scholarship of teaching and in this case the scholarship of science teaching The research underpinning the approach developed by Loughran Berry and Mulhall offers access to the development of the professional knowledge of science teaching in a form that offers new ways of sharing and disseminating this knowledge Through this Resource Folio approach comprising CoRe and PaP eRs a recognition of the value of the specialist knowledge and skills of science teaching is not only highlighted but also enhanced The CoRe and PaP eRs methodology offers an exciting new way of capturing and portraying science teachers pedagogical content knowledge so that it might be better understood and valued within the profession This book is a concrete example of the nature of scholarship in science teaching that is meaningful useful and immediately applicable in the work of all science teachers preservice in service and science teacher educators It is an excellent resource for science teachers as well as a guiding text for teacher education Understanding teachers professional knowledge is critical to our efforts to promote quality classroom practice While PCK offers such a lens the construct is abstract In this book the authors have found an interesting and engaging way of making science teachers PCK concrete useable and meaningful for researchers and teachers alike It offers a new and exciting way of understanding the importance of PCK in shaping and improving science teaching and learning Professor Julie Gess Newsome Dean of the Graduate School of Education Willamette University This book contributes to establishing CoRes and PaP eRs as immensely valuable tools to illuminate

and describe PCK The text provides concrete examples of CoRes and PaP eRs completed in real life teaching situations that make stimulating reading The authors show practitioners and researchers alike how this approach can develop high quality science teaching Dr Vanessa Kind Director Science Learning Centre North East School of Education Durham University
