Region, Race, and Class in the Making of Colombia Alfonso Múnera, 2023-08-18 This pioneering translation of Alfonso M nera s seminal work El fracaso de la naci n presents a new interpretation and innovative perspective on canonical Colombian history and the failure of the Colombian nation to English speaking readers Mainstream historiography depicts Colombian independence as the achievement of European descendent elites only downplaying the role and importance of regional subaltern classes M nera s well researched account challenges theoretical political and cultural interventions and shows that these subaltern groups were pivotal to achieving independence from Spain It was their organizing and pressing for freedom from colonial domination that ultimately brought about independence in Cartagena and later to the whole country Yet M nera demonstrates that these differing regional elites meant that a single coherent unity across New Granada was not possible a

point that would ultimately doom subsequent nation building efforts Offering a truly decolonizing perspective one that has remained hidden from official accounts of Colombian independence scholars and researchers in political science history sociology and anthropology will welcome the opportunity to read this work for the first time in translation
