Seaside Piers:

Lancashire's Seaside Piers Martin Easdown,2009-11-19 In this a companion volume to his definitive history of Yorkshires pleasure piers Martin Easdown turns his expert attention westward to the Lancashire coast His highly illustrated survey of the piers constructed at famous resorts like Blackpool Morecambe Southport and St Annes on Sea celebrates structures that are among the most exuberant and evocative of the Victorian age Each of these historic piers has its own character and story yet all of them represent the optimistic style of the British seaside resort at the peak of its popularity In those days the Lancashire coast and Blackpool in particular became the principal holiday destination for the workers of the nearby industrial towns during their Wakes Weeks The piers that survive are fascinating relics of that lost age In this meticulously researched account Martin Easdown describes how these extraordinary buildings came to be constructed how they were designed and financed how they were used and how hazards beset them fire storm ship collision war damage and ever present threat of insolvency His entertaining book reveals and records a neglected aspect of the history of Lancashire and the northwest

"Iron, Ornament and Architecture in Victorian Britain " Paul Dobraszczyk,2017-07-05 Vilified by leading architectural modernists and Victorian critics alike mass produced architectural ornament in iron has received little sustained study since the 1960s yet it proliferated in Britain in the half century after the building of the Crystal Palace in 1851 a time when some architects engineers manufacturers and theorists believed that the fusion of iron and ornament would reconcile art and technology and create a new modern architectural language

Comprehensively illustrated and richly researched Iron Ornament and Architecture in Victorian Britain presents the most

sustained study to date of the development of mechanised architectural ornament in iron in nineteenth century architecture its reception and theorisation by architects critics and engineers and the contexts in which it flourished including industrial buildings retail and seaside architecture railway stations buildings for export and exhibition and street furniture Appealing to architects conservationists historians and students of nineteenth century visual culture and the built environment this book offers new ways of understanding the notion of modernity in Victorian architecture by questioning and re evaluating both Victorian and modernist understandings of the ideological split between historicism and functionalism and ornament and structure

Sustainable Tourism VIII S. Syngellakis,U. Probstl-Haider,F. Pineda,2018-07-23 This volume includes papers from the 8th International Conference on Sustainable Tourism Today tourism is becoming accessible to a growing number of people and is an important component of development not only in economic terms but also for knowledge and human welfare This collection of research aims to find ways to protect the natural and cultural landscape through the development of new solutions which minimise the adverse effects of tourism The phenomenon has many more advantages than disadvantages New forms of economic development and increasing wealth of human societies depend on tourism Our knowledge of the world now includes a strong component due to tourism Human welfare has physiological and psychological elements which tourism promotes both because of the enjoyment of knowing new territories and increasing contacts with near or far away societies and cultures The tourism industry has nevertheless given rise to some serious problems including social costs and ecological impacts Many ancient local cultures have practically lost their identity Their societies have oriented their economy only to this industry Both the natural and cultural rural or urban landscapes have also paid a high price for certain forms of tourism These problems will persist if economic benefit is the only target leading to economic gains that eventually become ruinous It is also a grave error to disregard the fact that visitors nowadays are increasingly demanding in cultural and environmental terms The Global Change is a set of natural environmental changes that are strongly affected by technological and social developments Natural changes are inherent in the Earth s ecosystem the ecosphere Also technological and social changes are inherent to mankind the noosphere and are now becoming widespread Cities are growing rapidly and industry requires increasingly larger areas Many traditional rural areas are being abandoned Tourism should also play an important role in this context Thus interestingly many historic agricultural districts have maintained or even recovered their local population numbers through intelligent strategies of tourism focused on nature and rural culture Natural landscapes and biodiversity are becoming increasingly appreciated The tourism industry must be able to respond to these aspirations

Piers of England and Wales Steve Edmunds,2025-03-15 A photographic journey exploring the seaside piers of England and Wales capturing the variety of life and structures to be found around our coast

Live Cinema Sarah Atkinson, Helen W. Kennedy, 2017-12-28 Live Cinema is a term used to capture a diverse range of experiences that incorporate a live element in relation to a film's exhibition. The live augmentation of cinema screenings is not a new phenomenon; indeed, this tendency is present throughout the entire history of cinema in the form of live musical accompaniments to silent screenings, showmanship practices, and cult film audience behaviours. The contemporary revival of experiential cinema captured within this volume presents instances where the live transcends the mediated and escapes beyond the boundaries of the auditorium. Our contributors investigate film exhibition practices that include synchronous live performance, site-specific screenings, technological intervention, social media engagement, and all manner of simultaneous interactive moments including singing, dancing, eating, and drinking. These investigations reveal new cultures of reception and practice, new experiential aesthetics, and emergent economies of engagement. This collection brings together fifteen contributions that together trace the emergence of a vivid new area of study. Drawing on rich, diverse, and interdisciplinary fields of enquiry, this volume encapsulates a broad range of innovative methodological approaches, offers new conceptual frameworks, and new critical vocabularies through which to describe and analyse the emergent phenomena of Live Cinema.
