

Seasonal Affective Disorder (SAD): More Than the Winter Blues

As the days get shorter and there is less daylight, you may start to feel sad. While many people experience the “winter blues,” some people may have a type of depression called seasonal affective disorder (SAD).

The first step is to determine how much your symptoms interfere with your daily life.

Do you have mild symptoms that have lasted less than 2 weeks?

- Feeling down but still able to take care of yourself and others
- Having some trouble sleeping
- Having less energy than usual but still able to do your job, schoolwork, or housework

These activities can make you feel better:

- Doing something you enjoy
- Going outside in the sunlight
- Spending time with family and friends
- Eating healthy and avoiding foods with lots of sugar

If these activities do not help or your symptoms are getting worse, talk to a health care provider.

Do you have more severe symptoms that have lasted more than 2 weeks?

- Social withdrawal
- Oversleeping
- Gaining weight
- Craving foods with lots of sugar like cakes, candies, and cookies

Seek professional help:

- Light therapy
- Psychotherapy (talk therapy)
- Medications
- Vitamin D supplements

Celeste A. Peters

Seasonal Affective Disorder:

Seasonal Affective Disorder Timo Partonen, S. R. Pandi-Perumal, 2010 Seasonal affective disorder SAD or winter depression is a mood disorder related to the change in the seasons and lack of exposure to daylight. It affects 1 in 100 adults in western countries. SAD is a rare example of a psychiatric disorder with a clear identifiable biological cause. The new edition of this award-winning book brings together distinguished scientists and opinion leaders to discuss the current and anticipated developments in the study and care of Seasonal Affective Disorder. Highlighting the clinical diagnosis and management of Seasonal Affective Disorder, SAD, this book provides a valuable resource for all whom are involved in the health care for patients with SAD. This book deals with the range of therapeutic measures that are available for the treatment of SAD. In addition, this book elucidates potential areas of research that have emerged such as the study of the circadian pacemaker and the night time sleep structure and their interaction that influences mood.

Positive Options for Seasonal Affective Disorder (SAD) Fiona Marshall, Peter Cheevers, 2003 SAD is depression caused by lack of natural light. People who have limited exposure to light and people who live in northern climates are most likely to suffer from SAD, though many people undergo seasonal variations in mood, energy, appetite, and sleep. With SAD, sufferers experience an exaggerated version of these changes. Full-blown SAD can be extremely debilitating; the sufferer finds it difficult to carry out normal activities. The disease is often undiagnosed because the symptoms are general enough that they can be attributed to a variety of causes. SAD can be treated with or without medicine, depending on the severity. The book describes helpful changes to eating patterns and vitamin and mineral supplements, ways of adapting your lifestyle to take advantage of the daylight as well as lightbox therapies. The book distinguishes SAD from classic depression, chronic fatigue, and other illnesses with similar symptoms. It also explains the alarming physical effects of lack of sunlight, which include a greater risk of heart disease, osteoporosis, and even cancer. Written in an informal style with helpful tips and advice, this book is important for anyone who ever questioned their feelings on a cloudy day or during the winter months.
