Seasonal Variations Of The Eskimo A Study In Social Morphology:

Seasonal Variations of the Eskimo Marcel Mauss, 2013-10-08 Seasonal Variations of the Eskimo is one of the first books in anthropology to adopt a sociological approach to the analysis of a single society Mauss links elements of anthropology and human geography arguing that geographical factors should be considered in relation to a social context in all its complexity The work is an illuminating source on the Eskimo and a proto type of what an anthropologist should do with ethnographic data and exerted considerable influence on the development of social anthropology English translation first published in 1979 □ Mauss, Marcel, and Henri Beuchat 1979(1904-5), Seasonal variations of the Eskimo ,1991

Reintroducing Marcel Mauss Christian Papilloud, 2023-11-24 This reintroduction to the life and work of Marcel Mauss highlights his coherent and original thought both as an academic and an engaged intellectual of his time Since his work regained attention in social sciences in the later 20th century Reintroducing Marcel Mauss also emphasises the progression of research on Mauss s thought bringing to light various neglected aspects of his scientific project including his political commitment and writings With a review of the contemporary research on Mauss s legacy it offers a fuller understanding of the questions with which he was concerned questions which converged in the challenge of working out alternative ways for a social life that promotes a genuinely social society inspired by socialist and cooperative values It will therefore appeal to scholars of sociology and anthropology with interests in the history and development of sociology and the contemporary importance of classical social theory □ The Social Life of Climate Change Models Kirsten Hastrup, Martin Skrydstrup, 2013 Drawing on a combination of perspectives from diverse fields this volume offers an anthropological study of climate change and the ways in which people attempt to predict its local implications showing how the processes of knowledge making among lay people and experts are not only comparable but also deeply entangled Through analysis of predictive practices in a diversity of regions affected by climate change including coastal India the Cook Islands Tibet and the High Arctic and various domains of scientific expertise and policy making such as ice core drilling flood risk modelling and coastal adaptation the book shows how all attempts at modelling nature s course are deeply social and how current research in climate contributes to a rethinking of nature as a multiplicity of modalities that impact social life **The New Blackwell**

Subsistence and System R. F. Ellen, 1982-09-30 Human ecology is ultimately part of a general theory of society This is the argument developed here by Roy Ellen whose exploration of the interplay between social organization and ecology in small scale subsistence systems has direct bearings both on the investigation of human environmental relations in general and on contemporary social theory He argues that while ecological study of non industrial societies cannot be elevated to the status of theory domain or discipline it can be represented as a single problematic that historically has acquired some degree of autonomy and which continues to make a significant contribution to a wider anthropology Dr Ellen introduces his subject matter through an extended and systematic discussion of some major frameworks developed within the last hundred years to examine and explain facets of the relationship between culture social organization and the environment determinism possibilism cultural ecology systems theory and ideas derived from modern biology He follows this with a detailed review and appraisal of important recent research involving the use of ecological models methods and data This original and innovative study of the pre eminently social character of human ecological relations will be of considerable interest to all students and researchers concerned with understanding the nature of the relationship between human beings and their environments

Missing Persons Mary Douglas,Steven Ney,1998-11-04 The Western cultural consensus based on the ideas of free markets and individualism has led many social scientists to consider poverty as a personal experience a deprivation of material things and a failure of just distribution Mary Douglas and Steven Ney find this dominant tradition of social thought about poverty and well being to be full of contradictions They argue that the root cause is the impoverished idea of the human person inherited through two centuries of intellectual history and that two principles the idea of the solipsist self and the idea of objectivity cause most of the contradictions Douglas and Ney state that Economic Man from its semitechnical niche in eighteenth century economic theory has taken over the realms of psychology consumption public assistance political science and philosophy They say that by distorting the statistical data presented for policy analysis the ideas of the solipsist self and objectivity indeed often protect a political bias The authors propose to correct this by revising the current model of the person Taking cultural bias into account and giving full play to political dissent they restore the persons who have been missing from the social science debates Drawing from anthropology economics political science and sociology the authors set forth a fundamental critique of the social sciences Their book will find a wide audience among social scientists and will also interest anyone engaged in current discussions of poverty This book is a copublication with the Russell Sage Foundation
