Sailing Alone Richard J. King, 2024-05-21 2024 National Outdoor Book Award Silver Medal Winner A masterfully curated collection You don't have to be a sailor to be blown away by this fascinating bighearted book Nathaniel Philbrick author of *In the Heart of the Sea* *Travels with George* and *Second Wind* A story as vast and exhilarating as the open ocean itself *SAILING ALONE* chronicles the daring disastrous and often absurd history of those who chose to sail across the ocean in very small boats alone Sailing by yourself out of sight of land can be invigorating and terrifying compelling and tedious and sometimes all of the above in one morning But it is also a wide expanse of time in which to think *Sailing Alone* tells the story of some of the remarkable people who over the last four centuries have spent weeks and months moving slowly over the world's largest laboratory a capricious and startling place in which to observe oneself the weather the stars and countless sea creatures from the tiniest to the most massive and threatening Richard J King profiles characters famous diverse international and obscure from Joshua Slocum of 1898 to modern teenagers daring to take the challenge They see strange hallucinations lie to us and themselves on their travel logs encounter sharks befriend birds and experience ESP all part of the unnerving reality of extended isolation And some disappear altogether *Sailing Alone* also recounts the author's own nearly catastrophic solo crossing of the Atlantic and the mystery of his inexplicable survival one sunny afternoon An enormously engaging new book for skippers and armchair voyagers alike

Emigrating Beyond Earth Cameron M Smith, Evan T. Davies, 2012-06-09 *Emigrating Beyond Earth* puts space colonization into the context of human evolution Rather than focusing on the technologies and strategies needed to colonize space the authors examine the human and societal reasons for space colonization They make space colonization seem like a natural step by demonstrating that if it will continue the human species 4 million year old legacy of adaptation to difficult new environments The authors present many examples from the history of human expansion into new environments including two amazing tales of human colonization the prehistoric settlement of the upper Arctic around 5 000 years ago and the colonization of the Pacific islands around 3 000 years ago which show that space exploration is no more about rockets and robots than Arctic exploration was about boating
