Venetian Ships and Shipbuilders of the Renaissance Frederic Chapin Lane, 2018-12-01 ORIGINALLY published in 1934 this major study by Frederic Lane tracks the rise and decline of the great shipbuilding industry of Renaissance Venice Drawing on a wealth of archival sources Lane presents detailed descriptions of the Venetian arsenal including the great galleys that doubled as cargo ships and warships the sixteenth century round ships which introduced dramatic innovations in rigging and were less vulnerable to attack than the galleys and the majestic galleons whose straight lines and greater speed made them ideal for merchantmen but whose narrowness made them liable to capsize if loaded with artillery Lane also includes vivid accounts of the rivalries between the famous shipbuilders of the period There was the impassioned competition between Leonardo Bressan and Marco Francesco Rosso to design the quickest lightest galley a contest that Bressan won when Rosso was crushed to death the race between Vettor Fausto and Matteo Bressan to build the best galleon for use against pirates and the rivalry between Bernardo di Bernardo and Nicol Palopano to be the master builder of great merchant galleys Additional chapters detail the actual process of ship construction from the design stage to framing and ribbing the hull to building the rigging the organization and activity of the shipbuilders craft guilds and the various private shipyards and the development and management of the Arsenal Tables and appendixes detail the types measurements number and capacity of the ships as well as the wages of the shipbuilders
