Looking Back And Thinking Forward Reexaminations Of Teaching And Schooling:

Looking Back and Thinking Forward Lillian Weber, 1997 This book is a forward looking rather than retrospective collection of the influential writings of Lillian Weber These essays many of which are being published here for the first time represent the mature thinking of a progressive educator who after 20 years of teaching young children initiated dramatic changes in the public schools of New York City This important text reclaims the importance of teachers being seen by themselves and by others as intelligent capable central and committed to children s growth confronts the issue of equity for minority students and shows how it can be interpreted in the approach both to curriculum and to the school s role in the community probes the meaning of educating all children and of what education should be in a democracy looks at the school teachers parents and community as elements of the ecology of the child s educative experience and offers an original approach to the question of morality in education

Starting Strong Patricia F. Carini, 2001 In an elegant affirmation of human capacity and creativity Patricia Carini counters high stakes testing the pathologizing of children and the unrelenting critique of the public schools with a persuasive account of how children all children actively make sense of the world and their experience through the making of works such as drawings constructions and writings This engaging and vivid account of the day to day possibilities of learning and teaching and ultimately the remaking of the schools is indispensable reading for anyone called to teach or committed to a liberating education for all children This is a beautifully written book I am inspired with each page Vito Perrone Harvard University In this precious book by one of our most powerful thinkers Pat Carini takes us deep deep into the lives of children into classrooms and schools into the human heart of education at its best William Ayers University of Illinois at Chicago A thoughtful book that challenges us to embrace an expansive vision of education Throughout this powerful collection of essays Pat Carini reminds us to place the value of each individual at the center of all we do in schools Judy Buchanan National Writing Project In this book Carini draws on children s and teachers stories poetry and philosophy as she attends to making visible for the reader the humanness of education Ofelia Garc a Dean School of Education Long Island University

From Another Angle Margaret Himley, Patricia F. Carini, 2000-03 This volume represents the first effort to present and teach the descriptive processes philosophy and values developed at the Prospect Archives and Center for Education and Research in North Bennington Vermont Through story and essay it introduces a disciplined collaborative method for understanding children as thinkers and learners called the descriptive review of the child Developed through the Prospect Center under the leadership of Patricia F Carini the descriptive review is a mode of inquiry that draws on the rich detailed knowledge teachers and parents have of children and on their ability to describe those children in full and balanced ways so that they become visible as complex persons with particular strengths interests and capacities In an educational climate that calls increasingly for standardization this book is a timely resource for educators parents and administrators who value individual human capacity
