Loose Alliances:

Loose Alliances Mike Seeley, 2000-03-01 **Peace Research** Peter Wallensteen, 2013-03-01

Comprising essays by Peter Wallensteen this book presents an overview of the thematic development of peace research which has become one of the most dynamic and innovative areas of war and conflict studies. Peace research began in the 1950s when centres were formed in the USA and Europe and today there are research institutes and departments on every continent with teaching and research programs in most countries and peace researchers contribute to the development of international studies development research and security analysis. Prof Wallensteen has been a witness to much of this since forming the Department of Peace and Conflict Research at Uppsala University in the late 1960s and this book brings together thirteen of his articles with five new essays in one volume. The book presents articles on such key issues in peace research as the causes of war conflict data conflict diplomacy non violent sanctions and third party diplomacy. In this way it demonstrates how basic research can be conducted in fields often seen as unresearchable and too complicated to deal with. This volume shows that it is a matter of developing definitions creating valid measures and finding ways of collecting information recognising that innovations of this kind require supportive research environments. Furthermore the results are not only useful for the growth of research activity itself but for finding ways of dealing with actual conflicts. Thus attention is also paid here to conflict prevention peace agreements sanctions and third party activity for preventing and ending armed conflict and building a lasting post war peace. This book will be of great interest to all students of peace studies conflict resolution war and conflict studies development studies and IR security studies in general.

Why We Fight Christopher Blattman, 2023-04-18

Why We Fight reflects Blattman's expertise in economics political science and history. Blattman is a great storyteller with important insights for us all. Richard H Thaler winner of the Nobel Memorial Prize in Economic Sciences and coauthor of *Nudge* Engaging and profound this deeply searching book explains the true origins of warfare and it illustrates the ways that despite some contrary appearances human beings are

capable of great goodness Nicholas A Christakis author of Blueprint The Evolutionary Origins of a Good Society Why did Russia attack Ukraine Will China invade Taiwan and launch WWII Why has the number of civil wars reached their highest level in decades Why are so many cities in the Americas plagued with violence And finally what can any of us do about it It feels like we re surrounded by violence Each conflict seems unique and insoluble With a reason for every war and a war for every reason what hope is there for peace Fortunately it s simpler than that Why We Fight boils down decades of economics political science psychology and real world interventions giving us some counterintuitive answers to the question of war The first is that most of the time we don t fight Around the world there are millions of hostile rivalries yet only a fraction erupt into violence Most enemies loathe one another in peace The reason is simple war is too costly to fight It s the worst way to settle our differences In those rare instances when fighting ensues that means we have to ask ourselves What kept rivals from the normal grudging compromise The answer is always the same It s because a society or its leaders ignored those costs of war or were willing to pay them Why We Fight shows that there are just five ways this happens From warring states to street gangs ethnic groups and religious sects to political factions Christopher Blattman shows that there are five reasons why violent conflict occasionally wins over compromise Through Blattman s time studying Medell n Chicago Liberia Northern Ireland and more we learn the common logics driving vainglorious monarchs dictators mobs pilots football hooligans ancient peoples and fanatics Why We Fight shows that war isn t a series of errors accidents and emotions gone awry There are underlying strategic ideological and institutional forces that are too often overlooked So how to get to peace Blattman shows that societies are surprisingly good at interrupting and ending violence when they want to even gangs do it The best peacemakers tackle the five reasons shifting incentives away from violence and getting rivals back to dealmaking And they do so through tinkering not transformation Realistic and optimistic this is a book that lends new meaning to the adage Give peace a chance
