The Politics of Human Nature Thomas Fleming,1988-01-01 The effort to understand human nature in a political context is a daunting challenge that has been undertaken in a variety of ways and by a myriad of disciplines through the ages From Plato to Hobbes and Burke to Wallas and Oakeschott in our era efforts have been made to provide some organic framework for the political study of mankind What has added greatly to the complexity of the task is the increasing denial even rejection in the positivist and behaviorist traditions of the very notion of a human nature The work can be described as a series of interlocking propositions the proverbial view of human nature can be explained by evolutionary theory Biological differences between men and women are responsible for family community and group life Social evolution goes through stages which are recapitulated in the moral life of individuals A well defined federal system mirrors human development And finally for Fleming most problems in social and political life stem from violations of this federalist system Fleming s volume

takes up a variety of issues sex and gender differences democracy and dictatorship individual and familial patterns of association He does so in the context of showing how forms of legitimate authority such as families communities and nations establish such authority by appeals to human nature and that these appeals while presumably resting on empirical evidence also confirm the existence of normative structures Fleming's work is an effort of synthesis that is sure to arouse discussion and debate It represents a serious addition to a literature retrieved from the historical dustbins to which it has been repeatedly consigned

Human Families Stevan Harrell, 2018-02-23 This detailed study maps variations in family systems throughout the world focusing on the ways families cooperate and interact with their societies Harrell describes families in nomadic bands traditional African societies Polynesian and Micronesian societies native societies of the Pacific Northwest coast preindustrial class societies and modern industrial societies His extensive case studies are clearly illustrated with unique diagrams that allow comparison of complex groups and family processes extending over a generation This detailed study maps the variations in family systems throughout the world focusing on the ways families interact with their societies Tracing the developmental cycle of families in a wide range of times and places Stevan Harrell shows how family members in different societies must cooperate to perform various activities and thus organize themselves in particular ways Within six major divisions the book describes families in nomadic bands traditional African societies Polynesian and Micronesian societies native societies of the Pacific Northwest coast preindustrial class societies and modern industrial societies Within each group the authors copious examples demonstrate the variation from one family system to another His case studies are clearly illustrated with a unique set of diagrams that allow comparison of complex groups and of family processes extending over a generation Scholars and advanced students alike will find this ambitious book an invaluable resource
