Geoffrey M. Hodgson

Marriage Debt And The Estates System English Landownership 1650 195:

Professors of the Law David Lemmings, 2000-05-11 What happened to the culture of common law and English barristers in the long eighteenth century In this wide ranging sequel to *Gentlemen and Barristers The Inns of Court and the English Bar* 1680 1730 David Lemmings not only anatomizes the barristers and their world he also explores the popular reputation and self image of the law and lawyers in the context of declining popular participation in litigation increased parliamentary legislation and the growth of the imperial state He shows how the bar survived and prospered in a century of low recruitment and declining work but failed to fulfil the expectations of an age of Enlightenment and Reform By contrast with the important role played by the common law and lawyers in seventeenth century England and in colonial America it appears that the culture and services of the barristers became marginalized as the courts concentrated on elite clients and parliament became the primary point of contact between government and population In his conclusion the author suggests that the failure of the bar and the judiciary to follow Blackstones mid century recommendations for reforming legal culture and delivering the Englishmans birthrights significantly assisted the growth of parliamentary absolutism in government *Marriage, Debt, and the Estates System* H. J. Habakkuk, 1994 This major study by a leading British historian examines the social and legal foundations of the British ruling class the great landlords and the gentry from the late seventeenth century when it freed itself from many of the constraints of royal power to the twentieth century when it was subsumed by mass democracy Habakkuk s comprehensive book addresses the question of why in the first industrial nation the landed elite so long retained its role This thorough examination of the structure of the landed family its estate and its relations with other social groups sheds light on this problem and makes a major contribution to historical debate It will be of interest to scholars and students of early modern and modern British history especially social economic legal and family historians **The Wealth of a Nation** Geoffrey M. Hodgson, 2025-11-18 How the development of legal and financial institutions transformed Britain into the world s first capitalist country Modern capitalism emerged in England in the eighteenth century and ushered in the Industrial Revolution though scholars have long debated why Some attribute the causes to technological change while others point to the Protestant ethic liberal ideas and cultural change *The Wealth of a Nation* reveals the crucial developments in legal and financial institutions in the seventeenth and eighteenth centuries that help to explain this dramatic transformation Offering new perspectives on the early history of capitalism Geoffrey Hodgson describes how for the emerging British economy pressures from without were as important as evolution from within He shows how intensive military conflicts overseas forced the state to undertake major financial administrative legal and political reforms The resulting institutional changes not only bolstered the British war machine they fostered the Industrial Revolution Hodgson traces how Britain s war capitalism led to an expansion of its empire and a staggering increase in the slave trade and how the institutional innovations that radically transformed the British economy were copied and adapted by countries around the world A landmark work of scholarship

The Wealth of a Nation sheds light on how external factors such as war gave rise to institutional arrangements that facilitated finance banking and investment and offers a conceptual framework for further research into the origins and consolidation of capitalism in England

Men, Women and Property in England, 1780-1870 R. J. Morris, 2005-02-03

This is an innovative study of middle class behaviour and property relations in English towns in Georgian and Victorian Britain Through the lens of wills family papers property deeds account books and letters the author offers a reading of the ways in which middle class families survived and surmounted the economic difficulties of early industrial society He argues that these were essentially networked families created and affirmed by a gift network of material goods finance services and support with property very much at the centre of middle class survival strategies His approach combines microhistorical studies of individual families with a broader analysis of the national and even international networks within which these families operated The result is a significant contribution to the history and to debates about the place of structural and cultural analysis in historical understanding

Monarchy Transformed Robert von Friedeburg, John Morrill, 2017-08-17

Until the 1960s it was widely assumed that in Western Europe the New Monarchy propelled kingdoms and principalities onto a modern nation state trajectory John I of Portugal 1358 1433 Charles VII 1403 1461 and Louis XI 1423 1483 of France Henry VII and Henry VIII of England 1457 1509 1509 1553 Isabella of Castile 1474 1504 and Ferdinand of Aragon 1479 1516 were by improving royal administration by bringing more continuity to communication with their estates and by introducing more regular taxation all seen to have served that goal In this view princes were assigned to the role of developing and implementing the sinews of state as a sovereign entity characterized by the coherence of its territorial borders and its central administration and government They shed medieval traditions of counsel and instead enforced relations of obedience toward the emerging state

Transactions of Minors in English and German Law Carlo Brunold ,2024-07-29 Carlo Brunold s comparative legal analysis of the limitations placed on minors ability to enter into and execute transactions in English and German law distinguishes between the laws of contract property and restitution of unjust enrichment to reveal the strengths and weaknesses of the two jurisdictions strongly differing approaches Whereas under English law minors can in general enter into contracts and perform their duties despite the fact that these contractual duties cannot be enforced against them German law shifts the control over minors transactions almost entirely to their parents who can also enter into and execute transactions on behalf of their children The latter concept is alien to English law even though parents in both jurisdictions are subject to fiduciary duties with regard to their children s assets

The Matrimonial Trap Laura E. Thomason,2013-12-05 Mary Delany s phrase the matrimonial trap illuminates the apprehension with which genteel women of the eighteenth century viewed marriage These women were generally required to marry in order to secure their futures yet hindered from freely choosing a husband They faced marriage anxiously because they lacked the power either to avoid it or to define it for themselves For some women the written word became a means by which to exercise the power that they otherwise lacked Through their writing they made the inevitable acceptable while registering their dissatisfaction with their circumstances Rhetoric exercised both in public and in private allowed these women to define their identities as individuals and as wives to lay out and test the boundaries of more egalitarian spousal relationships and to criticize the traditional marriage system as their culture had defined it
