Married People:

Love in America Francesca M. Cancian, 1990-08-31 In the last twenty five years Americans have gained considerable freedom in their personal lives Relationships are now more flexible and self development has become a primary goal for both men and women Most scholars have criticized this trend to greater freedom arguing that it undermines family bonds and promotes selfishness and extreme independence Francesca Cancian is more optimistic In this book she shows that many American couples succeed in combining self development with commitment and that interdependence not independence is their ideal In interdependent relationships love and self development do not conflict but reinforce each other *Love in America* compares traditional forms of marriage with these newer forms of close relationships Starting with the nineteenth century Cancian shows how gender roles became polarized with love which was identified with emotional expression no practical help being the responsibility of women while self development was regarded as a masculine concern These traditional images of love and relationships are still held by many Americans today even though as Cancian points out this can lead to marital conflict and individual stress and illness By contrast new images of love emphasizing self development for men and women and flexible androgynous roles began to emerge around 1900 accelerating in the 1960s She concludes that this trend to self development and androgyny will continue but that whether it will lead to more interdependent relationships or to more independence and isolation depends partly on economic and political changes in the wider society The evidence for Cancian's argument comes from sociological historical and psychological sources Her book will interest readers in these disciplines as well as appeal to a wide general audience

How to Pick a Mate, The Guide to a Happy Marriage Clifford Rose Adams, 2022-04-06 Excerpt As far as we know this is the first time anyone has written a book attempting to put mate selection on a sensible basis despite the fact that sooner or later almost everybody selects one A good many people resent the idea of an outsider telling them how they should pick a mate They think it smacks of meddling Marriage is something sacred and personal It should not be done according to rules We heartily sympathize Unfortunately however marriages are not made in Heaven Usually people marry by hunch or impulse or because their parents think it is a good match or because they get themselves so deeply involved romantically that marrying seems the only proper thing to do Too frequently such methods merely mess up a couple of people's lives More than a third of all the millions of marriages undertaken in the last ten years are in trouble Many are already dissolved Many more soon will be A great deal of research and counseling has now been done in the field of marriage and the findings validated At Penn State for example hundreds of

couples who were tested before marriage at the Marriage Counseling Service are checked periodically after marriage to find how they are making out Of all the marriages which the service predicted would be successful not one has yet ended in divorce or separation Most of the people who went ahead despite the clinic s cautions are already in serious trouble or have been divorced As a result of many such investigations reliable information is available on the kinds of people who make the best mates and on the causes of marriage success and failure In this book we have tried to include those findings which should be most helpful and interesting to all people involved in love or marriage but particularly to people who sooner or later will be taking unto themselves a mate It is not our intention to lay down a set of rules for people to follow But we hope that after reading this book you will be more enlightened in your hunches than you might be otherwise and be a much happier and more desirable mate yourself

You'll Do Marcia A. Zug, 2024-01-09 An illuminating and thought provoking examination of the uniquely American institution of marriage from the Colonial era through the MeToo age Perfect for fans of Rebecca Solnit and Rebecca Traister Americans hold marriage in such high esteem that we push people toward it reward them for taking part in it and fetishize its benefits to the point that we routinely ignore or excuse bad behavior and societal ills in the name of protecting and promoting it In eras of slavery and segregation Blacks sometimes gained white legal status through marriage Laws have been designed to encourage people to marry so that certain societal benefits could be achieved the population would increase women would have financial security children would be cared for and immigrants would have familial connections As late as the Great Depression poor young women were encouraged to marry aged Civil War veterans for lifetime pensions The widely overlooked problem with this tradition is that individuals and society have relied on marriage to address or dismiss a range of injustices and inequities from gender and race based discrimination sexual violence and predation to unequal financial treatment One of the most persuasive arguments against women's right to vote was that marrying and influencing their husband's choices was just as meaningful if not better Through revealing storytelling Zug builds a compelling case that when marriage is touted as the solution to such problems it absolves the government and society of the responsibility for directly addressing them
