## **Mars Effect A French Test Of Over 1000 Sports Champions:**

**Beyond the Hoax** Alan Sokal, 2010-02-11 In 1996 Alan Sokal a Professor of Physics at New York University wrote a paper for the cultural studies journal *Social Text* entitled *Transgressing the Boundaries Towards a transformative hermeneutics of quantum gravity* It was reviewed accepted and published Sokal immediately confessed that the whole article was a hoax a cunningly worded paper designed to expose and parody the style of extreme postmodernist criticism of science The story became front page news around the world and triggered fierce and wide ranging controversy Sokal is one of the most powerful voices in the continuing debate about the status of evidence based knowledge In *Beyond the Hoax* he turns his attention to a new set of targets pseudo science religion and misinformation in public life Whether my targets are the postmodernists of the left the fundamentalists of the right or the muddle headed of all political and apolitical stripes the bottom line is that clear thinking combined with a respect for evidence are of the utmost importance to the survival of the human race in the twenty first century The book also includes a hugely illuminating annotated text of the Hoax itself and a reflection on the furore it provoked

**The Matter of Facts** Gareth Leng, Rhodri Ivor Leng, 2020-03-18 How biases the desire for a good narrative reliance on citation metrics and other problems undermine confidence in modern science Modern science is built on experimental evidence yet scientists are often very selective in deciding what evidence to use and tend to disagree about how to interpret it In *The Matter of Facts* Gareth and Rhodri Leng explore how scientists produce and use evidence They do so to contextualize an array of problems confronting modern science that have raised concerns about its reliability the widespread use of inappropriate statistical tests a shortage of replication studies and a bias in both publishing and citing positive results Before these problems can be addressed meaningfully the authors argue we must understand what makes science work and what leads it astray The myth of science is that scientists constantly challenge their own thinking But in reality all scientists are in the business of persuading other scientists of the importance of their own ideas and they do so by combining reason with rhetoric Often they look for evidence that will support their ideas not for evidence that might contradict them often they present evidence in a way that makes it appear to be supportive and often they ignore inconvenient evidence In a series of essays focusing on controversies disputes and discoveries the authors vividly portray science as a human activity driven by passion as well as by reason By analyzing the fluidity of scientific concepts and the dynamic and unpredictable development of scientific fields the authors paint a picture of modern science and the pressures it faces

*Dreaming the Future* Clifford A. Pickover, 2001-03 For countless generations people of every culture have practiced a broad range of dramatic and sometimes frightening techniques to peer into the future In this fascinating book acclaimed author Clifford Pickover presents a nearly exhaustive list of fortune telling techniques from the ominous practice of human sacrifice to reading clues on the Internet Pickover not only explores a vast and colorful array of methods of prediction including dreaming he also evaluates the accuracy of some of the most astonishing prophecies made throughout history Just

how accurate were such famous soothsayers as Nostradamus the Delphic Oracle Edgar Cayce the children of Fatima whose third vision has only recently been revealed and dozens more This book takes us one step further by exploring our own inner psyches Why does looking into the future provide a source of solace in a world filled with uncertainty disease and chance And why do the most noted prognosticators so often warn of natural catastrophes of biblical proportions such as earthquakes and floods that will signal the end of the world Through insight and wit Pickover will unlock the door of your imagination with engrossing mysteries intriguing illustrations and even modern patents and computer techniques Also included is a range of practical experiments and recipes from Stone Age to New Age Prepare yourself for a strange but captivating ride **The**

C. Finucane, 1996-06 Throughout history people have reported seeing ghosts But a Victorian ghost is in many respects a very different phenomenon from a ghost in Classical Greece or in medieval Europe Finucane

surveys reports of ghosts from ancient Greece the early Christian era the Reformation the Victorian age and through the twentieth century He asks such questions as How have the physical aspects claimed for ghosts varied from age to age What differences are there in the functions and intentions ascribed to ghosts How have the changes in more general beliefs in religion and science in particular influenced the perception of ghosts Drawing on primary sources from all periods and cultures Finucane addresses this topic in its full breadth R C Finucane Rochester MI is chairperson of the Department of History at Oakland University highly recommended Magonia UK a useful book for those readers interested in the history of

the supernatural Extrapolation      *The One Culture?* Jay A. Labinger, Harry Collins, 2010-08-15 So far the Science Wars have generated far more heat than light Combatants from one or the other of what C P Snow famously called the two cultures science versus the arts and humanities have launched bitter attacks but have seldom engaged in constructive dialogue about the central issues In *The One Culture* Jay A Labinger and Harry Collins have gathered together some of the world s foremost scientists and sociologists of science to exchange opinions and ideas rather than insults The contributors find surprising areas of broad agreement in a genuine conversation about science its legitimacy and authority as a means of understanding the world and whether science studies undermines the practice and findings of science and scientists *The One Culture* is organized into three parts The first consists of position papers written by scientists and sociologists of science which were distributed to all the participants The second presents commentaries on these papers drawing out and discussing their central themes and arguments In the third section participants respond to these critiques offering defenses clarifications and modifications of their positions Who can legitimately speak about science What is the proper role of scientific knowledge How should scientists interact with the rest of society in decision making Because science occupies such a central position in the world today such questions are vitally important Although there are no simple solutions *The One Culture* does show the reader exactly what is at stake in the Science Wars and provides a valuable framework for how to go about seeking the answers we so urgently need Contributors include Constance K Barsky Jean Bricmont Harry Collins Peter Dear Jane Gregory Jay A Labinger Michael Lynch N David Mermin Steve Miller Trevor Pinch Peter R Saulson Steven Shapin Alan Sokal Steven Weinberg Kenneth G Wilson      **Cosmic Influences on Humans, Animals, and Plants** John T. Burns, 1997 This annotated bibliography makes available to the general reader and scholar a broad survey of the scientific literature on alleged cosmic influences on humans animals and plants To be included a study must involve the collection of data or be a commentary on studies based on data As some of the topics covered are still quite controversial in nature while other topics have been scientifically studied to some extent the terms alleged claimed or suggested are noted in the citations to remind the reader that a particular study has not necessarily been proven to be scientifically valid The four parts of *Cosmic Influences on Humans Animals and Plants* are organized around alleged effects of solar activity the moon the planets and possible mechanisms for such actions Some effects that the sun and moon are known to have on our daily lives such as the cycles of light and dark and the lunar tides have not been included because of their commonality However other effects such as those influences the moon has been shown to have over some animals have been included for the sake of completeness With subject and author indexes      **After Postmodernism** Jose Lopez, Garry Potter, 2005-03-01 What comes after postmodernism A buzzword which began as an energising radical critique became by the 20th Century s end a byword for fracture eclecticism political apathy and intellectual exhaustion The last few years have seen a growing interest in critical realism as a possible alternative way of moving forward The virtues of critical realism lie in its successful provision of a philosophical

grounding for the social sciences and humanities and of a methodology applicable to many different fields of analysis After Postmodernism brings together some of the best known names in the field to present the first truly interdisciplinary introduction to critical realism The book presents the reader with a compendium of accessible essays illustrating the connection between meta theory theory and substantive research across Sociology Philosophy Literary Studies Politics Media Studies Psychology and Science Studies The flexibility of critical realism is illustrated in the range of topics discussed ranging from quantum mechanics to cyberspace to literary theory nature smoking the future fo Marx the unconscious and of course postmodernsim and the future of theory itself Contributors Allison Assiter Ted Benton Francis Barker Roy Bhaskar Jean Bricmont Sue Clegg Andrew Collier Justin Cruickshank Robert Fine David Ford Tim Forsyth Rom Harre Pam Higham Philip Hodgkiss Jose Lopez Christopher Norris Bertell Ollman Jenneth Parker Frank Pearce Douglas V Porpora Garry Potter John Scott Philip Tew Charles R Varela Anthony Woodiwiss
