

Marxian Economic Schools Thought In Economics Series Three Volumes

J.I. Bakker

Marxian Economic Schools Thought In Economics Series Three Volum:

The Complete Works of Rosa Luxemburg, Volume III Rosa Luxemburg, 2019-02-05 Rosa Luxemburg's theoretical masterpiece This collection is the first of three volumes of the Complete Works devoted to the central theme of Rosa Luxemburg's life and work revolution Spanning the years 1897 to the end of 1905 they contain speeches articles and essays on the strikes protests and political debates that culminated in the 1905 Russian Revolution one of the most important social upheavals of modern times Luxemburg's near daily articles and reports during 1905 on the ongoing revolution which comprises the bulk of this volume shed new light on such issues as the relation of spontaneity and organization the role of national minorities in social revolution and the inseparability of the struggle for socialism from revolutionary democracy We become witness to Luxemburg's effort to respond to the impulses challenges and ideas arising from a living revolutionary process which in turn becomes the source of much of her subsequent political theory such as her writings on the mass strike her strident internationalism and her insistence that revolutionary struggle never take its eyes off of the need to transform the human personality Virtually all of these writings appear in English for the first time translated from both German and Polish and many have only recently been identified as having been written by Luxemburg **Japanese Economics and**

Economists Since 1945 Aiko Ikeo, 2002-09-26 Leading Japanese scholars present an objective study of Japanese economics since 1945 based on statistical data and analysis It presents a wealth of original empirical data and a new perspective on international economic theory **The Methodology of Political Economy** J.I. Bakker, 2015-12-24 The importance of the global rural urban matrix is often overlooked due to urban normativity But sometimes agrarian populism and a pastoral rural imaginary result in the equally fallacy of a rural normativity as in Jeffersonian nostalgia for a lost way of life that never existed The nature of rurality in North America is important to study but as Alessandro Bonanno makes clear we cannot limit ourselves to the study of one or two nation states We must take a global perspective when it comes to the bio physical environment and the nature of the world capitalist system This collection takes such a perspective The editor frames the contributions with a Meta Paradigm called the New Political Economy Perspective NPEP and explains the roots of that approach in Classical Political Economy and the Canadian Political Economy Tradition of Harold Adams Innis There are chapters by an anthropologist a geographer two generalist sociologists and a group of rural sociologists There is also a chapter on psychiatry and mental health and another chapter which discusses pedagogy The use of an inter disciplinary framework to study global issues makes this a stimulating book which provides a window on issues that are often overlooked

Business Cycles and Depressions David Glasner, 2013-12-16 Experts define review and evaluate economic fluctuations Economic and business uncertainty dominate today's economic analyses This new Encyclopedia illuminates the subject by offering 323 original articles on every major aspect of business cycles fluctuations financial crises recessions and depressions The work of more than 200 experts including many of the leading researchers in the field the articles cover a broad range of

subjects including capsule biographies of leading economists born before 1920 Individual entries explore banking panics the cobweb cycle consumer durables the depression of 1937 1938 Otto Eckstein Friedrich Engels experimental price bubbles forced savings lass Steagall Act Friedrich hagen qualitative indicators use of macro econometric models monetary neutrality Phillips Curve Paul Samuelson Say s law supply side recessions James Tokin trend and random wages Thorstein Veblen worker job turnover and more

Marx, Uno and the Critique of Economics Thomas T. Sekine, 2023-01-31 This unique book written in a question and answer style brings to life the work of the world s foremost Marxian economist Thomas T Sekine on the scientificity of Marx s project in Capital its applicability to navigating world historic change across capitalist stages of development and what Marxian economics teaches us about building viable future historical societies Sekine a student and follower of Marxist Kozo Uno argues that capitalism neither constitutes the end of history nor does its overthrow await socialist revolution Rather based upon its own historical delimitations capitalism following World War I and the Great Depression of the 1930s has entered a period of disintegration Grounded on a scathing critique of bourgeois economics in all its forms Sekine exposes the futility of bourgeois policy interventions attempting to revive capitalism This book will be of interest to economists in both the mainstream and heterodox schools and those broadly interested in the history of economic thought

In the Tracks of Marx's Capital Sungur Savran, E. Ahmet Tonak, 2024-07-29 This book provides an accessible introduction to Marx s seminal work Capital and explores the core ideas of Marxian political economy relevant for modern day economies The first part gives an overview of Capital based on the authors original thinking in the methodology of Capital The second part discusses the application of these ideas to some understudied questions of measuring profit on alienation the rate of exploitation the reconstruction of input output tables and the role of the welfare state and social wage The third part sets forth new research in Marxian analysis in the 21st century facing the challenges brought about by digital labor and the deep crisis of the global economy The last part discusses the Marxism Neo Ricardianism controversy

Economics David A. Dieterle, 2017-03-27 A comprehensive four volume resource that explains more than 800 topics within the foundations of economics macroeconomics microeconomics and global economics all presented in an easy to read format As the global economy becomes increasingly complex interconnected and therefore relevant to each individual in every country it becomes more important to be economically literate to gain an understanding of how things work beyond the microcosm of the economic needs of a single individual or family unit This expansive reference set serves to establish basic economic literacy of students and researchers providing more than 800 objective and factually driven entries on all the major themes and topics in economics Written by leading scholars and practitioners the set provides readers with a framework for understanding economics as mentioned and debated in the public forum and media Each of the volumes includes coverage of important events throughout economic history biographies of the major economists who have shaped the world of economics and highlights of the legislative acts that have shaped the U S economy throughout history The extensive explanations of

major economic concepts combined with selected key historical primary source documents and a glossary will endow readers with a fuller comprehension of our economic world

Lectures in Macroeconomics Kazimierz Łaski, 2019-06-27 Lectures in Macroeconomics A Capitalist Economy Without Unemployment provides a systematic account of the principle of aggregate demand based on the work of Polish economist Micha Kalecki best known as one of the originators of the Keynesian Revolution in macroeconomics The lectures demonstrate the importance of aggregate demand in determining total output and employment in the capitalist economy They show how the investment decisions of firms affect economic growth arguing that due to the unstable nature of investment it is important that the government has a central role in stabilizing the economy This English translation of Kazimierz Łaski's final work brings up to date fundamental concepts to give a picture of the twenty first capitalist economy and the obstacles that must be overcome in bringing it to full employment It introduces the role of money and finance in the contemporary capitalist economy as well as the central role of the labour market and wages The analysis is illustrated with statistics and discussion around the evolution of capitalist economies and the rise of economic inequality since the Second World War culminating in the 2008 crisis and the economic deflation affecting Europe since that crisis Lectures in Macroeconomics remarks critically upon the neo classical approach to economics that has brought about slow economic growth unemployment and inequality

Varieties of Alternative Economic Systems Richard Westra, Robert Albritton, Seongjin Jeong, 2017-07-14 In this age of overlapping and mutually reinforcing deep global crises financial convulsions global warming mass migrations militarism inequality selfish nation states etc there needs to be more realistic dialogue about radical alternatives to the status quo Most literature produced heretofore has focused on the surface causes of these crises without much attention given to the sorts of major societal changes needed in order to deal with the crises we face This book moves the debate beyond the critiques and the false or not fully realised alternatives to focus on what can be termed practical utopias The contributors to this book outline a range of practical proposals for constructing pathways out of the global economic ecological and social crisis Varieties of Alternative Economic Systems eschews a single blueprint but insists on dealing directly with the deep structural problems and contradictions of contemporary global capitalism It provides a diverse array of complementary proposals and perspectives that can inform both theoretical thinking and practical action This volume will be of interest to academics and students who study political science ecological economics international politics and socialism

Frank Ramsey Cheryl Misak, 2020-02-13 When he died in 1930 aged 26 Frank Ramsey had already invented one branch of mathematics and two branches of economics laying the foundations for decision theory and game theory Keynes deferred to him he was the only philosopher whom Wittgenstein treated as an equal Had he lived he might have been recognized as the most brilliant thinker of the century This amiable shambling bear of a man was an ardent socialist a believer in free love and an intimate of the Bloomsbury set For the first time Cheryl Misak tells the full story of his extraordinary life
