Marxism And The Methodologies Of History:

Marxism and the Methodologies of History Gregor McLennan, 1981 **Marxism and the Methodologies of History**
Gregor McLennan, 1981 **New Approaches to State and Peasant in Ottoman History** Halil Berktaý, Suraiya
Faruqi, 2016-04-06 Debates on the world historical place of the Ottoman Empire in the last few decades have been
conducted mainly in Turkey but increasingly concepts have been introduced into the conversation from the study of
European Chinese and Central Asian history This book first published in 1992 examines the nature of the Ottoman state from
a variety of perspectives economic political and social *The Study of History*, 1988 The chief objective of this text is to
provide a handy reference guide for teachers students and researchers of modern European economic and social history
Since the bibliography covers only works written in the English language it will probably be of less use to the last named
group at least insofar as those within it are already seasoned researchers on a particular country or topic However it would
have been quite impossible from the point of view of length to have included all the literature in foreign languages while to
have done so would have defeated the essential aim of the volume namely that of providing a reasonably convenient guide for
those who teach and study the subject but who are not primarily specialists in the field *A History of Economic Theory and
Method* Robert B. Ekelund, Jr., Robert F. Hébert, 2013-08-30 Known for its clarity comprehensiveness and balance the latest
edition of A History of Economic Theory and Method continues that tradition of excellence Ekelund and Hébert's survey
provides historical and international contexts for how economic models have served social needs throughout the centuries
beginning with the ancient Greeks through the present time The authors not only trace ideas that have persisted but skillfully
demonstrate that past discredited ideas also have a way of spawning critical thinking and encouraging new directions in
economic analysis Coverage that distinguishes the Sixth Edition from its predecessors includes a detailed analysis of
economic solutions by John Stuart Mill and Edwin Chadwick to problems raised by the Industrial Revolution the role of
psychology and experiments in understanding demand and consumer behavior discussions of modern economic theory as it
interrelates with other social sciences and a close look at the historical development of the critical role of entrepreneurship
both in its productive and unproductive variants The authors creative approach gives readers a feel for the thought processes
of the great minds in economics and underscores key ideas impacting contemporary thought and practice Well crafted
discussions are further enriched by absorbing examples and figures Thorough suggested reading lists give options for more
in depth explorations by interested readers *Divergent Paths: The Hegelian foundations of Marx's method* Norman
Levine, 2006-01-01 Divergent Paths is the first in a series of three volumes that explores the historiography of the relationship
between Hegel and Marx it sets the terms of the relationship between Marx and Engels and explores the genesis of the
theories of Marxism and Engelsism from the late 19th century to the present day Given the vast pool of contemporary post
Marxist theoretical work a study like this is sorely needed This is the most thorough exploration of Marx's ideas from Hegel

through to the present day and is absolutely essential reading

Marxism and History Matt Perry, 2021-08-16 This textbook examines Marxism's enormous impact on the way historians approach their subject Tackling current historiographical questions in an accessible way the author offers a clear introduction to Marxist views of history key Marxist historians and thinkers and the relevance of Marxist theory and history to students own work This is a concise thorough overview of an important area of historiography The second edition incorporates significant new developments in research including Marxist contributions to the emergence of global maritime and transnational history the discovery of Marx's ecologism and the historical critique of fossil capitalism as a source of environmental disaster a reassessment of gender oppression through social reproduction theory and the contribution of Marxism to debates on race Eurocentrism and whiteness

Marx' Method, Epistemology, and Humanism P.J. Kain, 2012-12-06 In recent writings on Marx one finds an increasing interest in his humanism This phenomenon began in the third decade of our century as a reaction against the mechanistic and stereotyped image of Marx 1 characteristic of the Second International and of Stalinism Lukacs in *History and Class Consciousness* 1923 was one of the first to discover this new Marx and he did so even before the most important 2 of the humanistic writings of the young Marx had been discovered With the publication of these writings in 1932 namely the *Economic* 3 and *Philosophic Manuscripts of 1844* this new outlook was given enormous impetus In these Manuscripts Marx makes the human being the creator and the goal of all reality The objectification of the human essence through labor transforms both society and nature Labor transforms its world into a place which mirrors unfolds and confirms the human being This humanism is a complex and many faceted issue In this book we will be concerned only with a certain part of it i e the epistemology method and doctrine of nature which it involves Other aspects of it Marx concept of alienation and his theory of labor and the state have 4 been dealt with elsewhere

Methodology, Metaphysics and the History of Science Robert S. Cohen, Marx W. Wartofsky, 2012-12-06 This selection of papers that were presented or nearly so to the Boston Colloquium for the Philosophy of Science during the seventies fairly re presents some of the most disturbing issues of scientific knowledge in these years To the distant observer it may seem that the defense of rational standards objective reference methodical self correction even the distinguishing of the foolish from the sensible and the truth seeking from the ideological has nearly collapsed In fact the defense may be seen to have shifted the knowledge business came under scrutiny decades ago and indeed from the time of Francis Bacon and even far earlier the practicality of the discovery of knowledge was either hailed or lamented So the defense may be founded on the premise that science may yet be liberating In that case the analysis of philosophical issues expands to embrace issues of social interest and social function of instrumentality and arbitrary perspective of biological constraints upon knowledge as well as upon the species wide behavior of human beings in other relationships too of distortions due to explanatory metaphors and imposed categories and of radical comparisons among the perspectives of different civilizations Some of our contributors are frankly programmatic showing how problems

must be formulated afresh how evasions must be identified and omissions rectified but they do not reach their own completion

Methodology and Method in History (RLE Accounting) Lee D. Parker, Finley O. Graves, 2013-12-04 This bibliography provides the reader with a comprehensive reference tool that will enhance understanding of methodological issues and enable the user to employ research methods appropriate to their subject of study It also provides accounting historians a comprehensive data base for the development of papers addressing methodological issues in an accounting history context Access to this type of resource is particularly crucial to the development of accounting history research since the number of papers dealing with methodological issues published in accounting history literature is very small Hence the references in this bibliography are drawn from the literature of general history economic and business history legal and social history and philosophy The scope and range of its contents are broad references are taken from texts as well as papers published in over 450 journals
