Marxism And The City:

Marxism and the City Ira Katznelson, 1992 In this work Katznelson critically analyzes the development of Marxist scholarship on cities in the last quarter century He demonstrates how some of the most important weaknesses in Marxism as a social theory can be remedied by forcing it to seriously engage with cities and spatial concerns and explains the significant shortcomings even of this improved Marxism Katznelson explores how a Marxism that is open to engagement with other social theoretical traditions can help illuminate our understanding of cities and the patterns of class and group formation that have characterized urban life in the West *Marxism and the City* Ira Katznelson, 1992 An assessment of the scholarship on cities that has developed within Marxism in the past quarter of a century to show how some of the most important weaknesses in Marxism as a social theory can be remedied by forcing it to engage seriously with cities and spatial concerns

Marxism and the City Ira Katznelson, 1993 *The Promise of the City* Kian Tajbakhsh, 2001 This volume proposes a theoretical grounding for the study of cities and the people who live and work in them Using a threefold interdisciplinary approach to urban identities which links agency space and structure the book examines the work of three major urban theorists **Self-Organization and the City** Juval Portugali, 2012-12-06 Cities first came into existence more than five thousand years ago How to deal with these partly fascinating partly frightening creatures of mankind both practically and intellectually concerns all of us and in particular presents areal challenge to city planners Each historical epoch has had its own particular attitudes associated with the Zeitgeist Accordingly the planning and steering of cities were based on quite different criteria But in spite of these differences the concept of planning and steering was and still is the cornerstone of our dealing with cities Nevertheless the planner's dilemma is becoming more and more visible cities and megacities seem to be unplannable In this book Juval Portugali introduces a new idea Cities are self organizing systems To substantiate his revolutionary concept he uses several interlinked methods On the one hand and to my own delight he employs in his arguments theoretical tools developed in the interdisciplinary field of synergetics On the other hand jointly with his co workers he has performed detailed model calculations on cellular nets It has been a great pleasure and a wonderful experience for me to discuss these concepts with Juval Portugali over a number of years I was repeatedly and deeply impressed by the way he established profound and often surprising links to other fields of science **City-building In**

America Anthony M Orum, 2018-10-08 Why do some cities grow and expand while others dwindle and decline Why is Milwaukee a town of the past while Minneapolis St Paul seems reborn and infused with future dynamism And what do Milwaukee and the Twin Cities have to tell us about other cities prospects the trials and destinies of industrial Cleveland and post industrial Austin Anthony Orum's new book tells the story of these cities and at the same time of all cities Here the urban past present and future are woven into one compelling tale Orum traces the shift in the sources of urban growth from entrepreneurs to institutions and highlights the emergence of local government as a prominent force indeed as an institution

in shaping the trajectory of the urban industrial heartland This complex trajectory includes all aspects of urban boom and bust population trends economic prosperity politics and culture as well as hard to pin down qualities like a city's collective hope and vision Interspersing social theory historical ethnography and comparative analysis to help explain the fates of different cities Orum lucidly portrays factory openings labor strikes elections evictions urban blight white flight recession and rejuvenation to show the core histories and future shape of cities beyond the particulars presented in these pages The reader will discover the key people and politics of cities along with the forces that direct them With a rich variety of sources including newspapers diaries census materials maps photo essays and perhaps most captivating original oral histories *City Building in America* is ideal for anyone interested in urban transformation and for courses in urban sociology urban politics industrial sociology social change and social mobility

A Companion to the City Gary Bridge, Sophie Watson, 2008-06-09 *A Companion to the City* provides the reader with an indispensable and authoritative overview of the key debates controversies and questions concerning the city from a variety of theoretical vantage points with an international perspective Indispensable companion for students of the City Multidisciplinary approach of interest across several fields Includes contributions from major scholars in the field

Writings on Cities Henri Lefebvre, 1996-01-09 The work of Henri Lefebvre the only major French intellectual of the post war period to give extensive consideration to the city and urban life received considerable attention among both academics and practitioners of the built environment following the publication in English of *The Production of Space* This new collection brings together for the first time in English Lefebvre's reflections on the city and urban life written over a span of some twenty years The selection of writings is contextualized by an introduction itself a significant contribution to the interpretation of Henri Lefebvre's work which places the material within the context of Lefebvre's intellectual and political life and times and raises pertinent issues as to their relevance for contemporary debates over such questions as the nature of urban reality the production of space and modernity *Writings on Cities* is of particular relevance to architects planners geographers and those interested in the philosophical and political understanding of contemporary life

Complexity, Cognition and the City Juval Portugali, 2011-07-06 *Complexity Cognition and the City* aims at a deeper understanding of urbanism while invoking on an equal footing the contributions both the hard and soft sciences have made and are still making when grappling with the many issues and facets of regional planning and dynamics In this work the author goes beyond merely seeing the city as a self organized emerging pattern of some collective interaction between many stylized urban agents he makes the crucial step of attributing cognition to his agents and thus raises for the first time the question on how to deal with a complex system composed of many interacting complex agents in clearly defined settings Accordingly the author eventually addresses issues of practical relevance for urban planners and decision makers The book unfolds its message in a largely nontechnical manner so as to provide a broad interdisciplinary readership with insights ideas and other stimuli to encourage further research with the twofold aim of further pushing back the boundaries of

complexity science and emphasizing the all important interrelation of hard and soft sciences in recognizing the cognitive sciences as another necessary ingredient for meaningful urban studies *Towards Safe City Centres?* Gesa

Helms, 2016-02-24 Examining the rising interest in quality of life offences anti social behaviour and incivilities in urban public spaces this study explores the rising importance of policing crime control and community safety policies in the context of the ongoing urban restructuring in old industrial cities This is achieved through an extensive exploration into the making and remaking of urban spaces in the city of Glasgow In so doing this book puts forward a strong and innovative theoretical argument Framed in a critical Marxist perspective that draws on debates within German speaking critical theory and Marxism this study argues for the centrality of human social praxis in our understanding of contemporary cities It engages with questions over the production of social space a fragmented social totality and human agency which so far have only received limited attention in Anglo American debates
