Marx's Economics A Dual Theory Of Value And Growth:

Marx's Economics Michio Morishima, 1973-01-25 Professor Morishima concentrates on the three volumes of Das Kapital and their contributions to the major topics of traditional Marxian economics. He provides a rigorous mathematisation of the labour theory of value, the theory of exploitation, the transformation problem, the reproduction scheme, the law of relative surplus population, the falling rate of capital and the turnover of capital. After proving Marxian propositions in a rigorous way, he argues that in order to combine Marx's model with von Neumann's in a new growth theory, it is necessary to abandon the labour theory of value. Professor Morishima feels that this sacrifice is well worth making because it enables Marxian economics to be integrated with orthodox theory into a new Marx-von Neumann theory of growth and this to make an important contribution to the development of the subject. **Karl Marx's Economics** John Cunningham Wood, 2004-11

The Political Economy of Marx (2nd Edition) Michael Charles Howard, 1988-09 This edition of The political economy of Marx. Second edition is published by arrangement with Longman Group UK Limited. T p verso **Theory of Value, Prices and Accumulation** Gilbert Abraham-Frois, Edmond Berrebi, 1979-09-27 **Theories of Value from Adam Smith to Piero Sraffa** Ajit Sinha, 2013-04-03 This book presents a comprehensive account of more than 200 years of controversy on the classical theories of value and distribution. The author focuses on four perhaps most critical classics viz Adam Smith's Wealth of Nations, David Ricardo's Principles of Political Economy, Karl Marx's Capital and Piero Sraffa's Production of Commodities by Means of Commodities. The book highlights several significant differences in the theories of the four authors as it searches for the classical standpoint that separates them from the moderns. It throws fresh light on some old questions while introducing new controversial interpretations in the literature surrounding it. It is unique in its organisation as it first presents the author's close reading of the theories of value and distribution in the four classics and then critically engages with the major alternative interpretations and criticisms of the theories discussed therein. Bringing original insights on theoretical positions, the book challenges canonical interpretations so as to discuss and analyse the flaws and weaknesses in addition to the already obvious strengths of widely celebrated theories. The theories discussed here emerge from questions like what role does demand or human psychology play in the determination of value in classical theory? Do classical economists determine the distribution of income within the context of a theory of prices and resource allocation? What role does the notion of equilibrium play in classical theory and the theory of Sraffa? It will appeal to academics and students of economic theory and philosophy as well as to the general reader. [Keynes, Sraffa and the Criticism of Neoclassical Theory](#) Neri Salvadori, Christian Gehrke, 2012-05-23 Heinz Kurz is recognised internationally as a leading economic theorist and a foremost historian of economic thought. This book pays tribute to his outstanding contributions on the occasion of his 65th birthday by bringing together a unique collection of new essays by distinguished economists from around the world. Keynes, Sraffa and the Criticism of Neoclassical Theory comprises twenty-three essays covering themes in Keynesian economic

theory in the development of the modern classical approach to economic theory linear production models and the critique of neoclassical theory The essays in this book will be an invaluable source of inspiration for economists interested in economic theory and in the evolution of economic thought They will also be of interest to postgraduate and research students specialising in economic theory and in the history of economic thought *Reclaiming Marx's 'Capital'* Andrew Kliman,2006-12-01 This book seeks to reclaim Capital from the myth of internal inconsistency a myth that serves to justify the censorship of Marx s critique of political economy and present day research based upon it Andrew Kliman shows that the alleged inconsistencies are actually caused by misinterpretation By modifying the standard interpretation of Marx s value theory in two simple ways the recent temporal single system interpretation eliminates all of the alleged inconsistencies Written especially for the non specialist reader in a clear accessible style and with the bare minimum of mathematics *Reclaiming Marx s Capital* introduces readers to Marx s value theory and contrasting interpretations of it the history of the internal inconsistency controversy and interpretive standards and methods Kliman then surveys Marx s falling rate of profit theory the relationship of prices to values the transformation problem Marx s exploitation theory of profit and other topics The book ends with a discussion of why the myth of inconsistency persists and a call to set the record straight Marx at 200 Gilbert Faccarello,Heinz D. Kurz,2020-09-10 The book provides new vistas on Karl Marx s political economy philosophy and politics on the occasion of his 200th birthday Often using hitherto unknown material from the recently published Marx Engels Gesamtausgabe the MEGA2 edition the contributions throw new light on Marx s works and activities the sources he used and the discussions he had correcting received opinions on his doctrines The themes dealt with include Marx s concepts of alienation and commodity fetishism the labour theory of value and the theory of exploitation Marx s studies of capital accumulation and economic growth and his analysis of economic crises and of the labour contract Novel developments in the reception of his works in France and the UK conclude the volume This book was originally published as a special issue of The European Journal of the History of Economic Thought **Capitalism in the Anthropocene** John Bellamy Foster,2022-08-23 Over the last 11 700 years during which human civilization developed the earth has existed within what geologists refer to as the Holocene Epoch Now science is telling us that the Holocene Epoch in the geological time scale ended replaced by the onset of a new more dangerous Anthropocene Epoch which began around 1950 The Anthropocene Epoch is characterized by an anthropogenic rift in the biological cycles of the Earth System marking a changed reality in which human activities are now the main geological force impacting the earth as a whole generating at the same time an existential crisis for the world s population What caused this massive shift in the history of the earth In this comprehensive study John Bellamy Foster tells us that a globalized system of capital accumulation has induced humanity to foul its own nest The result is a planetary emergency that threatens all present and future generations throwing into question the continuation of civilization and ultimately the very survival of humanity itself Only by addressing the social aspects of the current

planetary emergency exploring the theoretical historical and practical dimensions of the capitalism's alteration of the planetary environment is it possible to develop the ecological and social resources for a new journey of hope The Capitalist Space Economy Eric Sheppard, Trevor Barnes, 2015-03-27 Representing an innovative approach to the analysis of the economic geography of capitalism this stimulating book develops an analytical political economic framework Part 1 provides an introductory overview for some of the fundamental debates about price profits and value in economics which underlie the analytical political economy approach Part 2 analyzes the special role of space and transportation in commodity production and the spatial organization of the economy that this implies Parts 3 and 4 examine the conflicting goals and actions of different social classes and individuals and how these are complicated by space concluding with a detailed analysis of capitalists' strategies as they cope with uncertainty and disequilibrium
