

Health Coverage Around the World

Who is covered, and how?

Universal coverage with single-payer system

Everyone is covered by a national health-care plan that is fully funded by the government, the "single payer."

Universal coverage with multi-payer system

Everyone is covered under a national health system that has competing insurers, with private options available for those who can afford them.

Multi-payer system with no universal coverage

Not everyone has coverage. Those who do have insurance are covered either through specialized government programs or private insurers.

No national health-care infrastructure (fully out of pocket)

No government options exist to offer people coverage. Individual care providers and aid organizations offer specific health services, but access is limited.
